Deloitte New Zealand

NZ IFRS and NZ IFRS (RDR) Model Financial Statements

Welcome to the model financial statements of NZ IFRS RDR Holdings Limited Group for the year ended 31 December 2013. NZ IFRS RDR Holdings Limited is a fictional for-profit New Zealand company.

Keeping up to date with the various presentation and disclosure requirements of the New Zealand equivalents to International Financial Reporting Standards ('NZ IFRS') continues to be an ongoing challenge. With this in mind, these model financial statements have been designed by Deloitte to assist clients, partners and staff with the preparation of annual financial statements. They have been prepared as an illustrative example of general purpose financial statements of a Group in accordance with the Financial Reporting Act 1993, the Companies Act 1993 and Standards and Interpretations approved by the External Reporting Board ('XRB') for application for periods ending on or after 31 December 2013.

These model financial statements can be used by tier 1 and tier 2 for-profit entities to identify the required NZ IFRS and NZ IFRS (RDR) disclosures in Group financial statements for a December 2013 balance date. These model financial statements do not demonstrate the disclosures required when moving from tier 3 to tier 2 (or tier 1), and they also do not provide guidance for public benefit entities (public sector or not for profit). Before using these model financial statements we encourage you to carefully consider the following information:

Using these model financial statements

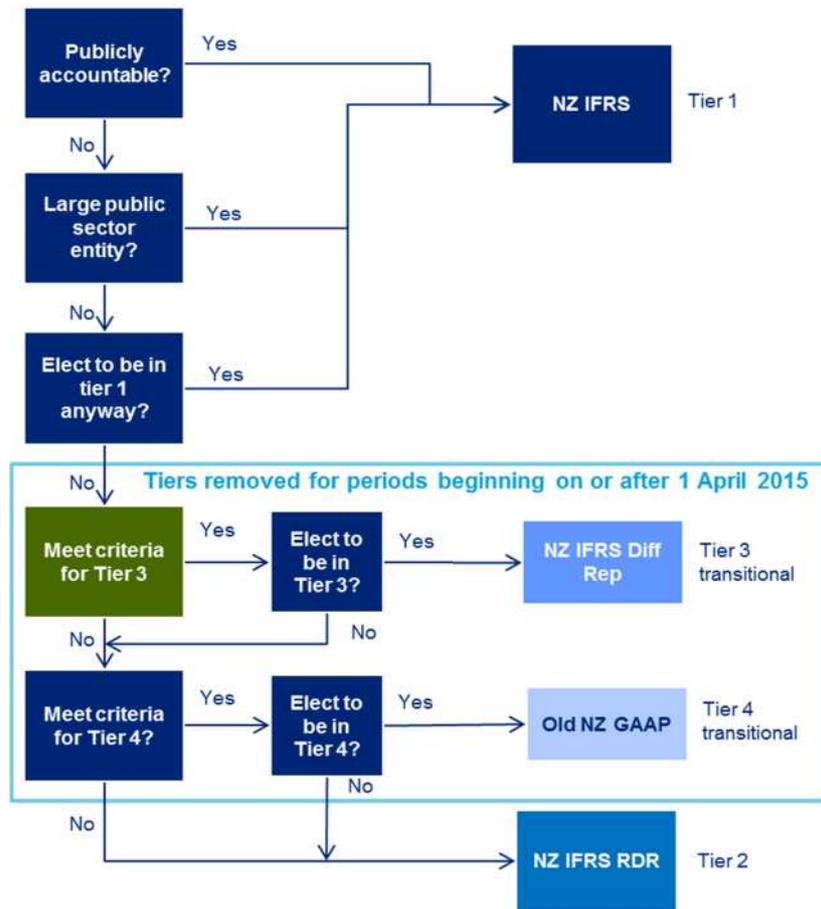

These model financial statements are not designed to meet the specific needs of specialised industries. Rather, they are intended to meet the needs of the vast majority of entities in complying with the annual reporting requirements of the New Zealand Companies Act 1993, Financial Reporting Act 1993 and Standards and Interpretations approved by the XRB as at 30 September 2014. Enquiries regarding specialised industries (e.g. life insurance companies, financial institutions, agriculture, etc.) should be directed to an industry specialist in your nearest Deloitte office. We see this publication as an illustration and strongly encourage preparers of financial statements to ensure that disclosures made are relevant, practical and useful.

