

DocQMiner by Deloitte.

The **cost effective**, **quality focused** and **faster** way to retrieve data points from unstructured documents.

Dealing with thousands of (inbound) documents in various formats and languages is no easy task. Gathering, reviewing and getting data from these documents is often hugely repetitive and time consuming .

By augmenting people with the latest artificial intelligence and machine learning technology DocQMiner **reduces manual effort by 50-70%**

DocQMiner is a cloud-based platform **designed to scale** and deal with many documents, with high complexity, across geographies and teams.

Current use-cases support business issues such as IFRS 16 compliance, digitization of procurement contracts and digitization of real-estate rental contracts.

Cost effective

Experts spend time on value added tasks instead of manual browsing and searching. Organize your workforce in any location and maximize their performance.

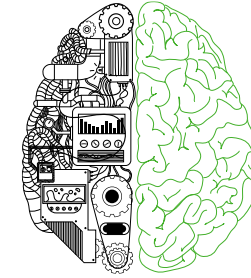

Quality Focused

High quality data you and auditors can trust with complete reviewing capability, audit trail and overview of data source and origin.

Faster

Optimized interface and workflow to make every second count. Scale your workforce to any size to meet deadlines. Available today!
