Growth with Impact
## Government Summit

19-20 September 2024
Leela Palace, New Delhi

"

It is our resolve to build a developed India by 2047; our commitment is that no section of society should be left behind.

Shri Narendra Modi,
Prime Minister,
Government of India

India @2024

In 2024, amid global turbulence, India stands resilient with a GDP of US$3.9 trillion, poised for growth at 7% in FY25, significantly outpacing the global economy. The Government of India aims to transform into a developed nation by 2047, supported by inclusive, sustainable, self-reliant policies rooted in global well-being.

To achieve the vision of Viksit Bharat@2047, strategic collaborations are pivotal. Deloitte, in alignment with India's aspirations, plays a crucial role in fostering an ecosystem where leading brands converge to drive innovation and sustainable development. By partnering with the Government of India, Deloitte contributes to monumental reforms, particularly in infrastructure and digital transformation. This partnership amplifies the impact of initiatives like the creation of citizen-centric public services and a forthcoming public AI platform, crucial for future-ready governance.

The "Indian way of development" is being built on the pillars of inclusivity, sustainability, self-reliance and global well-being. Deloitte's expertise enriches policy frameworks, emphasizing outcome-driven results, notably enhancing employability through focused skilling initiatives.

India's commitment to sustainability is underscored by its goal to achieve net-zero emissions by 2070, spearheading global efforts in renewable energy and carbon credit trading. Deloitte collaborates in these initiatives, reinforcing India's position as a leader in green growth through its advisory services, thought leadership and innovations.

Strategically embracing self-reliance (Aatmanirbhar Bharat), India fortifies its capabilities in critical sectors like semiconductors, while diversifying trade partnerships to mitigate global economic fluctuations. Deloitte supports these efforts by facilitating strategic insights and operational efficiencies, ensuring resilient growth.

In the realm of security, India enhances defence capabilities through structural reforms and modernisation, reinforcing national preparedness against evolving threats. Deloitte seeks to support the government in its efforts towards strengthening India's security frameworks.

As India assumes global leadership roles, Deloitte reinforces India's message of global cooperation and shared prosperity. Together, Deloitte and India pave the path towards a sustainable and prosperous future, laying the foundation for India @2047 to realise its full potential on the global stage.

Ārohaṇa (आरोहण) – A synopsis
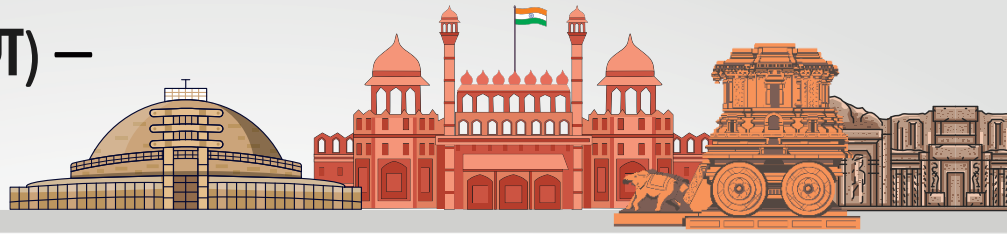

India is stepping into a global leadership role at a pivotal moment, amid significant transformations worldwide. This change is happening because of many different things, like new technologies such as artificial intelligence making big differences in how things work. But there are also challenges, such as climate change, which are making us rethink how we grow and take care of the planet.

In this important moment, India has a unique opportunity to shape a promising future through careful decisions, actions and priorities. Deloitte's Government Summit, **"Ārohaṇa (आरोहण): Growth with Impact,"** stands as a flagship event aimed at charting India's path to sustainable growth in alignment with the vision of Viksit Bharat@2047. It serves as a platform for comprehensive discussions covering digital transformation, infrastructure, security and sustainability – essential pillars for India's sustained progress.

The summit brings together experts from government, public sector, industry, think tanks and startups to envision and shape India's global leadership narrative for the future. Our goal is to connect our proven track record of pioneering innovations, enabling you to make informed, strategic decisions that drive meaningful impact and foster a better world.

Themes
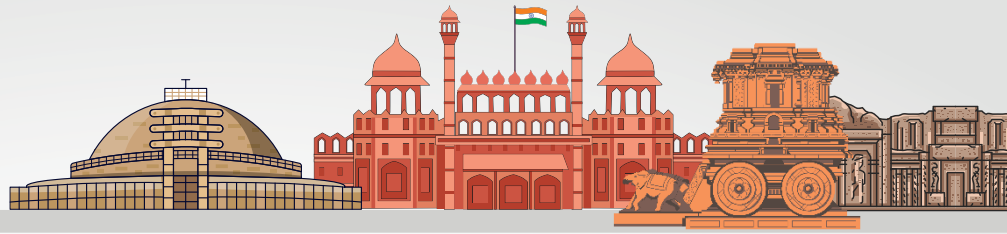

The Deloitte Government Summit 2024 is focused on identifying the key components that will be essential for India to communicate its chosen path for growth to the world. These elements are crucial for establishing a foundation for impactful growth.

