

## ONESOURCE Global Trade For Free Trade Agreements

Deloitte and Thomson Reuters combine the expertise of a strong consultant, plus the reliability of a proven technology solution, to offer a comprehensive full fledged and turn-key projects to optimize the organization's supply chain creating value and competitive advantages.

### Value proposition

Global complex supply chain managements face additional challenges derived from the wide range number of FTAs. ONESOURCE Global Trade for FTAs is the most powerful technological tool in the market, truly localized for the Latin American environments, that helps organization by automating the original legibility process reducing risks in compliance with FDA guidelines, eliminating manual work, up-to-date content with on-hand, real-time accessibility.

**ONESOURCE Global Trade for FTA is used by some of the world's largest multinational firms and has proven to be an invaluable tool when dealing with customs audits that threaten elimination of FTA benefits or penalties.**

### Across the globe, ONESOURCE Global Trade for FTA equips companies with: A competitive advantage to expand the global market

The accurate application of FTAs allows companies to attain a competitive advantage and maximize profit from cost reduction through reduced customs duties. ONESOURCE Global Trade for FTA can manage any existing or future free trade agreements. FTA savings, utilization rates and other analytics are easily tracked through 

user-defined dashboards. Automated alerts and notifications to suppliers simply certificate management. With ONESOURCE FTA's standardized ERP interface, automating your FTA compliance workflow is faster and easier.

### Thorough preparation for customs authority verification

The number of foreign and domestic customs authority verifications is increasing, requiring meticulous review on the origin compliance process to avoid any unexpected penalty. The solution's automated collection of correct and compliant data for adjusted value calculation and bills of material for the value of materials eliminates risk that may be experienced through manual processes today.

### More efficient and effective FTA-origin management

This results in improved FTA origin-related work processes via automated data extraction, systematic origin calculation and sound supplier management. ONESOURCE Global Trade for FTA allows you to manage FTA certification by automatically reminding vendors of expiring or missing certification documents and providing a supplier portal for online document management.
