

Finance in a Digital World™ Lab Series

A foundation for your digital journey

Our experiential lab series immerses Finance leaders on a journey focused around the implications of digital for work, the workforce, and workplace.

THE FUTURE OF FINANCE

WORK

What the role of Finance is, how work is managed, and how Finance is structured

WORKFORCE

Who will do the work, what skills will be needed, and how Finance will access/develop them

WORKPLACE

Where people in Finance work, how they will collaborate, and the leadership required

SCOPE

- The role of finance, including services delivered, ownership and accountability
- How work will get done differently (humans & machines)
- Value-add opportunities – things Finance doesn't do today
- The future Operating model

- Who does what – and how do they do it
- The skills needed in future
- How to access and develop those skills, via new talent models and internal skill development

- Where people will be physically located
- How to foster collaboration
- How to enable a digital culture and leadership that 'walks the talk'

KEY QUESTIONS

- What opportunities exist to accept, preserve, optimize & automate Finance processes?
- What digital capabilities should Finance have?
- How can Finance leverage freed capacity to add new value?
- How should the operating model change?

- What skills will the Finance workforce need in the future?
- How can we leverage alternative talent models?
- How will we develop the skills needed in Finance?

- What does the future physical workplace look like? Who will work where?
- How will we foster a collaborative culture that both enables transformation and is strengthened by digital?
- What do leaders need to do differently in a digital world?