Current accounting practices and applicable changes in financial reporting standards have been incorporated into these model financial statements at the time of publication. Due to the continually evolving nature of accounting practices it is important that the preparer of the annual report maintains an awareness of financial reporting developments and how these impact on the preparer's annual report.

Other useful tools and publications to assist in meeting the International Financial Reporting Standards ('IFRS') challenge can be found on Deloitte's New Zealand website www.deloitte.co.nz and Deloitte's global IFRS website www.iasplus.com which contains checklists and other useful IFRS publications.

What reporting tier applies?

Before using these model financial statements, preparers should determine which reporting tier the reporting entity falls into. The following flow chart and guidance may be used to determine a reporting entity's tier, and therefore which accounting standards to apply:

Guidance Notes

Public accountability

An entity has public accountability if:

- its debt or equity instruments are traded (or about to be traded) in a public market, or
- it holds assets in a fiduciary capacity for a broad group of outsiders as one of its primary businesses (e.g. banks, credit unions, insurance providers, securities brokers/dealers, mutual funds and investment banks), or
- it is deemed to be publicly accountable in New Zealand. Includes issuers, registered banks, deposit takers, registered superannuation schemes. With effect from 1 April 2014, the definition of “deemed to be publicly accountable” has changed. An entity would be deemed to be publicly accountable in the New Zealand context if:
 - it is a FMC reporting entity or class of FMC reporting entities that is considered to have a higher level of public accountability than other FMC reporting entities under section 461K of the Financial Markets Conduct Act (FMCA) 2013, or
 - it is an entity or class of entities that is considered to have a higher level of public accountability by a notice issued by the Financial Markets Authority (FMA) under section 461L(1(a) of the FMCA 2013.

Large public sector entity

- For-profit entities that are public entities as defined in the Public Audit Act 2001.
- Considered large if total expenses are over \$30m, as recognised in accordance with NZ IFRS in profit or loss. This excludes items of other comprehensive income but includes income tax. Where items are allowed to be offset the net expense is included. Where the reporting entity is a group, total expenses is applied to the group including the parent and all of its subsidiaries/controlled entities.

Elects to be in Tier 1

Any entity can elect to be in Tier 1.

[Transitional Tier] Criteria for Tier 3

- Not publicly accountable, AND
- At the end of the reporting period, all owners are members of the governing body, OR
- The entity is not large (any two in excess of \$20m income, \$10m assets, 50 employees).
- Note: if an entity’s parent or ultimate controlling entity has the coercive power to tax, rate or levy, the entity may qualify only if they are not publicly accountable and not large.

[Transitional Tier] Criteria for Tier 4

- Was applying Old GAAP at 30 June 2011, or established on or after 1 July 2011,
- Not publicly accountable,
- Not required by section 19 of the Financial Reporting Act 1993 to file financial statements, and
- Not large (any two in excess of \$20m revenue, \$10m assets, 50 employees).

New Zealand International Financial Reporting Standards - Tier 1 entities

This model provides an illustrative example of annual financial statements prepared under full NZ IFRS by a for-profit tier 1 reporting entity for the reporting period ending 31 December 2013 (incorporating applicable and relevant NZ IFRS approved as at 30 September 2014). It also contains additional disclosures that are considered to be best practice, particularly where such disclosures are included in illustrative examples provided within a specific Standard.

