

Are you in control of VAT?

What are the VAT risks and opportunities for my company?

VAT can be an opportunity, but also a risk.

To find out what these opportunities and risks are, it is important to have a good understanding of your VAT position and how the VAT procedures are structured.

How do you get a good insight in your VAT position?

Deloitte visualizes your opportunities via the VAT Scan

Deloitte has developed a tool that helps companies to take control of VAT. With this tool the VAT position of your company and the VAT procedures will be visualized in an efficient way. For every opportunity and risk the VAT Scan indicates the impact of the opportunity and risk for your business. The report resulting from the VAT Scan indicates the items that need attention. Furthermore, it includes specific recommendations and enables your company a focused plan of action to:

- Make the most of the VAT opportunities;
- Mitigate the VAT risks with the greatest impact;
- Improve the VAT procedures where necessary.

Based on our experience and specialization, we know what questions we have to ask. The VAT Scan ensures that you feel comfortable again for VAT.

VAT Scan, how does it work?

- Log in with a your unique username and password;
- You answer a few questions that are specific for your business;
- You receive a report after completion of the VAT Scan which outlines the chances and risks of your company and provides specific recommendations;
- You discuss the report with a VAT specialist at Deloitte.

The VAT Scan is an online tool on which you can login anytime and anywhere in a secure environment. Your company information will always be kept confidential.

The VAT Scan includes a meeting with a VAT specialist. Depending on the results of the VAT Scan, we will determine with you if follow-up action is required.
