Preamble

The Excise Duty Bill was tabled in parliament on 11 June 2015 and passed by parliament on 27 August 2015. However the President declined to append his signature to give the National Treasury time to scrutinize the bill. Some of the amendments made to the bill by the legislators included: reduction of excise duty on motor vehicles and beer; removal of excise duty on motor cycles and juices; and change on imposition of excise duty on cigarettes based on a graduated scale on value. The President rejected the changes since this would adversely affect the revenues to be collected making it inconsistent with the approved fiscal framework and Division of Revenue Act. The Cabinet Secretary, National Treasury has targeted a collection of KES 28.44 billion through the increment of excise duty rates on various products such as motor vehicles, beer spirits, juices and cigarettes and introduction of excise duty on items such as motor cycles.

The bill was returned to Parliament via a Presidential memorandum which was subsequently passed on 28 October 2015. The Excise duty Act 2015 was then assented to by the President on 6 November 2015 and came into force on 1 December 2015 vide legal notice no 245 of 25 November 2015.

Introduction of a stand-alone Excise Duty Act

The measure

A new simple and modern stand-alone excise duty act has been introduced incorporating international best practices. The act has collated legal provisions from the Customs and Excise Act Cap 472 relating to excise duty into one legal document.

Who will be affected

Local manufacturers and importers of excisable goods, consumers in general.

Our view

Prior to the enactment of the EAC Customs Management (EAC CMA) in 2004, Kenya's Customs and Excise legislation were both covered by the Customs and Excise Act. After enactment of the EAC CMA, the customs legislation came under the purview of the EAC CMA and its regulations. The Customs and Excise Act was however not repealed as it still contained the excise legislation.

Introduction of a stand-alone Excise Duty Act will not only enable the Government to collate the excise legislation in one document separate from the repealed Customs and Excise Act, but also to modernise it and align it with international best practice.

Change of excise duty tax base to units of quantity only

The measure

The Excise Duty Act has introduced a new tax based on units of quantity (specific regime) on harmful goods so as to compensate for harmful effects caused by production, supply, consumption or use of goods whose costs are not directly reflected in their price.

Who will be affected

Local manufacturers, importers of excisable goods, consumers.

Our view

The charging of excise duty using a specific tax regime based on units of quantities is a move away from the previous taxation of goods which was either based on a specific regime only, an ad valorem regime only or on a hybrid regime where excise duty was charged based on both quantity and value whichever was higher. However, food supplements will continue to be charged at an ad valorem rate.

By using a specific regime, calculation of excise will be unaffected by value and this will minimize potential for excise valuation disputes. The rates will have to be adjusted annually to cater for inflation and it may ease administration since the determination of the tax base for *ad valorem* regimes can be complex. From this perspective it is a welcome move.

The Government has increased the excise duty rates on alcoholic drinks, motor vehicles, cigarettes and gas oils and introduced excise duty on motor cycles to raise more tax to fund the expansionary budget. As such, consumers may need to dig deeper into their pockets to finance consumption of such products.

Removal of Excise Duty

The measure

The Excise Duty Act has removed excise duty on goods that have no harmful effects that were excisable under the Fifth Schedule of the repealed Customs and Excise Act Cap 472. Examples of such goods include: cosmetics such as petroleum jelly, deodorants, body lotions, certain food preparations.

Who will be affected

Local manufacturers, importers and consumers.

Our view

This is a welcome move that will reduce the excise duty on products that are currently being taxed largely for revenue purposes and not because they cause any negative externalities. It is however noted that water has been included in the list of excisable products despite the fact that the Cabinet Secretary in his budget statement mentioned that bottled water will not be excisable. This is perhaps based on the view that bottled water is in a sense a luxury item and as such not consumed by the average man.

Hopefully the positive effects of the removal of excise duty will trickle down to the consumers by way of making these products cheaper.

Remission of excise duty on beer or wine

The measure

The new Excise Duty Act gives the Cabinet Secretary, National Treasury the powers to grant remission of excise duty wholly or partially on beer or wine manufactured from sorghum, millet, cassava or any other agricultural products excluding barley that is grown in Kenya. This will be done by notice in the Gazette which shall specify the products and conditions to be met for the remissions to be granted.

Who will be affected

Farmers of agricultural products (except barley), manufacturers, consumers.