NZ IFRS RDR Holdings Limited is assumed to have presented financial statements in accordance with NZ IFRS for a number of years. Therefore, this is not a first time adopter of NZ IFRS. Readers should refer to NZ IFRS 1 *First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards* for specific requirements regarding an entity's first NZ IFRS financial statements, and to the IFRS 1 section of Deloitte's Presentation and Disclosure Checklist for details of the particular disclosure requirements applicable for first-time adopters.

NZ IFRS Reduced Disclosure Regime (NZ IFRS (RDR)) – Tier 2 entities

These model financial statements can also be used as an illustrative example of annual financial statements prepared under NZ IFRS (RDR) by a for-profit tier 2 reporting entity, for the reporting period ending 31 December 2013. The Reduced Disclosure Regime provides exemptions from certain disclosures of full NZ IFRS. **These exemptions have been shaded grey throughout the model financial statements.** In some cases NZ IFRS RDR provides only a partial disclosure concession, or requires specific additional disclosures.

Additional guidance specific to tier 2 entities has been included in these model financial statements and is underlined in the commentary boxes. This additional guidance should be carefully assessed to ensure any partial disclosure concessions are accurately applied and additional disclosures are made where necessary.

XRB A1 provides guidance on entities moving between reporting tiers:

- For entities moving from full NZ IFRS (tier 1) to NZ IFRS (RDR) (tier 2) there are no recognition and measurement accounting policy changes. The key impact is reduced disclosure, which is demonstrated by the shaded content in these model financial statements. Entities can also use our cut-down NZ IFRS (RDR) model financial statements to see only the content actually required by NZ IFRS (RDR) (i.e. it does not include the shaded content of these model financial statements).
- For entities moving from the Framework for Differential Reporting (tier 3) to NZ IFRS (RDR) (tier 2) there may be recognition and measurement accounting policy changes, along with changes in disclosure. For periods beginning:
 - before 1 April 2014, these entities will account for the change in accounting policies in accordance with NZ IFRS 1 *First-time Adoption of New Zealand Equivalents to International Financial Reporting Standards* and certain requirements in NZ IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors* (to the extent that those requirements do not conflict with NZ IFRS 1).
 - on or after 1 April 2014, these entities will account for the change in accordance with NZ IFRS 1.

Under NZ IFRS 1 entities have a number of measurement exemptions on transition to NZ IFRS (RDR), such as use of deemed cost. Entities should carefully review the requirements and concessions of NZ IFRS 1. NZ IFRS 1 also imposes additional disclosures of the impact of changes. These are not demonstrated in these model financial statements.

- For entities moving from old NZ GAAP (tier 4) to NZ IFRS (RDR) (tier 2) there may also be recognition and measurement accounting policy changes, along with changes in disclosure. These entities will account for the change in accordance with NZ IFRS 1, and should also carefully review the new requirements, concessions, and additional disclosures.

What's new?

In these 2013 model financial statements, we have illustrated a number of recent changes in financial reporting, effective for the first time for a December 2013 balance date, including:

- XRB A1 *Accounting Standards Framework (For-Profit Entities Update)*;
- a package of five new and revised Standards on consolidation, joint arrangements, associates and disclosures, comprising:
 - NZ IFRS 10 *Consolidated Financial Statements*;
 - NZ IFRS 11 *Joint Arrangements*;
 - NZ IFRS 12 *Disclosure of Interests in Other Entities*;
 - NZ IAS 27 *Separate Financial Statements* (as revised in 2011);
 - NZ IAS 28 *Investments in Associates and Joint Ventures* (as revised in 2011); and
 - Amendments to NZ IFRS 10, NZ IFRS 11 and NZ IFRS 12 *Consolidated Financial Statements, Joint Arrangements and Disclosure of Interests in Other Entities: Transition Guidance*;
- NZ IFRS 13 *Fair Value Measurement*;

Deloitte NZ IFRS and NZ IFRS (RDR) model financial statements 2013

- NZ IAS 19 *Employee Benefits* (as revised in 2011);
- Amendments to NZ IFRS 7 *Disclosures—Offsetting Financial Assets and Financial Liabilities*;
- Amendments to NZ IAS 1 *Presentation of Items of Other Comprehensive Income* (effective for accounting periods that begin on or after 1 July 2012); and
- *Annual Improvements to NZ IFRSs 2009 - 2011 Cycle*.

