

# Elevating the Human Experience in Health

## THE VIRTUAL CARE PLATFORM

As healthcare becomes person-centric, consumers demand to be actively involved in their care and become part of the care team, to become part of the experience.

This requires (existing) technologies to present customer experience solutions that allow patients remote access and monitoring and transform the industry from 'sickcare' to 'healthcare'.

## THE SOLUTION

The Virtual Care Platform enables your health organization to provide care across the health ecosystem by supplying a 360 degree view of your patients, engaging healthcare professionals in a user-friendly connected experience and empower patients via communities.

Increased engagement, collaboration and participation of all involved parties will result in integrated care, accessible any time any where.

Together with international technology partner Salesforce we realize the Virtual Care Platform. The Salesforce platform is open to integrate with other systems and collaborate with other healthcare organizations. Data can be retrieved and send back to other systems.

## HOW DO WE WORK?

### OUR PROJECT

We organize our projects based on the Hybrid-Agile methodology where, together with the client, we are able to deliver fast and flexibly.

### OUR ROLE

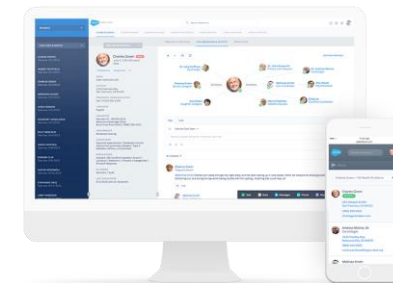

We are your go-to implementation partner for realizing the Virtual Care Platform within your organization. We tailor the technology to fit with your business processes and guide you through the implementation.

### OUR COMMITMENT

By leveraging our deep health industry knowledge and the hybrid-agile way of working, together we can deliver the Virtual Care Platform MVP within 8-12 weeks.