Government Digital transformation
Explore emerging trends within digital transformation and their applicability in revolutionising public sector operations

Economic development
Examine key drivers for sustaining inclusive and holistic economic development

Trust
Address new challenges and threats to security, including non-traditional threats like cybersecurity

Service delivery excellence
Discuss strategies for enabling quality service delivery to citizens, businesses and governments
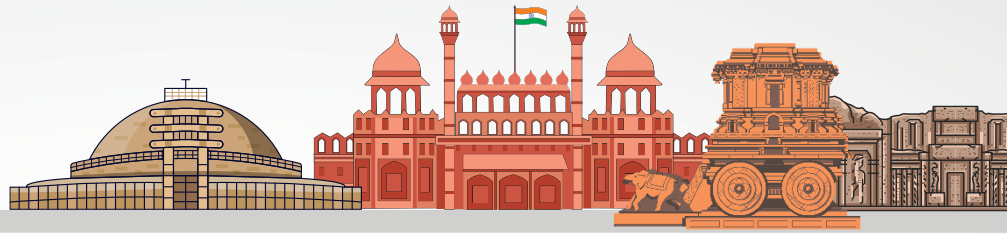

Inclusive growth
Examine strategies for fostering growth rooted in inclusivity and equity

Green growth
Discuss India's commitment to spearheading a just transition towards a greener future

Key sessions

Deloitte Government Summit offers a unique content format designed for meaningful discussions.

Panels & talks

The discussion sessions, comprising panels, visionary discussions and concise power-byte sessions, will serve as a platform for high-ranking government officials, industry pioneers and scholars to exchange their viewpoints and outlooks regarding the summit's themes. These sessions are designed to foster conversations about critical obstacles, delve into emerging trends and prospects, and reach a consensus on forthcoming strategies and practical recommendations.

Manthans

Manthan will provide a platform for government officials, industry experts and representatives from think tanks to partake in substantive discussions related to the summit's central themes. These sessions are geared towards pinpointing inventive solutions, suggesting policy measures and nurturing partnerships to address government challenges within specific priority areas.
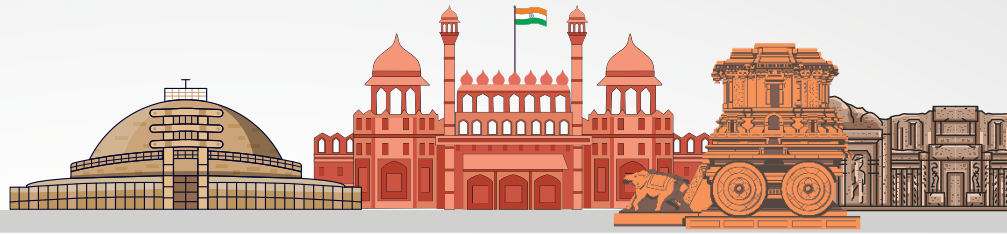

Points of view (POV)

Through the exchange of ideas and viewpoints, new perspectives emerge, challenging existing paradigms and suggesting innovative solutions to the challenges at hand. These discussions will culminate in insightful POVs that may influence future strategies and policies.
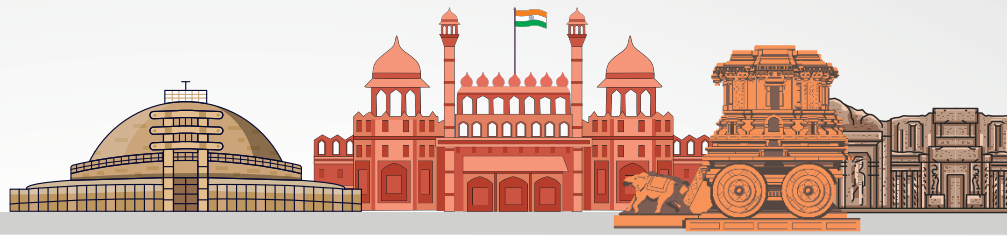

Manthans

Workshops designed to engage in discussions and investigations of critical government focal points, with a focus on how technology can effectively facilitate the advancement of these priorities.