Our view

The remission of excise duty on these agricultural products will encourage local beer manufacturers to manufacture beer using locally grown produce hence providing an incentive for farmers. Remission of beer made from sorghum, millet or cassava was first introduced in 2013 and has now been expanded to include other agricultural products excluding barley. Wine made from these crops will also enjoy remission. The availability of cheap beer and wine due to remission of excise duty will also help reduce the consumption of illicit brew through availability of affordable and good quality beer and wine.

Enhancement of excise duty on non-biodegradable plastics

The measure

In an effort to address the effects of environmental degradation, the new Excise Duty Act has enhanced the excise duty on non-bio degradable plastics shopping bags to Kshs 120 per kilogram.

Who will be affected

Importers and local manufacturers of non-biodegradable plastics.

Our view

The repealed Customs and Excise Act imposed excise duty on shopping plastic bags at the rate of 50% of their excisable value. The new Act has enhanced the excise rate to a specific rate of KShs. 120 per kilogram in line with the specific regime on goods. This will make non-biodegradable plastic bags more expensive thereby promoting environmental conservation. However this should be accompanied by sensitization on the importance of environmental conservation.

Arm's length valuation of goods and services

The measure

The new Excise Duty Act has introduced the arm's length concept and open market value in the valuation of goods and services. The Act defines open market value as the price that the goods/services would reasonably fetch in an arm's length transaction at the wholesale level.

Where the open market value cannot be determined, the Commissioner is empowered to determine the same based on generally accepted principles of valuation as an objective approximation of the price the goods/services would fetch in an arm's length transaction at the wholesale level.

Who will be affected

Manufacturers of excisable goods, suppliers of excisable services and consumers in general.

Time of supply of excisable services and imported goods

The measure

The Excise Duty Act introduces time of supply rules for both excisable services and goods. Time of supply of excisable services shall be the earlier of:

- Date on which services are performed;
- Date on which the invoice is issued; or
- Date on which payment is received.

For imported goods, the time of importation will continue to be when the goods are cleared for home use at the port or from a warehouse, removed from an export processing zone or in any other case at the time the goods are brought into Kenya.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services, consumers in general.

Our view

This provision introduces the arm's length concept of determining value, a concept that has been adopted in various provisions in the Act and aims to ensure that transactions are carried out independently and that relationships do not affect the value of excisable goods/services. However, where the Commissioner is given the power to determine the value of goods and services the issue of objectivity is questionable. Similar provisions are already prevalent in other revenue legislation.

Our view

These rules provide clarity especially with regard to excisable services as the tax point is now clear.

Imposition of Excise Duty

The measure

The Excise Duty Act provides that excise duty shall be charged on excisable goods manufactured in Kenya by a licensed manufacturer, excisable services and imported excisable goods. Excise duty shall be payable by the licenced manufacturer, licenced person making the supply or the importer of excisable goods.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services, consumers in general.

Our view

The Excise Duty Act has put together the items on which excise duty will be charged. These were previously provided in different sections. It provides clarity on who shall be responsible for payment of excise duty.

Timing of liability for excise duty

The measure

Liability for excise duty shall arise at the time of importation or removal of excisable goods from a licensed manufacturer's factory. Liability for excisable services shall arise at the time of supply of the service. The Excise Duty Act has also introduced a provision to require that excise duty shall arise where goods are consumed in a licensed manufacturer's factory since they will be treated as removed from the factory at the time of consumption.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services.

Our view

The Excise Duty Act has collated the various provisions relating to timing of liability for excise duty under one provision. In the repealed Customs & Excise Act there are different tax points for different locally manufactured excisable products. The Excise Duty Act now provides that all excisable goods that are locally manufactured will be accounted for at the time of removal from the factory. It also includes bringing to charge excisable goods consumed in the factory that are in some instances not accounted for since they did not leave the factory.

Goods and Services not liable to excise duty

The measure

Excise duty shall not be charged on the following:

- Exempt goods under the Second Schedule;
- Exported goods under customs control and exported services;
- Denatured spirits for use in the manufacture of gasohol or as a heating fuel;
- Excisable goods destroyed by the manufacturer with written approval by the Commissioner and supervision of an officer prior to removal from the factory;
- Excisable goods destroyed or lost by accident or other unavoidable cause except where compensation received for the loss includes the duty payable as a consequence of an insurance policy, indemnity or other agreement; a settlement; or a judicial decision.

The Section further provides that excisable services shall be considered exported from Kenya if the services are supplied from a place of business in Kenya for use or consumption outside Kenya.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services.

Variation of Rates of Excise Duty

The measure

The amount by which the excise rates can be varied has changed from 30% to 10% of the rate as specified in the First Schedule of the Excise Duty Act.

