Deloitte.

CBAM Compliance Manager

Solution is based on Deloitte's **TrackonTrade** software and connects customs data with (auto-solicitated) CBAM data enriched by relevant content resulting in a compliant CBAM report.

- Facilitates both manual data entry or interfacing
- Automated data collection (solicitation) and allocation model
- Centralized input of emission data by suppliers / users
- Automatic emissions calculation based on input data or default (fallback) values in system
- Workflow management (supplier data)
- Automated quarterly CBAM report preparation
- Maintained with the latest legislation by Deloitte
- Certificate monitoring and real-time dashboarding (future functionality)

CBAM Compliance Manager can be used as a stand- alone solution or as part of the implementation of our customs management solution **TrackonTrade**

The CBAM Compliance Manager is a digital solution that enables **EU importers to automate their CBAM reporting** obligations.

Additionally, the **Exporter portal facilitates data sharing with EU importers** by providing pre-defined, legally relevant supplier data at the product level for non-EU suppliers, thereby enabling compliance with EU CBAM reporting obligations.

Value of the CBAM Compliance Manager to customer's organization:

- **Lower compliance costs** due to automation of sharing, obtaining and allocation of data and compiling the CBAM report
- **Improved compliance** due to fully up-to-date CBAM reporting requirements

Value of CBAM Reporting Manager to the business

- **Commercial advantage** of readily available CBAM data
- **Reduced risk** of incorrect emissions reported, and audits by authorities
- **Enhanced customer service** through the provision of relevant CBAM data via the exporter portal
