

Trade Compass™ International Trades Solution

Introduction of the new function (HS Version Converter)

Deloitte Tohmatsu Consulting LLC

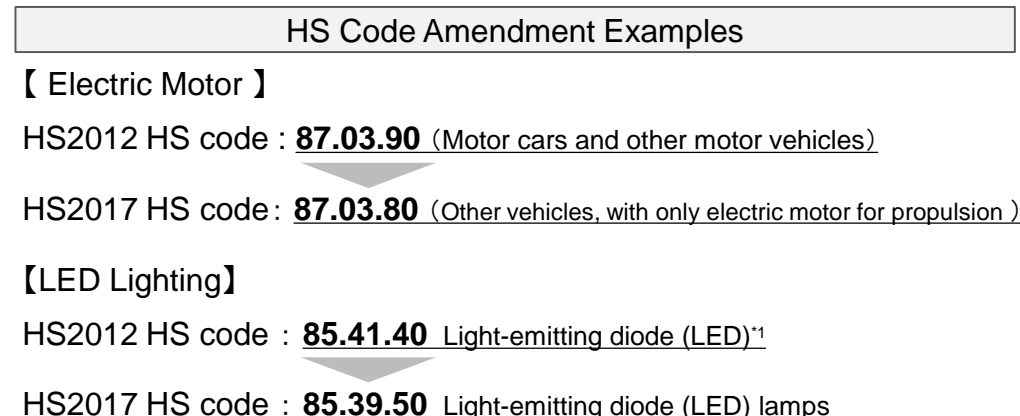

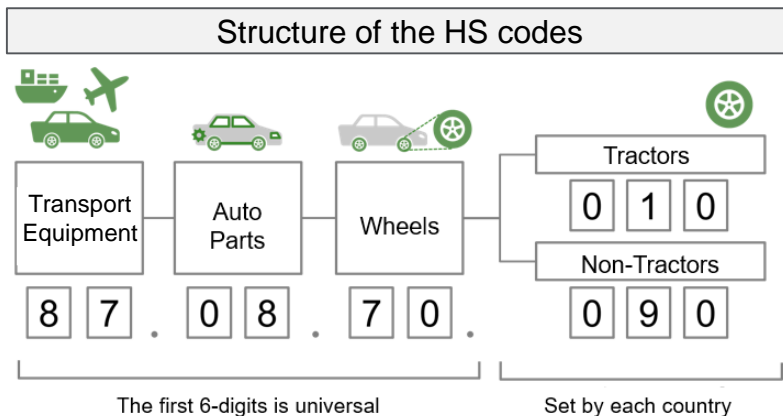

October 2020

Introducing New Function 「HS Version Converter」

The HS codes are significantly amended every five years. Considering the version of the HS used for each FTA is different, accurate correlation (conversion) is required to utilize the FTAs

HS Code Summary

- The HS codes are classification numbers used for classifying items when importing and exporting goods.
- Determined by the World Customs Organization which is governed on the basis of the International Convention regarding the “Harmonized Commodity Description and Coding System”.
- It consists of numbers over 6-digits.
- **The first 6-digits comprised of universal number; from 7th digit on, each country assigns numbers to further classify.**
- **Major amendments are made once every five years to reflect technological innovations, etc.**
 - Most recently revised on January 1, 2017
 - **The HS version could be different depending on the timing of negotiation or effect date of an FTA.** (e.g. JP-TH EPA:HS2002, TPP11:HS2012)

The HS code versions used by producers and exporters in their regular operation and the HS code versions used by the FTA may differ; so, if appropriate correlations are not performed, the calculation of tariff reductions as well as the rules of origin to be applied may be incorrect.

New Function 「HS Version Converter」: Even in a case the HS version is unknown, it enables converting to the latest version (HS2017)

Screen Images of HS Version Converter

① Enter an HS Code

Original HS Code: 3824.71

Original HS Version: ---

Convert to HS Version: ---

Country / Area: ---

* Select to look up the country/area's latest full HS code.

② Candidates for HS versions for the entered original HS code are displayed. Choose the most suitable one by confirming code descriptions

③ Highlights codes in the latest version (HS2017) which correlates to the original HS code from the selected HS version

* Enter directly if HS version of the original is known.

Original

HS2002

Tariff Classification	Code Description
38	Miscellaneous chemical products
3824	Prepared binders for foundry moulds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included.
3824.7	Mixtures containing perhalogenated derivatives of acyclic hydrocarbons containing two or more different halogens :
3824.71	-- Containing acyclic hydrocarbons perhalogenated only with fluorine and chlorine

HS2007

Tariff Classification	Code Description
38	Miscellaneous chemical products.
3824	Prepared binders for foundry moulds or cores; chemical products and preparations of the chemical or allied industries (including those consisting of mixtures of natural products), not elsewhere specified or included.

Conversion

Please select a HS version in the left pane.