The Cabinet Secretary is not empowered to impose excise duty on any goods and services that are not excisable.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services, consumers in general.

Our view

The section on remission of excise duty has been removed and some of the provisions have been deleted. These include remission of goods delivered to NAAFI and AFCO.

A new provision has been introduced where excise duty shall be charged on goods destroyed or lost by accident if compensation received for the loss is inclusive of excise duty.

The Excise Duty Act now provides clarity by defining an exported excisable service.

Our view

This provision will guard against significant changes in excise duty rates and promote stability of the excise duty rates.

Adjustment for inflation

The measure

The Commissioner can adjust the specific rate of excise duty annually to take into account inflation in accordance with the formula:

$A \times B$

where :

A is the rate of excise duty on the day immediately before the adjustment day; and

B is the adjustment factor for the adjustment day calculated as one plus annual average rate of inflation of the preceding financial year

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services, consumers in general.

Ex-factory selling price of excisable goods

The measure

The definition of the ex-factory selling price has been amended to mean the price payable by a purchaser where the goods are sold by the manufacturer in an arm's length transaction and in any other case, the open market value of the goods at the time of removal from the manufacturer's factory.

Who will be affected

Manufacturers and importers of excisable goods, consumers in general.

Our view

The adjustment of excise duty rates has always been under the purview of the CS, National Treasury. The Excise Duty Act now allows the Commissioner to adjust the specific rates annually despite Section 8 which limits the CS from increasing the rate by 10%. It is not clear if this means that the rates can be varied by both offices in the same year.

The indexing of excise duty rates is a method used by several countries to ensure that the excise rates charged do not erode the public's purchasing power during periods of inflation. The specification of a formula to be used in adjusting for inflation will ensure that the indexation is done in a fair, predictable and consistent manner.

Our view

The repealed Customs & Excise Act previously defined the ex-factory selling price as the price at which goods are sold from a factory exclusive of VAT and excise duty.

This provision changes the definition to require that the ex-factory selling price for excise duty purposes be the arm's length value or open market value. This implies that the determination of an arm's length transaction is critical in arriving at the ex-factory selling price. It is possible that the KRA can challenge if a transaction is indeed at arm's length and revert to the open market value.

Excisable Value of excisable services

The measure

The excisable value of excisable services shall be:

- If the excisable services are supplied by a registered person in an arm's length transaction the fee, commission or charge payable for the service; or
- In any other case, the open market value of the services.

The excisable value for excisable services shall not include VAT and the excisable value for fees charged by financial institutions shall not include interest or an insurance premium.

The new Act defines other fees to include any fees, charges or commissions charged by licensed financial institutions, excluding interest on loan or return on loan or an insurance premium or premium based or related commissions..

Who will be affected

Suppliers of excisable services, business and consumers.

Our view

The provision has provided some clarity on what constitutes the excise value for services which incorporates the arm's length principle as the key factor in determining the value. In the absence of an arm's length transaction the open market value will apply. The arm's length transaction can be challenged by the tax authority and this therefore leaves a lot of room for disputes in valuation unless proper guidelines are issued.

The Excise Duty Act has lifted excise duty on insurance premiums and related commissions. The Association of Kenya Insurers (AKI) has been actively lobbying for removal of excise duty on premiums in the recent past. However, the Act does not indicate whether there will be retrospective application of this provision therefore excise should be accounted for on any premiums or related commissions that were incurred prior to 2 December 2015. In addition, interest has not been defined in the Excise Duty Act and this will definitely result in tax disputes between the Kenya Revenue Authority and the industry players.

In the recent past, there has been push and pull between the Kenya Revenue Authority (KRA) and the financial institutions in relation to what constitutes interest. Some of the contentious issues surrounding the issue includes, whether loan processing fees among other similar charges constitutes interest exempted from Excise Duty. Whereas the industry players have opted to rely on the definition of interest as contained in the Income Tax Act (ITA), the KRA has disputed this option.

Place of supply of excisable services

The measure

Supply of excisable services will be deemed to have been made in Kenya when the services have been supplied from a place of business of the supplier in Kenya.

Who will be affected

Suppliers of excisable services.

Licensing

The measure

The Act provides that persons carrying out the following activities should be licensed or registered by the Commissioner:

- the manufacture of excisable goods in Kenya;
- the importation into Kenya of excisable goods requiring an excise stamp;
- the supply of excisable services;
- the use of spirit to manufacture goods in Kenya that are not excisable goods; or
- the carrying out of any other activity in Kenya for which the Commissioner, by notice in the Gazette, may impose a requirement for a licence.

