

D-rive GO

Driving assessment app for telematics services

D-rive GO is a mobile app using telematics services for motor insurance that analyses driving data gathered by smartphone's GPS and accelerometer, and evaluates the safety of your driving.

It also helps you drive safer by notifying you of your driving behaviour and the danger hotspots in the area you are moving in.

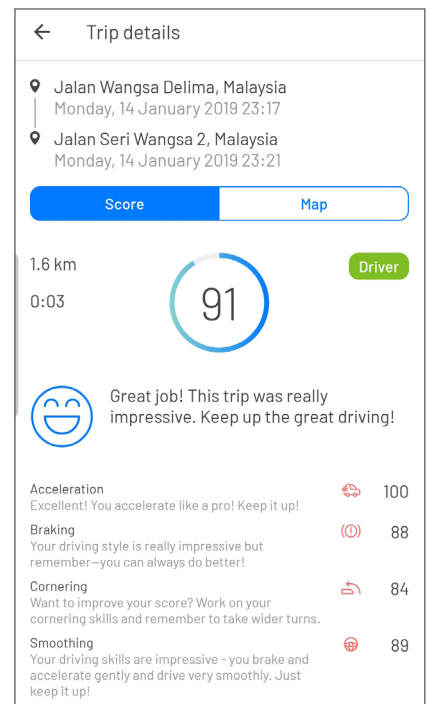

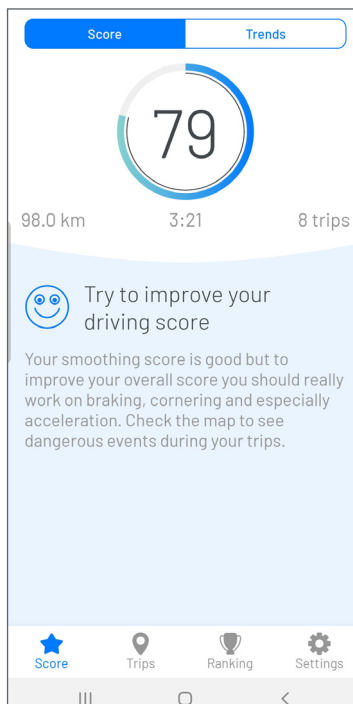

D-rive GO collects and analyses driving data to evaluate driving safety

D-rive GO is an app which takes driving data gathered by your smartphone's GPS, accelerometer, and other functions, analyses it in the cloud, and displays a driving safety score reflecting the characteristics of your driving on your smartphone.

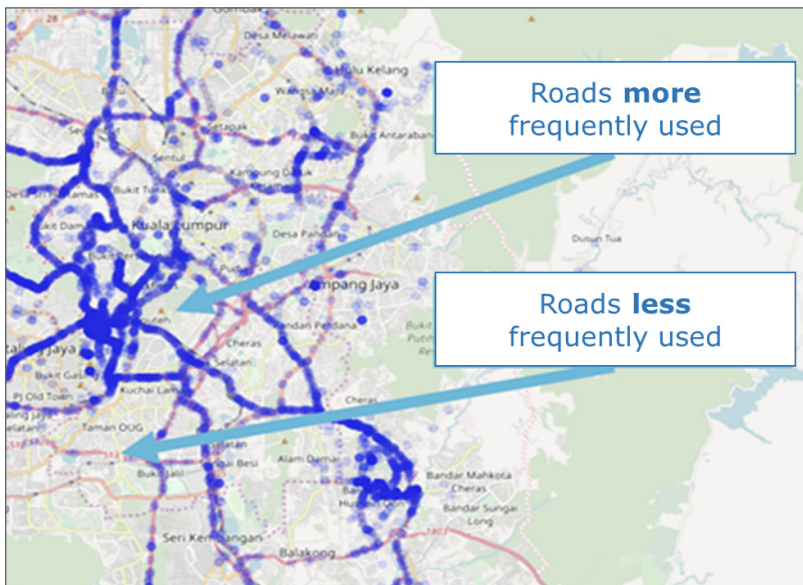

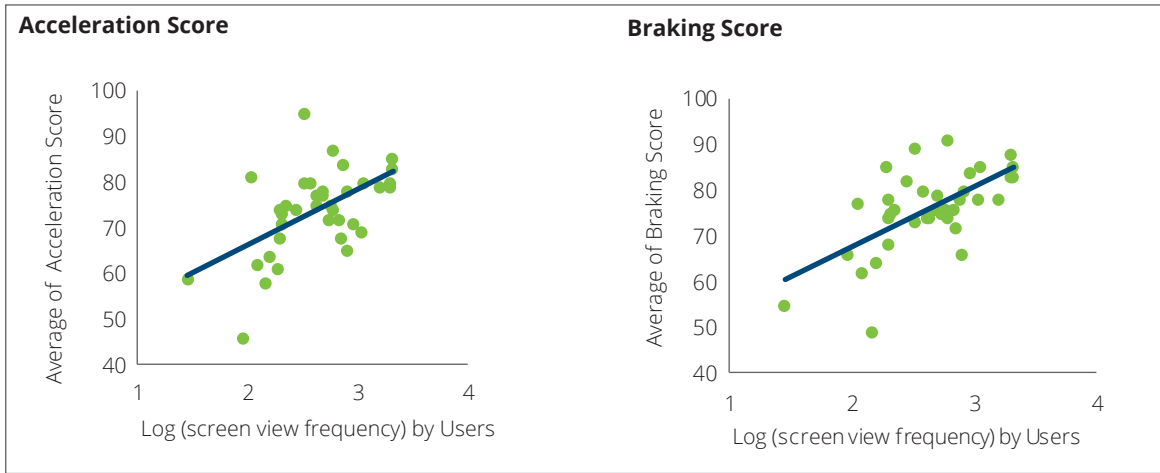

Driving assessment report

Every time you drive, data from your smartphone is analysed to assign a driving score based on the four categories: steering, braking, speeding, and acceleration.

D-rive GO's application dashboard

D-rive GO helps users monitor and potentially improve their driving score and behaviour

D-rive GO detects roads frequently used by drivers, with details on the roads with sudden acceleration and braking occurs. The insights help insurers to detect possible accidents and near miss events.
