

# Strategic decision-making for the tax and finance functions

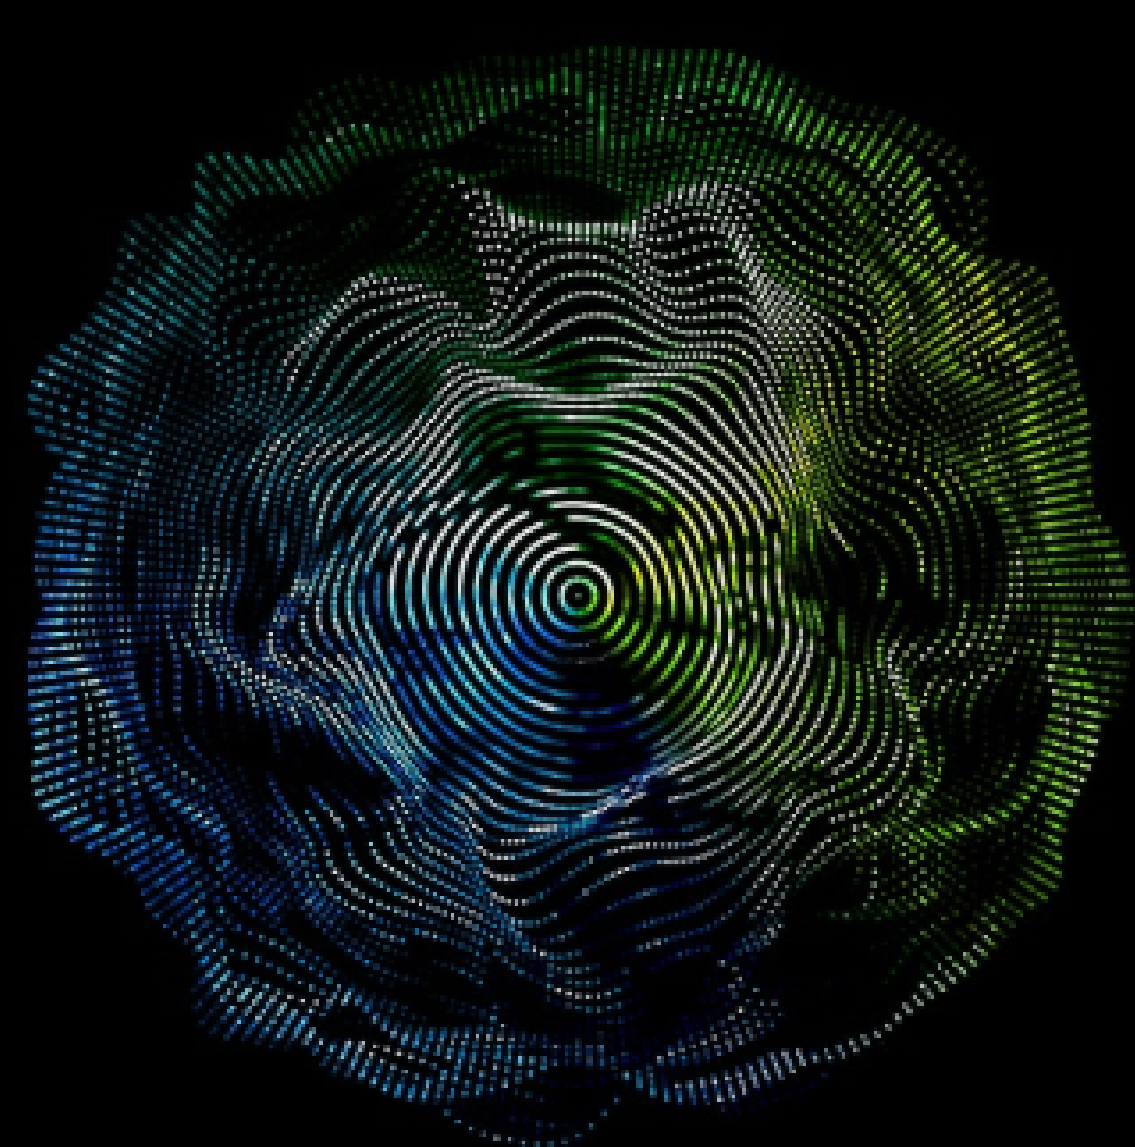

## Planning *with* foresight

Tax is often the greatest single expense for many companies, yet it often remains largely an afterthought in the strategic planning process. Modernizing tax operations and closely aligning the tax and finance functions—across people, process, and technology—can turn real-time tax decision-making from a vision into a reality. Understand how integrating tax and financial systems around a business tax strategy can help organizations stay ahead of risk, deliver forward-looking insights, improve tax function effectiveness, and ultimately boost the bottom line.

Learn how the Power of With can elevate your strategic decision-making.