Extensive disclosures are required by some of the above new and revised NZ IFRSs (e.g. NZ IFRS 12 and NZ IFRS 13). The model financial statements illustrate some of the disclosure requirements to the extent that they are applicable. For full details of the disclosure and presentation requirements of the above new and revised NZ IFRSs, readers should refer to Deloitte's 2013 *IFRS Compliance, Presentation and Disclosure Checklist*. The checklist can be downloaded from Deloitte's web site www.iasplus.com. Later versions of the checklists are also available online.

New Zealand tailoring required

These model financial statements are based on the Deloitte global IFRS model financial statements for a fictional entity, domiciled in a fictional country (A Land, which has a tax rate of 30% which differs from New Zealand) and with a fictional currency (CU).

We have added the NZ specific requirements of FRS 44 *New Zealand Additional Disclosures*.

These model financial statements demonstrate disclosure for the group only. The New Zealand Financial Reporting Act 1993 currently also requires financial statements for the Parent entity, although for periods beginning on or after 1 April 2014 there is no longer a requirement for companies and issuers (when they become FMC reporting entities under the Financial Markets Conduct Act 2013) to prepare parent financial statements when group financial statements are already provided.

Entities will need to tailor their disclosures to the NZ environment.

Alternative treatments permitted

For the purposes of presenting the statement of profit and loss and statement of profit and loss and other comprehensive income, some of the various alternatives allowed under NZ IFRS for those statements have been illustrated. Preparers should select the alternatives most appropriate to their circumstances.

A number of NZ IFRS permit entities to choose between alternative treatments. The accounting policies selected for these model financial statements are set out in the notes to the financial statements.

Amounts Presented

The amounts presented in these model financial statements are not intended to represent a reflection of the commercial and economic environment at 31 December 2013. Accordingly foreign exchange rates, interest rates (etc.) should not be considered to be a reasonable reflection of actual rates at 31 December 2013.

Nil balances

Note that in these model financial statements we have frequently included line items for which a nil amount is shown to illustrate items that, although not applicable to NZ IFRS RDR Holdings Limited, are commonly encountered in practice. This does not mean that we have illustrated all possible disclosures. Nor should it be taken to mean that, in practice, entities are required to display line items for such "nil" amounts.

Source references

Suggested disclosures are cross referenced to the underlying requirements of the relevant legislation and NZ IFRS in the left hand column of each page of these model financial statements (either in the row of the disclosure item itself, or at the top of the section/table).

If a source reference is subject to a NZ IFRS (RDR) disclosure concession the source reference (and related disclosure content) has been shaded. If a disclosure is required by more than one source, but not all sources are the subject of an RDR disclosure concession, then the relevant source reference has been shaded, but the disclosure content has **not** been shaded. Where doubt exists as to the appropriate treatment examination of the source of the disclosure requirement is recommended.

