

## **Weathering COVID-19**

### **Impact on Banking in India – Part 1**

Private and confidential  
April 2020

# Contents

**1. Context**

**2. Potential scenarios**

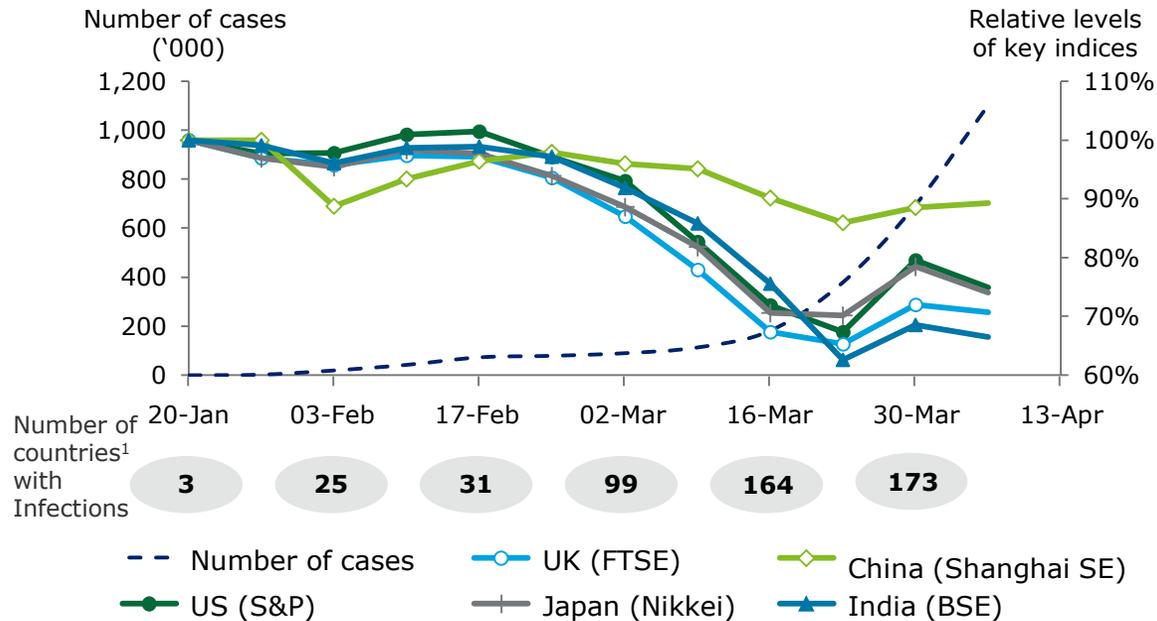

**3. Impact on key stakeholders**

**4. Way forward for financial institutions**

# COVID-19 has emerged as the black swan event of the century, with significant macroeconomic impact both globally and in India