| Manthan	Description
Cyber Security Operations Center	As cybersecurity threats grow in frequency and complexity, Cyber Security Operations Centers (SOCs) will be crucial for effective threat detection and response. Explore how advanced technologies are shaping the future of SOCs.
Gen AI	Generative AI (Gen AI) is revolutionizing sectors by enhancing productivity and fostering innovative, personalized business models. However, rising concerns about data security and privacy must be addressed. Ideate strategies to ensure a responsible and equitable future for Gen AI.
Open Networks-law & justice	Open networks based on open standards boost interoperability and collaboration, allowing seamless data sharing. Explore how legal systems can become more agile and future-ready by leveraging these networks to improve the speed and efficiency of justice delivery.
Modernising the utilities	Modernizing utilities will be crucial for India@2047 to improve quality of life, drive economic growth, and advance sustainability and climate change mitigation. Explore the necessary policy strategies, opportunities, and best practices to achieve these goals.
Ayushman Bharat Digital Mission (ABDM) for providers	The Ayushman Bharat Digital Mission (ABDM) will revolutionize healthcare through enhanced patient data management, telemedicine, and evidence-based practices. This lab will explore the evolving roles and opportunities for healthcare providers in this new ecosystem.
Sustainability	Sustainability is no longer a luxury; it has become a necessity. Explore strategies and solutions for building a sustainable future that balances people, planet, and profit. Discover how to integrate these elements effectively and drive meaningful impact.
Education	To fully realize India's demographic dividend, education must play a pivotal role. Explore innovative approaches to revolutionize education by integrating advanced technologies, enhancing employability, and fostering a more holistic learning experience.

Manthans

Workshops designed to engage in discussions and investigations of critical government focal points, with a focus on how technology can effectively facilitate the advancement of these priorities.

| Manthan	Description
Measuring the immeasurable	To accurately assess progress in any sector, measuring outcomes is crucial. However, these outcomes can often be subtle, intangible, or intricately connected, making them difficult to quantify. This lab discusses the role of data and analytics in providing clarity and insight to elusive metrics.
Sovereign cloud	As domestic and regional privacy and cybersecurity regulations intensify, sovereign cloud has emerged as a secure solution for storing and processing sensitive data within national borders. Explore the potential of sovereign cloud and the emerging trends that are shaping its future
ABDM for Healthtech	Explore strategies to optimize utilization of healthtech through the Ayushman Bharat Digital Mission, setting new benchmarks for healthcare delivery across India.
UEI	The Unified Energy Interface (UEI) is an open network that simplifies energy transactions for electric vehicle (EV) charging. This lab will explore how UEI can boost interoperability, facilitate peer-to-peer transactions, and enhance energy efficiency and scalability.
Agritech	Agritech is crucial for enhancing productivity, efficiency, and sustainability in farming practices. Explore the latest innovations and emerging trends in this field and discover how they are revolutionizing the agricultural sector.
MSME	MSMEs are key to India's inclusive growth. Explore strategies to maximize their potential and drive economic development, while discovering innovative ways to enhance their role in fueling the nation's growth engine.
Urban Platform for deliverY of Online Governance (UPYOG)	Explore UPYOG platform and its potential to drive digital transformation in municipal services through its comprehensive suite of open APIs, services, and reference implementations.
Infrastructure	Explore strategies for building resilient infrastructure that accelerates economic development, focusing on sustainability, adaptability, and technological integration for long-term growth and stability.

Agenda | Main Conference
19 September 2024
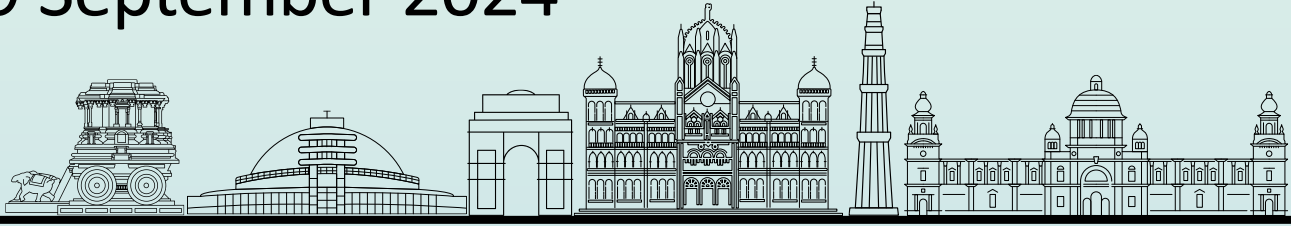

Start time	End time	Session
