

## Business Digital Hub

*Deloitte's global platform for world-class finance outsourcing*

In response to continued change in the regulatory, technology and tax landscapes, many companies are re-considering the appropriate mix of in-house and external resources for managing their accounting and tax compliance operational processes.

### What is Business Digital Hub?

Business Digital Hub (BDH) is an easy-to-use, cloud-based, global enterprise solution developed to help companies manage their accounting and statutory obligations.

Viable and affordable solution for key corporate and functional processes, including bookkeeping, finance reporting, budgeting, accounts payable/receivable, treasury, finance function support, consolidations and fixed assets management.

Flexible solution which allows companies to share some or all of the processes in the ERP with Deloitte teams through an outsourcing/co-sourcing arrangement. Through BDH's collaborative platform entities can select the appropriate mix of in-house and external resources for managing more efficiently the essential finance operational processes with visibility, flexibility, transparency, and control.

Provides companies with real-time application access, data management and global tracking.