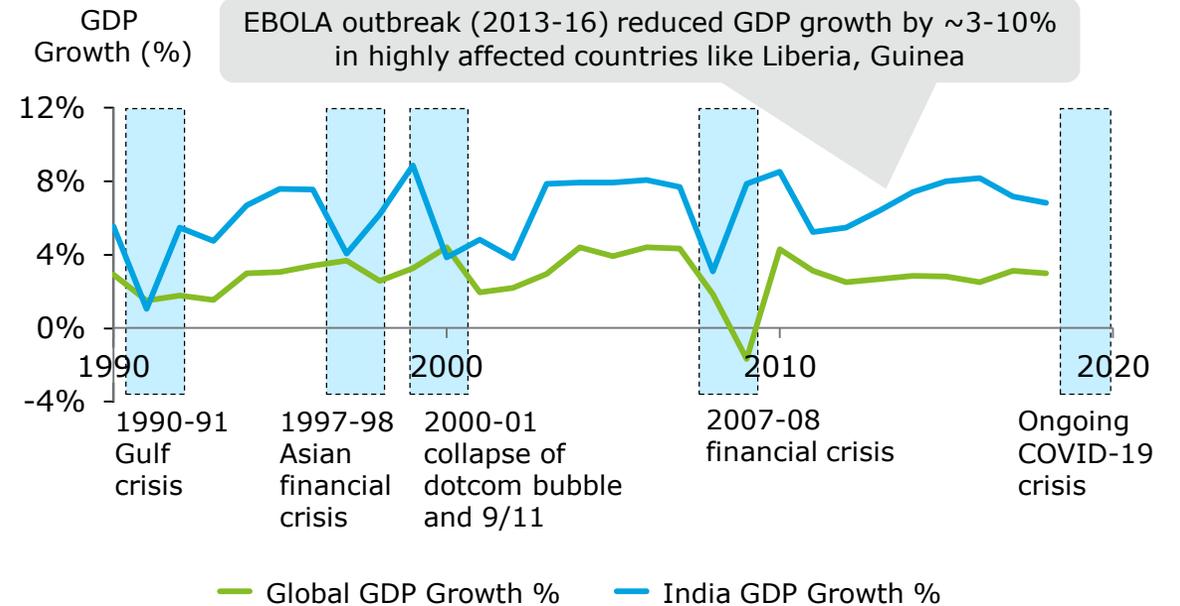

Exponential spread of COVID-19 has led to a significant fall in major indices...

**Impact of COVID-19: Number of cases and movement of global indices<sup>2,3,4</sup>**

...indicating its macroeconomic impact and potential to significantly affect GDP growth rates

**Historical global and Indian GDP growth rates<sup>5</sup>**

Given the rapidly evolving COVID-19 situation, whether the economy recovers sharply (as in the case of past disruptions) or slips into a prolonged recession, is yet to be seen.

Note: <sup>1</sup>Countries as classified by WHO, <sup>2</sup>Value as of end of the day

**Impact:** ↑ Positive    ■ Neutral    ↓ Negative

For banking, a short-term disruption is likely to lead to accessibility concerns, in addition to scaling-down of SME/corporate customers, and increased defaults by retail customers

### Short-term disruption

**Inability to access data / infrastructure**, leading to reduced serviceability

Temporary **correction in valuation** of FIs, with an expected reduction in returns

**Difficulty in accessing branches** for routine operations

**Default** in loan payments

**Scaling down** of non-essential operations

Significant **reduction** in domestic and cross-border **trade**

A more prolonged crisis is likely to increase customer preference towards digital channels and products such as insurance, in addition to defaults by SMEs/corporates

### Medium-term disruption

A full-blown pandemic is likely to lead to a significant reduction in demand from SMEs/ corporates, structural shifts in customer behaviour, and transformation of employee roles

### Long-term disruption

Need to **build new skills** to adapt to a changing business environment

Push of shareholders to **invest capital in inorganic growth** opportunities

**Loss of trust** in **structured savings** instruments (e.g., MFs and ULIPs)

Flight to safety with **preference for big banks** and **asset-backed instruments** (e.g., gold)

Declaration of **insolvency** by small/non-digital players

Rampant **lay-offs** in the private sector due to decreased margins

While the government and RBI have already swung into action, prolonged disruption could lead to further initiatives facilitating structural changes in the industry

### Short-term initiatives underway

### Indicative structural changes (medium/ long-term)

#### Government

-  **INR 1.7 trillion relief package** for the poor that includes cash transfer and food security
-  **Strengthening administrative machinery** to effectively distribute benefits of welfare programs

-  Institution of larger **corporate bail-out packages**
-  Increasing **empowerment of local bodies** for effective crisis management of crisis

-  Call for **emergency/drastring measures for economic survival**
-  Push for **priority sector lending** by banks

#### RBI

-  **Three-month moratorium** for term loans
-  Reduction in **repo rate by 90 bps**
-  **Liquidity infusion** through **INR 25k cr** long-term repo operations (LTRO)

-  **Relaxation of asset classification** norms
-  Further repo rate reduction to 2-3%
-  Further infusion of domestic liquidity (through dollar swaps, LTROs, etc.)

-  Institution of **operating limits for customers** for structural strengthening
-  Sustained repo rate reduction to near-zero levels

Financial institutions are beginning to respond to some of the immediate imperatives to facilitate business continuity

### Deploying targeted offerings

**COVID-19 insurance**

**Loan term relaxation**

**Third-party data partnerships for trade finance**

**Plug and play non-financial services for SMEs**

### Revamping internal systems

**Migration to cloud systems to enable employee remote access**

### Increasing customer access

**Comprehensive digital platform**

**Digital trade financing**

**Home delivery of cash**

### Managing talent

**Assurance of employee job security**

However, a focused approach targeting new opportunities while addressing immediate and constantly evolving needs would be critical for driving growth in the long run

A

### RESPOND

Tactical initiatives to react to the needs of employees, customers, and communities, and maintain business continuity

