

Prepare, respond, and rebound from cyber incidents with speed and resilience

Today, no business is immune from a potential cyberattack. It's no longer a question of if an organisation will be attacked, but when. The recent spate of cyberattacks have become highly sophisticated. No organisation—regardless of size or industry—is immune from the damage caused by cyber incidents, which is why they must be prepared and equipped with the right capabilities to quickly contain and remediate such incidents.

Our Cyber Incident Response (CIR) capabilities enable your organisation to proactively prepare for a cyber incident and provide quick response to, and recovery from, an incident.

Our CIR framework and approach is based on the collective experience of a global network of specialists and the culmination of many years spent assisting clients in preparing for, responding to, and rebounding from attacks.

The CIR framework begins before an incident occurs. A set of proactive and responsive capabilities enable your organisation to:

- 1. Prepare:** We design and develop an incident response (IR) programme tailored to your business, with strategy, organisation, and procedures
- 2. Respond:** We gather information and determine incident response priority, triage activities, and assist with risk mitigating actions to prevent further impact to your organisation in case of a cyber incident
- 3. Rebound:** Our team works with you to develop near-term incident remediation, remediation strategy, and a roadmap for moving forward

Our offerings

Incident response programme development

Develops cybersecurity incident response programme and threat scenario-based playbooks

Post incident support

Leads in remediation, sustainment, and recovery from an incident that impacts business operations

Compromise assessments

Assesses the current state of the network infrastructure to identify any indicators of network compromise

Tabletop exercises and cyber wargaming

Conducts tabletop exercises & immersive cyber wargames in a simulated cyberattack scenario to help evaluate the effectiveness of the IR plan and associated organisational response

Incident response retainer

Provides escalated support to respond to cyber disruptions whether from internal or external forces

The Deloitte difference

End-to-end suite of CIR services

We provide end-to-end cyber incident response services that help our clients prepare for, respond to, and recover from cyber incidents across the entire incident lifecycle

A recognised leader for CIR services

Deloitte is recognised as a leader in incident response by various analysts and advisors

Global reach

We provide assistance across the globe to major markets, leveraging our global network of member firms

Expansive resources, tools, and facilities

We have over hundred practitioners globally with extensive backgrounds in CIR, coupled with state-of-the-art tools and facilities that allow for a near-immediate response in almost any setting