Abbreviation/Term	What it stands for
Co Act	Companies Act 1993.
FRA	Financial Reporting Act 1993.
FRS	Financial Reporting Standard.
GAAP	Generally Accepted Accounting Practice.
IAS	International Accounting Standard.
IASB	International Accounting Standards Board.
IFRIC	International Financial Reporting Interpretations Committee of the IASB. Also used to refer to the interpretations issued by this committee.
IFRS	International Financial Reporting Standards. IFRS incorporates IAS (inherited by the IASB from its predecessor body the IASC), IFRS (issued by the IASB) and the interpretations of both types of standards (SICs, IFRICs).
NZICA	New Zealand Institute of Chartered Accountants.
NZ IAS	New Zealand equivalents to International Accounting Standards.
NZ IFRS	New Zealand equivalents to International Financial Reporting Standards. Full NZ IFRS applies to tier 1 for-profit entities (see XRB A1 below).
NZ IFRS (RDR)	NZ IFRS Reduced Disclosure Regime. NZ IFRS (RDR) applies to tier 2 for-profit entities (see XRB A1 below).
SIC	Interpretation(s) issued by the Standing Interpretations Committee of the IASC, the predecessor committee to the IFRIC.
Tier 1 Entity	An entity which reports under full NZ IFRS (see XRB A1 below).
Tier 2 Entity	An entity which qualifies for reduced disclosure reporting concessions, and reports under NZ IFRS (RDR) (see XRB A1 below).
XRB	External Reporting Board.
XRB A1	The XRB issued a General (Accounting) Standard XRB A1: Accounting Standards Framework, which has been regularly updated as phases of the New Framework were finalised. The for-profit entities section includes a suite of standards, comprising NZ IFRS and NZ IFRS Reduced Disclosure Regime (NZ IFRS RDR). XRB A1 sets out the tiers for reporting, the standards that apply to each tier and the requirements for transitioning between tiers.

NZ IFRS applicable on or after 1 January 2013

The following is a list of pronouncements which have been approved by the XRB as at 30 September 2014, have been through the XRB's publication process and are effective for reporting periods beginning on or after 1 January 2013. The standards are listed in numeric sequence, beginning with the IFRS-equivalent standards followed by the IAS-equivalent standards and the New Zealand specific standards.

Reference	Title
XRB A1	<i>Accounting Standards Framework (For-Profit Entities Update)</i>

NZ IFRIC 19	<i>Extinguishing Financial Liabilities with Equity Instruments</i>
NZ IFRIC 20	<i>Stripping Costs in the Production Phase of a Surface Mine</i>
NZ IFRIC 21	<i>Levies (effective for periods beginning on or after 1 January 2014)</i>
NZ SIC 7	<i>Introduction of the Euro</i>
NZ SIC 10	<i>Government Assistance – No Specific Relation to Operating Activities</i>
NZ SIC 15	<i>Operating Leases – Incentives</i>
NZ SIC 25	<i>Income Taxes – Changes in the Tax Status of an Entity or its Shareholders</i>
NZ SIC 27	<i>Evaluating the Substance of Transactions Involving the Legal Form of a Lease</i>
NZ SIC 29	<i>Service Concession Arrangements: Disclosures</i>
NZ SIC 31	<i>Revenue – Barter Transactions Involving Advertising Services</i>
NZ SIC 32	<i>Intangible Assets – Web Site Costs</i>

Exclusions

These model financial statements do not, and cannot be expected to cover all situations that may be encountered in practice. Therefore, knowledge of the disclosure provisions of the relevant legislation and NZ IFRS are pre-requisites for the preparation of financial statements. Specifically, these model financial statements do not provide guidance on the 'public benefit entity' disclosure requirements of NZ IFRS and the disclosure requirements of the following Standards:

- NZ IFRS 4 *Insurance Contracts*
- NZ IFRS 6 *Exploration for and Evaluation of Mineral Resources*
- NZ IAS 1 *Presentation of Financial Statements* (revised 2011), in relation to a Statement of Service Performance only
- NZ IAS 29 *Financial Reporting in Hyperinflationary Economies*
- NZ IAS 34 *Interim Financial Reporting*
- NZ IAS 41 *Agriculture*
- FRS 42 *Prospective Financial Statements*
- FRS 43 *Summary Financial Statements*

In addition a number of Interpretations (NZ IFRIC and NZ SIC) have not been demonstrated.

Unless otherwise stated, these model financial statements do not provide guidance on new or amended NZ IFRS where these are applicable to periods ending after 31 December 2013. Details of new and amended pronouncements which have not been adopted are included in note 2.2 of the model financial statements.

