Deloitte Academy

# The Deloitte Academy

Constant change is the new norm for businesses today and there is little reason to expect the evolving landscape to let up anytime soon. In this ever developing environment, one has to be ready to act on a moment's notice. This requires an ability to make smarter and more informed decisions, which is exactly how the Deloitte Academy can help to add value to you and your organisation. The Deloitte Academy has been established to help board of directors and executives from various organisations and industries stay on top of market trends and best practices and thus, stay well ahead of the competition.

The Academy hosts learning events, conferences, workshops and programmes to ensure continuous development of your human capital. We have designed a comprehensive range of high quality professional programmes aimed to enhance your professional, technical and business skills and to cater and support your development.

### Finance Related Courses

From the finance perspective, the Academy specialises in providing training in Malaysian Financial Reporting Standards (MFRS), Malaysian Private Entities Reporting Standard (MPERS), business processes, financial valuations and International Standards on Auditing (ISA). Our courses are designed to provide the opportunity to expand the knowledge base of board of directors and executives, to put them in a position to deliver high performance and implement efficient processes. We design our courses knowing that every training intervention should justify its cost and we do this by ensuring that proper knowledge transfer to delegates is performed by the end of the training session.

### Regulatory Related Courses

Regulatory related courses focuses on training programmes in law and regulatory matters. It is important to know the ins and outs of any new law and regulations, on top of existing rules set by the national regulatory agencies. These courses will help directors, company secretaries, entrepreneurs and employees expand their knowledge base and familiarise themselves with law and regulatory requirements for compliance purposes.
