Finance Diagnostics

Take your finance department to the next level.

Challenges you are facing

- Use of inaccurate information in the decision-making process
- Increased staffing costs
- Increased consultant and auditor costs
- Potential leakage of revenue
- Late filing of financial information to government bodies
- Reduced efficiency through duplication of controls
- Increased workload and risk of error through manual and duplicated controls
- Production of reports that are not compliant with the latest regulations or best practices

Finance diagnostics boost confidence in a financial organization’s people, processes, infrastructure and controls. Across each finance pillar, our finance diagnostics solution identifies gaps and potential strategic opportunities.

By assessing your financial processes, we present new perspectives to enhance your closing process, improve your use of resources, and increase the quality of your deliverables—helping transform your finance department into a key asset of your strategy.

Our approach

1. Assessment of current status
   interviews with key personnel
2. Definition of future status
   workshops with an integrated team of technology and accounting experts
3. Gap analysis report with practical recommendations
4. Implementation support
   hands-on assistance by a qualified team
5. Monitoring checks to confirm the successful implementation of desired results

Benefits for you

- More timely and accurate information provided to stakeholders
- More time for staff to focus on value-adding tasks
- Improved compliance with reporting requirements
- Efficient use of resources
- Smoother closing process
- Efficient integration of accounting and technology
- Reduced auditor costs (no overruns)

Together, let us rethink your finance processes and bring your finance department to the next level!