COMMENTARY

The Group has applied the amendments to NZ IAS 1 Presentation of Items of Other Comprehensive Income for the first time in the current year. The amendments to NZ IAS 1 introduce new terminology for the statement of comprehensive income and income statement. Under the amendments to NZ IAS 1, the 'statement of comprehensive income' is renamed as the 'statement of profit or loss and other comprehensive income' and the 'income statement' is renamed as the 'statement of profit or loss'. Use of the new terminology is not mandatory.

One statement vs. two statements

The amendments to NZ IAS 1 retain the option to present profit or loss and other comprehensive income (OCI) in either a single statement or in two separate but consecutive statements. Alt 1 above illustrates the presentation of profit or loss and OCI in one statement with expenses analysed by function. Alt 2 (see the following pages) illustrates the presentation of profit or loss and OCI in two separate but consecutive statements with expenses analysed by nature.

Whichever presentation approach is adopted, the distinction is retained between items recognised in profit or loss and items recognised in OCI. Under both approaches, profit or loss, total OCI, as well as comprehensive income for the period (being the total of profit or loss and OCI) should be presented. Under the two-statement approach, the separate statement of profit or loss ends at 'profit for the year', and this 'profit for the year' is then the starting point for the statement of profit or loss and other comprehensive income, which is required to be presented immediately following the statement of profit or loss. In addition, the analysis of 'profit for the year' between the amount attributable to the owners of the Company and the amount attributable to non-controlling interests is presented as part of the separate statement of profit or loss.

OCI: items that may or may not be reclassified

Irrespective of whether the one-statement or the two-statement approach is followed, the items of OCI should be classified by nature and grouped into those that, in accordance with other NZ IFRSs:

- (a) will not be reclassified subsequently to profit or loss; and*
- (b) may be reclassified subsequently to profit or loss when specific conditions are met.*

Presentation options for reclassification adjustments

NZ IAS 1.92-94 *In addition, in accordance with paragraph 94 of NZ IAS 1, an entity may present reclassification adjustments in the statement of profit or loss and other comprehensive income or in the notes. In Alt 1 above, the reclassification adjustments have been presented in the notes. Alt 2 (see the following pages) illustrates the presentation of the reclassification adjustments in the statement of profit or loss and other comprehensive income.*

Presentation options for income tax relating to items of OCI

NZ IAS 1.90,91 *Furthermore, for items of OCI, additional presentation options are available as follows: the individual items of OCI may be presented net of tax in the statement of profit or loss and other comprehensive income (as illustrated on the previous page), or they may be presented gross with a single line deduction for tax relating to those items by allocating the tax between the items that may be reclassified subsequently to the profit or loss section and those that will not be reclassified subsequently to profit or loss section (see Alt 2). Whichever option is selected, the income tax relating to each item of OCI must be disclosed, either in the statement of profit or loss and other comprehensive income or in the notes (see Note 29).*

Earnings per share

As tier 2 entities are not in scope of NZ IAS 33, earnings per share disclosures are not required.

NZ IAS 1.85

Other

Additional line items, headings and subtotals shall be presented in the statement of profit or loss and other comprehensive income or statement of profit or loss when such presentation is relevant to an understanding of the entity's financial performance.

NZ IAS 1.32

Income and expenses shall only be set-off where required or permitted by an NZ IFRS.

COMMENTARY

NZ IAS 1.10(f) requires an entity to present a statement of financial position as at the beginning of the preceding period when it applies an accounting policy retrospectively or makes a retrospective restatement of items in its financial statements, or when it reclassifies items in its financial statements.

