Enhance your business performance and efficiency
Business Process Solutions (BPS)
New challenges, new opportunities

Businesses today are facing a rapidly-evolving landscape from regulatory changes, continued advances in technology, and the adoption of more sophisticated approaches by revenue authorities. As a result, businesses need confidence that they have the appropriate mix of in-house and external resources to manage essential operational processes efficiently with visibility, flexibility, transparency, and control.

With a focus on quality, skills, and geographical coverage, progressive businesses are evaluating the way their work is resourced and assessing alternative operating models. Deloitte’s Business Process Solutions (BPS) and Tax practices help businesses manage their accounting, tax, payroll, and technology processes by using experienced professionals who can provide advice and practical support through a mix of outsourcing, contract personnel, co-sourcing, and project-related services.
How we help

As a global business partner, Deloitte can bring:

- Security: strong understanding of your regulatory requirements in multiple jurisdictions
- Data protection: ability to adapt to and comply with robust data security requirements
- Compliance expertise: global compliance expertise to match your geographic reach across tax and payroll. Our network of payroll compliance specialists bring expertise to a business critical compliance cycle
- Project management: strong project management skills ensuring streamlined and standard interchange of information between the outsourcing team and your teams
- Capability and capacity: ability to mobilize teams from the start, being proactive with market-leading capabilities and experience
- Technology enabled: well-established and adaptable information technology for coordination and knowledge management
- Flexibility: we can upscale or downsize to match your investment in new countries and exit from others

Why Deloitte?

Our global network matches yours:

Deloitte's global network gives you access to the right skills wherever you need them. Our specialists have hands-on experience in all established ERP systems, have a large pool of know-how, international connection and networks, and specialize in your industry.

Business process technology

Using technology efficiently can help provide an integrated approach to process improvement that can help finance and accounting, tax, and HR departments substantiate and promote their strategic value to the organization. Deloitte practitioners work with businesses to design and implement operational processes, technologies, and resource models to improve value-added activities in process redesign, software implementation and enhancement, tax-sensitized technologies, and change management. In addition, cloud-based accounting system and Software as a Service (SaaS) capabilities help internationally minded businesses to strategically balance expansion, infrastructure, and mobility demands.

Our services can include:

**ERP system design and implementation**

Identifying specific workflows by job and function, process improvements to be implemented (perhaps even independently of the software), and roles and responsibilities within the new business processes to augment system design. While business processes requirements were likely defined during the evaluation phase, they might not take into account the functionality of the chosen software. This output can serve as the foundation to use the ERP system in producing key operational data to streamline processes.

**Process mapping**

Assisting organizations in becoming more efficient through creation of business process maps which help identify improvement opportunities. Business process mapping measures and compares a specific objective alongside the entire organization's goals to aid alignment with enterprise values and capabilities.

**Business intelligence & data analytics**

Managing data from disparate sources and converting it into consistent, actionable information that can drive competitive advantage and help functional areas to uniformly interact with each other when responding to organizational issues and opportunities. Enabling organizations to perform visual operational benchmarking, trend and data analysis, and predictive analysis on key data. This can provide deeper insight into operational processes and profiles which help in planning and forecasting as well as evaluating leading practices.

**Business process reengineering**

Focusing on the analysis and design of workflows and business processes, business process reengineering helps organizations to fundamentally rethink how they do their work in order to improve products and services, manage operational costs, and enhance efficiencies. Deloitte helps companies restructure operations through ground-up design of business processes in relation to objectives and day-to-day work.

**Robotic Process Automation (RPA)**

Design, selection and implementation of software to manage information and automate the lower-value tasks, such as transaction processing and controls testing. As the repetitive tasks are automated, it increases the speed of delivery, eliminates errors, and reduces costs of data and compliance management. Further RPA implementations improve the availability of real-time information, facilitates management decisions, and increases the confidence in the company's compliance position. RPA handles controls efficiently and establishes a rule-based platform for compliance regulations and standards.

**Back-end filling (tech functions)**

Providing ad-hoc finance and accounting, technology, and/or HR support to strengthen existing infrastructures, foster ownership and accountability, and coordinate services and program administration.

**Operational finance relocation**

Facilitating functional transition of finance operations to new locations including configuring and temporarily staffing of facilities, planning and executing infrastructure upgrades, documenting new processes and workflows, and training in-house personnel.

**Program office**

Linking organizational initiatives to broader strategic goals, as a standalone service or embedded in multi workstream project engagements, including resource mapping to forecast resource constraints, ongoing progress tracking and reporting, coordinating sequential status meetings, and assessing related issues, risks, and escalation protocols.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited (“DTTL”), its global network of member firms, and their related entities. DTTL (also referred to as “Deloitte Global”) and each of its member firms are legally separate and independent entities. DTTL does not provide services to clients. Please see www.deloitte.com/about to learn more.

Deloitte is a leading global provider of audit and assurance, consulting, financial advisory, risk advisory, tax and related services. Our network of member firms in more than 150 countries and territories serves four out of five Fortune Global 500® companies. Learn how Deloitte's approximately 264,000 people make an impact that matters at www.deloitte.com.

This communication contains general information only, and none of Deloitte Touche Tohmatsu Limited, its member firms or their related entities (collectively, the “Deloitte network”) is, by means of this communication, rendering professional advice or services. Before making any decision or taking any action that may affect your finances or your business, you should consult a qualified professional adviser. No entity in the Deloitte network shall be responsible for any loss whatsoever sustained by any person who relies on this communication.