The Act sets out reasons upon which the Commissioner may refuse to grant a licence which include:

- where the applicant is convicted of an offence under the Act or the Tax Procedures Act ("TPA") or convicted under any other law with regard to dishonesty or fraud;
- where the applicant is declared bankrupt or under receivership;
- where the reasons listed apply to a person related to the applicant and the Commissioner is satisfied that the related person is reasonably expected to be involved in the conduct of the activity to which the applicant relates; and
- where the applicant has not kept proper records or failed to comply with obligations.

Who will be affected

Manufacturers and importers of excisable goods, supplier of excisable services, manufacturers who use spirit to manufacture non excisable goods.

Our view

This is a new provision that provides clarity on when excisable services will be subject to excise duty.

Our view

The repealed Customs & Excise Act empowered the Commissioner to refuse to grant a licence without assigning any reason. This was unfair and contrary to the laws of natural justice. The Act has rectified this by specifying the reasons upon which a licence can be denied.

It is interesting to note that the Act has gone further to not only assess the applicant but also persons related to the applicant who are likely to be involved in the activity for which a licence is sought.

Excise Control of excisable goods

The measure

Excisable goods stored in a factory of a licensed manufacturer shall be subject to excise control.

The Excise Duty Act provides that goods will be subject to excise control until they're removed from the manufacturer's factory, exported or destroyed in accordance with the Act. It further makes provisions for the obligations of licensed manufacturers and powers of the Commissioner with regard to goods under excise control.

A licensee who cannot account for any quantity of excisable goods to the satisfaction of the Commissioner will be deemed to have removed such goods from excise control and will be liable to a penalty equal to double the excise duty payable on those goods.

Who will be affected

Manufacturers of excisable goods.

Our view

The section introduces specific provision dealing with excise control on excisable goods and restates various provisions of the repealed Customs & Excise Act.

Penalties and Offences

The measure

The Excise Duty Act provides a penalty of double the excise duty payable on goods in the instances of manufacture of excisable goods or supply of excisable services without a licence, importation of excisable goods requiring excise stamps without a licence, manufacture of goods in premises that are not licensed for those goods and where the manufacturer cannot account for manufactured excisable goods.

A breach of other provisions set out in the Excise Duty Act such as manufacture of unlicensed goods in a factory, breach of obligations relating to goods under excise control, failure to notify the Commissioner of discrepancies between actual and recorded inventory of goods under excise control or of change in business particulars, failure to display excise licence, breach of any provisions relating to excise stamps will attract a fine not exceeding KES. 5 million, imprisonment to a term not exceeding 3 years or both.

Where an offence is committed, a court may impose a fine not exceeding the higher of:

- The maximum specified for the offence; or
- Three times the value of the excisable goods to which the offence relates.

Who will be affected

Manufacturers of excisable goods, suppliers of excisable services.

Our view

The penalties imposed under these sections are higher than previously imposed under the repealed Customs & Excise Act as the government is looking to discourage non-compliance.

It is interesting to note that one of the fines that the court may impose is three times the value of the excisable goods and not three times the value of the excise duty that would have been payable. This is likely to be very punitive.

Tax avoidance schemes

The measure

The Excise Duty Act provides that if the Commissioner is satisfied that a person entered into a scheme with the sole purpose of enabling the person obtain a tax benefit and a tax benefit is obtained, the Commissioner may within five years from the last day of the month when the liability arose, assess the tax liability as if the scheme had not been entered into.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services.

Application of the East African Community Customs Management Act

The measure

The Excise Duty Act provides that the provisions of the EAC CMA and any customs related rules made thereunder before or after the commencement of the Act shall apply on imported excisable goods liable to customs duties or not, as if all such goods were liable to duties of customs and as if those duties include excise duty.

Who will be affected

Importers of excisable goods.

Our view

This brings the excise legislation in line with the Income Tax and VAT legislation, although these sections have rarely been invoked. However, tax planning schemes will need to be carefully considered to ensure that they are commercially justifiable. The Tax Procedures Act 2015 imposes a penalty of twice the tax benefit.

Our view

The Excise Duty Act has introduced a provision on applicability of the EAC CMA and any related rules on excisable goods for consistency on imposition of custom duties on imported goods.