As part of the Annual Improvements to NZ IFRSs 2009-2011 Cycle, NZ IAS 1 Presentation of Financial Statements has been revised to provide guidance on when a statement of financial position as at the beginning of the preceding period (third statement of financial position) and the related notes should be presented in the financial statements. Based on the amendments, an entity is required to present a third statement of financial position if:

- it applies an accounting policy retrospectively, makes a retrospective restatement of items in its financial statements or reclassifies items in its financial statements; and
- the retrospective application, retrospective restatement or the reclassification has a material effect on the information in the third statement of financial position.

Other than disclosures of certain specified information as required by NZ IAS 1.41-44 and NZ IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, the related notes to the third statement of financial position are not required to be disclosed.

In this model, it is assumed that the application of new and revised NZ IFRSs has resulted in a material retrospective restatement of certain items in the financial statements (see note 2). As such, a third statement of financial position has been presented.

COMMENTARY

The above illustrates the direct method of reporting cash flows from operating activities.

When a NZ entity uses the direct method to present its statement of cash flows, it shall also provide a reconciliation of the net cash flow from operating activities to profit/ (loss) (see next page).

This reconciliation may be presented with the statement of cash flows, or as a note to the financial statements.

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013**

1. General information

NZ IAS 1.138(a),(c)
NZ IAS 24.13

NZ IFRS RDR Holdings Limited (the Company) is a limited company incorporated in A Land. Its parent and ultimate holding company is NZ Group Holdings Limited. Its ultimate controlling party is Mr Steve Hardy. The addresses of its registered office and principal place of business are disclosed in the introduction to the annual report. The principal activities of the Company and its subsidiaries (the Group) are described in note 6.

COMMENTARY

NZ IAS 1.138

General information about a tier 2 entity is not required under NZ IFRS (RDR), and tier 2 entities may wish to reduce/tailor their introductory information about the reporting entity.

2. Application of new and revised International Financial Reporting Standards (NZ IFRSs)

2.1 New and revised NZ IFRSs affecting amounts reported and/or disclosures in the financial statements

COMMENTARY

NZ IAS 8. RDR 28.1

In these model financial statements, NZ IFRS RDR Holdings Limited is an entity moving from full NZ IFRS (tier 1) to NZ IFRS (RDR) (tier 2). As a result there are no recognition and measurement accounting policy changes. The key impact is reduced disclosure, which is demonstrated by the shaded content in these model financial statements. Appropriate disclosure of the change from tier 1 to tier 2 could include a statement as follows:

“XRB A1 sets out which suite of accounting standards entities must follow. The Company is eligible for, and has elected to, report in accordance with tier 2 NZ IFRS (RDR). The Company has taken advantage of a number of disclosure concessions, however there was no recognition or measurement impact on adoption of NZ IFRS (RDR).”

For entities moving from the Framework for Differential Reporting (tier 3) or old NZ GAAP (tier 4) to NZ IFRS (RDR) (tier 2) there may be recognition and measurement accounting policy changes, along with changes in disclosure. It is important to note that in some cases NZ IFRS (RDR) requires more disclosure in some areas than tier 3 or tier 4 did previously (e.g. a cash flow statement is required under NZ IFRS (RDR)). These entities will need to carefully review the requirements of NZ IFRS (RDR), XRB A1 and the requirements and concessions of NZ IFRS 1 to determine both the impact on adoption of NZ IFRS (RDR) and the required disclosures in the year of adoption, which are not demonstrated in these model financial statements. Tier 3 entities moving to tier 2 for periods beginning before 1 April 2014 will need to account for changes in accounting policies in accordance with both NZ IFRS 1 and NZ IAS 8 (to the extent that those requirements do not conflict with NZ IFRS 1) and this may limit use of the NZ IFRS 1 optional exemptions.

NZ IAS 8 requires an entity to disclose for the current period and each prior period presented, to the extent practicable, the amount of the adjustment for each line item affected. NZ IAS 8 also requires disclosure of the amount of the adjustment relating to periods before those presented. However, if it is impracticable for a tier 2 entity to determine these amounts, it shall disclose an explanation instead. These disclosures have not been shaded below as entities will first need to assess if they can determine the amounts for disclosure.