- i Facilitate a conducive **working environment for employees**
- ii Enhance **customer centricity** through digital channels and customised offerings
- iii Support the **government and communities' COVID-19 response** strategies through partnerships
- iv Work towards ensuring **business continuity** despite limited operations

**Immediate priority – detailed here**

B

### RECOVER

Tactical and strategic interventions to prepare the platform for profitable growth as the economy recuperates

- i **Recalibrate risk** assessment models for each scenario
- ii Engage in **partnerships** to **optimise processes** and **enhance experience**
- iii **Reskill employees** on new processes/ways of working

**To be covered in subsequent reports**

C

### THRIVE

Strategies and business model innovations to drive growth and share gain in a drastically different environment

- i **Reprioritise sectors and customer segments** based on **growth and risk profiles**
- ii Design **innovative business models** for the new industry environment
- iii Build robust **digital ecosystems** leveraging latest technologies (e.g., IoT)

# Respond: Employee engagement | Facilitate a conducive working environment for employees

## **i** Use technology to adapt to new ways of working

**Provide remote access infrastructure**  
Strengthen tech infrastructure for remote access (e.g., VPN, security tokens, network bandwidth, laptops, and cloud-based systems)

**Facilitate communication and feedback channels**  
Create tech-enabled platforms to manage communication with employees and obtain their pulse/feedback.

**Increase use of existing digital workflows**  
Reduce physical interactions using document scanning, OCR, etc.

## Provide 'empathy packages' to boost morale

**Assure job security**  
Communicate constantly to assure job security.

**Provide COVID-19 cover**  
Provide COVID-19 insurance for employees and their families.

**Establish COVID-19 employee helpdesk**  
Set-up an employee support centre offering constant check-ins, counseling, etc.

# Respond: Customer engagement | Enhance customer centricity through digital channels and customised offerings

## ii Enhance digital channel adoption and usage

### Target existing customers

Run SMS/email campaigns to make customers aware of digital channels and increase adoption.

### Build awareness through partnerships

Tie-up with other players in digital ecosystem (e.g., online delivery apps) to increase digital adoption.

### Create digital champions

Train front-line staff to move customers to digital.

## Understand and cater to emerging needs

### Check-in with customers

Keep in constant touch with customers through SMS/ Whatsapp/calls to assure support through the crisis.

### Determine emerging needs

Identify key customer archetypes and their emerging needs in the current situation.

### Customise offerings

Offer specific products (e.g., distribute insurance covering COVID-19 and customised loans).

### Reach out to priority customers

Understand priority customers' needs and pain points to identify products and services to be deployed.

# Respond: Regulatory and community engagement | Support national/state COVID-19 response strategies through partnerships

iii

## Support regulators in policy formulation

## Partner with governments and NGOs

## Offer direct support to communities\*

### Engage with RBI

Work with industry bodies to identify key risks/assistance required, and engage with RBI to contribute towards required policy changes.

### Partner with state/ central governments

Support central and state governments in COVID-19 relief initiatives (e.g., awareness building).

### Partner with local bodies

Partner with local bodies to act as nodal points for public assistance in select micro-markets.

### Create ecosystem

Act as an aggregator of customer grievances and direct them to appropriate agencies (e.g., local govt. helpline).

### Provide helpline

Use existing contact centre infrastructure to offer COVID-19 related alerts and guidance on government schemes.

\*Impact of these initiatives on banks' infrastructure and employees' well-being to be assessed

# Respond: Business continuity | Work towards ensuring business continuity despite limited operations

iv

## Maintain operational stability

### Optimise network

Optimise the number of branches/ATMs in operation and redeploy staff based on the government's mandate and footfall.

### Maintain liquidity

Ensure optimum liquidity and credit deployment, given changing rates and bond yields.

### Use community influencers

Work with residential welfare associations, SME groups, etc., for retail and SME offerings.

## Assess and manage risk exposure

### Assess vulnerabilities

Identify strategic risks based on exposure to each sector/geography, to aid sector-specific strategy formulation.

### Manage risk

Identify initiatives to drive collections, and work with customers and industry bodies.

### Monitor sectoral policies

Assess policies affecting high-exposure sectors and their implications.

## Build quick response capabilities

### Create critical response team (CRT)

Deploy centralised nodal team supported by localised teams to quickly address emergencies.

### Deploy standard playbook

Create standardised guidelines for the CRT to tackle specific situations.

### Scale-up gradually

After the lockdown, scale up operations gradually while adhering to social distancing norms (e.g., rotational work from home).