Regulations

The measure

The Cabinet Secretary is empowered to make any Regulations that will aid in:

- Prescribing any fee or charge to be levied on excisable goods imported into, or manufactured in Kenya; and
- Prescribing any matter required to be prescribed for the purposes of the Excise Duty Act.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services.

Repeals and transitional clauses

The measure

The transitional clauses provide for: repeal of the Customs & Excise Act; provisions with regard to assessments and collection of taxes; payment and refund of tax; and continuation of registration effected under the Customs & Excise Act etc.

Any tax arising under the repealed Customs & Excise Act due to be paid or refunded at the commencement of the Excise Duty Act, shall be paid or refunded as if it were tax due to be paid or refunded under the Excise Duty Act.

The Excise Duty Act further provides that the commencement of the Act shall not affect a penalty or punishment incurred in respect of an offence committed against the repealed Customs and Excise Act in force at the commencement of this Act.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services.

Our view

This will enable a smooth transition into the new Act pending publication of new Regulations and Rules.

Our view

This section provides for measures to enable a smooth transition from the Customs & Excise Act to the Excise Duty Act with minimal inconvenience to businesses.

The transitional clauses of the Excise duty Act provides that the provisions relating to Railway Development Levy (RDL), Import Declaration Fee (IDF) and Export duty currently covered under Miscellaneous Fees and Levies Bill (MFL) shall continue to apply until they are provided for in other legislations (enactment of the MFL Bill).

Exempt Excisable goods and services

The measure

The Excise Duty Act provides for exemption from payment of excise duty on the following excisable goods when purchased before clearance through Customs or removal from excise control:

- Bona fide ship stores.
- Goods imported or purchased by a diplomatic or consular mission.
- Goods imported or purchased by foreign government, international organisation or aid agency.
- Motor vehicles for use by persons with disability.
- Excisable goods including a motor vehicles imported by a returning resident or a person changing residence subject to certain conditions.
- Goods imported or purchased for official use by the Kenya Red Cross.
- Motor vehicle previously owned and used by a deceased person outside Kenya.
- Excisable goods imported by and in possession of a passenger subject to limitations under the fifth schedule (Part B Item 5) of the EAC CMA.

Excisable services that will be exempt from excise duty under the Excise Duty Act include:

- Services supplied in Kenya to a diplomatic or consular mission.
- Services supplied in Kenya to a foreign government, international organisation or aid agency.

Who will be affected

Manufacturers and importers of excisable goods, suppliers of excisable services to privileged organisations, privileged consumers in general.

Our view

The goods subject to exemption have been significantly reduced in line with the other national Acts where the Government aims to minimize exemption facilities that were previously granted.

Changes in Excise Duty Rates

The measure

Excise duty has been introduced on the following items:

- Condensates at KES. 6,225 per 1000l @ 20degC.
- Electronic cigarettes at KES 3000 per unit.
- Cartridges for use in electronic cigarettes at KES 2000 per unit.
- Motor vehicles of tariff heading 8704 at KES 200,000 for motor vehicles over 3 years old from the date of first registration and KES. 150,000 for motor vehicles between 0-3 years from the date of first of registration.
- Motor cycles of tariff 87.11 other than motor cycle ambulances at KES. 10,000 per unit.

The excise duty rate has been increased for the following items:

- Gas oil (automotive, light, amber for high speed engines) from KES 8,244 per 1000l @ 20degC to KES 10,305 per 1000l @ 20degC.
- Food supplements from 7% to 10%.

Who will be affected

Manufacturers, importers and consumers of excisable goods.

Our view

The Excise Duty Act has introduced excise duty on electronic cigarettes and their cartridges to raise revenue as these goods are deemed to be luxurious with inelastic demand.

Excise duty has also been introduced on motor vehicles of tariff heading 8704 used for goods transport and motor cycles of tariff heading 8711. This will negatively impact the goods transport sector due to increase in prices of motor vehicles such as pick-up trucks and a possible increase in transport costs. The boda boda business which is very popular among the low income earners in Kenya will also be negatively affected by the KES 10,000 excise duty.

The oil and gas industry will also be impacted by the introduction of excise duty on condensates and the increase of excise duty on gas oils for high speed engines.

The excise duty rate on food supplements has soared to 10% from 7% and this is expected to be passed on to consumers of the food supplements. The dietary supplements industry in Kenya has been making efforts to boost the demand of the expensive food supplements which are unpopular among the Kenyan population. These efforts may be thwarted by the increase in excise duty.

