

Cyber Threat Intelligence

Preparing and combating against security attacks

1. Alert Advisory
2. Anti-Phishing
3. Malware Monitoring
4. Anti Trojan
5. DDOS Protection
6. Advanced Threat Protection
7. Web App. Firewall
8. Network Behavior Monitoring

Incident Response & Management

Providing the prompt response and resolution to qualified incidents

1. Incident Response
2. Forensic & Investigation
3. Malware Analysis

Cyber Analytics

Anticipating, planning & preparing for predictable & worst case scenarios

Service Offerings

1. Log Management
2. Incident and Event Management
3. IP Reputation
4. Data Exfiltration (DLP)
5. Data base Activity Monitoring
6. Firewall Analysis

Design

Implement

Operate

Vulnerability Management

Providing the enhanced threat protection to critical environments

1. Ethical Hacking
2. Vulnerability Assessment
3. Penetration Testing
4. Source Code Review
5. Application Security Testing

Infrastructure Management

Providing IT infrastructure management services

Managed Services

1. NOC-SOC
 2. Content Filtering
 3. SSL VPN
 4. IDAM - PIM
 5. End Point Control
 6. Application Monitoring
- ### Monitoring-Analytics
1. Geo Ring Fencing
 2. Video Analytics
 3. Social Analytics