INHERENTLY CONNECTED AND MUTUALLY REINFORCING

The FDW Lab Series Experience

Reimagine Finance

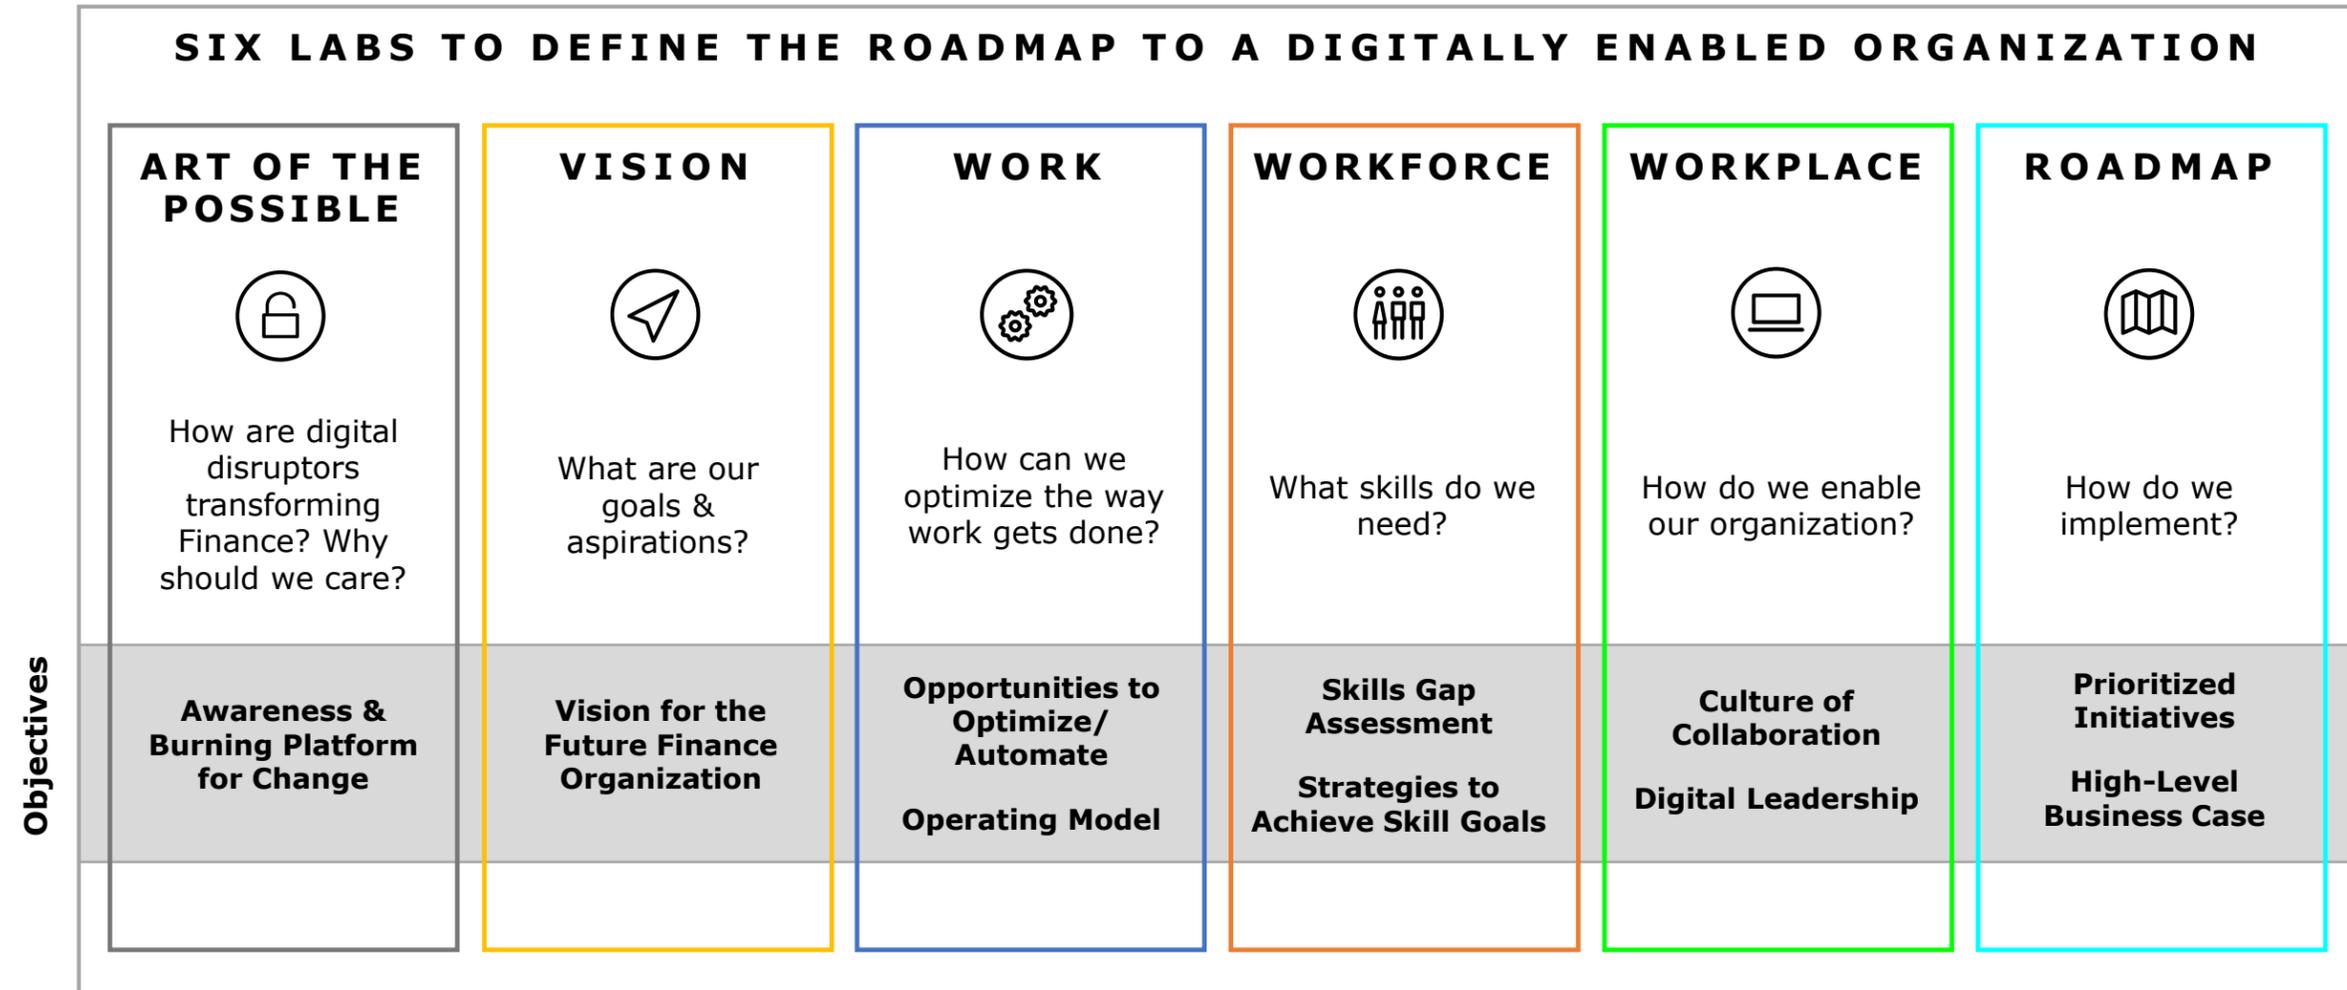

- Examine the opportunities for digital to transform the Finance organization
- Prioritize opportunities for digital transformation in Finance
- Identify and solve for the challenges of enabling digital through Talent, Digital Leadership, and Technology

More than a series of meetings

- Applicable across all major Finance competencies
- Highly interactive journey from the art of the possible to an executable roadmap
- Tailored exercises and focused discussions aligned to digital maturity and aspirations

The complete lab journey

Using the Work, Workforce and Workplace framework the FDW Lab Series provides the core building blocks to serve as a launching point for the Finance organization's digital journey.

Key Outcomes:

- Aspirations & Vision Statements for Finance
- Benchmarking across digital capabilities
- Desired capabilities across Finance
- Opportunities to optimize and automate finance activities
- Target operating model considerations
- Defined strategies to build skills of tomorrow
- Identification of key enablers across the physical workplace, leadership, and culture
- Roadmap to a digitally enabled organization

The result?
A roadmap for a total digital transformation of the finance function.