Excise Duty Rates

Goods Description	Old Rate (5th Schedule C&E Act)	New Rate (1st Schedule Excise Duty Act 2015)
Condensates	Nil	KES. 6,225 per 1000l @ 20degC
Motor Spirit (gasoline) regular	KES. 19,505 per 1000l @ 20degC	No change
Motor Spirit (gasoline) premium	KES 19,895 per 1000l @ 20degC	No change
Aviation Spirit	KES 19,895 per 1000l @ 20degC	No change
Spirit type Jet Fuel	KES 19,895 per 1000l @ 20degC	No change
Special boiling point spirit and white spirit	KES 8,500 per 1000l @ 20degC	No change
Other light oils and preparations	KES 8,500 per 1000l @ 20degC	No change
Partly refined (including topped crude) of HS code 2710.19.10	KES 1,450 per 1000l @ 20degC	No change
Kerosene type Jet Fuel	KES 5,755 per 1000l @ 20degC	No change
Other medium oils and preparations	KES 5,300 per 1000l @ 20degC	No change
Gas oil (automotive, light, amber for high speed engines)	KES 8,244 per 1000l @ 20degC	KES 10,305 per 1000l @ 20degC
Diesel oil (industrial heavy, black, for low speed marine and stationery engines)	KES 3,700 per 1000l @ 20degC	No change
Other gas oils	KES 6,300 per 1000l @ 20degC	No change
Residual fuel oils(marine, furnace and similar fuel oils) of a Kinematic viscosity of 125 centistokes	KES 600 per 1000l @ 20degC	KES 300 per 1000l @ 20degC

Goods Description	Old Rate (5th Schedule C&E Act)	New Rate (1st Schedule Excise Duty Act 2015)
Residual fuel oils (marine, furnace and similar fuel oils) of a Kinematic viscosity of 180 centistokes	KES 600 per 1000l @ 20degC	No change
Residual fuel oils (marine, furnace and similar fuel oils) of a Kinematic viscosity of 280 centistokes	KES 600 per 1000l @ 20degC	No change
Other residual fuels oils	KES 600 per 1000l @ 20degC	No change
Fruit juices (including grape must), and vegetable juices, unfermented and not containing added spirit whether or not containing added sugar or other sweetening matter.	7%	KES 10 per litre
Food supplements	7%	10%
Waters and other non-alcoholic beverages not including fruit or vegetable juices.	7%	KES 5 per litre
Beer, Cider, Perry, Mead, Opaque beer and mixtures of fermented beverages with nonalcoholic beverages and spirituous beverages of alcoholic strength not exceeding 10%	KShs. 70 per litre or 50% of the value whichever is higher	KES. 100 Per litre
Powdered beer	KShs. 70 per litre or 50% of the value whichever is higher	KES. 100 Per Kg.
Wines including fortified wines, and other alcoholic beverages obtained by fermentation	80 per litre or 50% of the value whichever is higher	KES. 150 Per litre
Spirits of undenatured ethyl alcohol; spirits liqueurs and other spirituous beverages of alcoholic strength exceeding 10%	120 per litre or 35% of the value whichever is higher	KES. 175 Per litre
Cigars, cheroots, cigarillos, containing tobacco or tobacco substitutes	130%	KES 1000 Per Kg.
Electronic cigarettes	Nil	KES 3000 Per unit
Cartridge for use in electronic cigarettes	Nil	KES 2000 Per unit
Cigarettes containing tobacco or tobacco Substitutes	130%	KES 2500 Per unit

Goods Description	Old Rate (5th Schedule C&E Act)	New Rate (1st Schedule Excise Duty Act 2015)
Other manufactured tobacco and manufactured tobacco substitutes; "homogenous" and "reconstituted tobacco"; tobacco extracts and essences.	130%	KES 7000 Per Kg.
Motor vehicles of tariff heading 87.02, 87.03.	20%	less than three years old from the date of first registration KES150,000 per unit
	20%	Over three years old from the date of first registration KES. 200,000 per unit
Motor vehicles of tariff heading 87.04	Nil	less than three years old from the date of first registration KES150,000 per unit
	Nil	Over three years old from the date of first registration KES. 200,000 per unit
Motor cycles of tariff 87.11 other than motor cycles ambulances	Nil	KES 10,000 Per unit
Plastic shopping bags	50%	KES 120 Per Kg.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see www.deloitte.com/about for a more detailed description of DTTL and its member firms.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte has in the region of 200,000 professionals, all committed to becoming the standard of excellence.