In the current year, the Group has applied a number of new and revised NZ IFRSs issued by the International Accounting Standards Board (IASB) that are mandatorily effective for an accounting period that begins on or after 1 January 2013.

NZ IAS 8.28(a)

Amendments to NZ IFRS 7 Disclosures – Offsetting Financial Assets and Financial Liabilities

NZ IAS 8.28(c)

The Group has applied the amendments to NZ IFRS 7 Disclosures – Offsetting Financial Assets and Financial Liabilities for the first time in the current year. The amendments to NZ IFRS 7 require entities to disclose information about rights of offset and related arrangements (such as collateral posting requirements) for financial instruments under an enforceable master netting agreement or similar arrangement.

NZ IAS 8.28(d),(f)

The amendments have been applied retrospectively. As the Group does not have any offsetting arrangements in place, the application of the amendments has had no material impact on the disclosures or on the amounts recognised in the consolidated financial statements.

Source	NZ IFRS RDR Holdings Limited
NZ IAS 1.10(e),(ea), 51(b),(c)	Notes to the consolidated financial statements for the year ended 31 December 2013- continued
NZ IAS 8.28(a)	New and revised Standards on consolidation, joint arrangements, associates and disclosures
NZ IAS 8.28(a)	<p>In May 2011, a package of five standards on consolidation, joint arrangements, associates and disclosures was issued comprising NZ IFRS 10 <i>Consolidated Financial Statements</i>, NZ IFRS 11 <i>Joint Arrangements</i>, NZ IFRS 12 <i>Disclosure of Interests in Other Entities</i>, NZ IAS 27 (as revised in 2011) <i>Separate Financial Statements</i> and NZ IAS 28 (as revised in 2011) <i>Investments in Associates and Joint Ventures</i>. Subsequent to the issue of these standards, amendments to NZ IFRS 10, NZ IFRS 11 and NZ IFRS 12 were issued to clarify certain transitional guidance on the first-time application of the standards.</p>
NZ IAS 8.28(c)	<p>In the current year, the Group has applied for the first time NZ IFRS 10, NZ IFRS 11, NZ IFRS 12 and NZ IAS 28 (as revised in 2011) together with the amendments to NZ IFRS 10, NZ IFRS 11 and NZ IFRS 12 regarding the transitional guidance. NZ IAS 27 (as revised in 2011) is not applicable to the Group as it deals only with separate financial statements.</p> <p>The impact of the application of these standards is set out below.</p> <p><i>Impact of the application of NZ IFRS 10</i></p>
NZ IAS 8.28(c)	<p>NZ IFRS 10 replaces the parts of NZ IAS 27 <i>Consolidated and Separate Financial Statements</i> that deal with consolidated financial statements and NZ SIC-12 <i>Consolidation – Special Purpose Entities</i>. NZ IFRS 10 changes the definition of control such that an investor has control over an investee when a) it has power over the investee, b) it is exposed, or has rights, to variable returns from its involvement with the investee and c) has the ability to use its power to affect its returns. All three of these criteria must be met for an investor to have control over an investee. Previously, control was defined as the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. Additional guidance has been included in NZ IFRS 10 to explain when an investor has control over an investee. Some guidance included in NZ IFRS 10 that deals with whether or not an investor that owns less than 50% of the voting rights in an investee has control over the investee is relevant to the Group.</p> <p>Specifically, the Group has a 45% ownership interest in C Plus Limited, which is listed on the stock exchange of A Land. The Group's 45% ownership interest in C Plus Limited gives the Group the same percentage of the voting rights in C Plus Limited. The Group's 45% ownership interest in C Plus Limited was acquired in June 2010 and there has been no change in the Group's ownership in C Plus Limited since then. The remaining 55% of the ordinary shares of C Plus Limited are owned by thousands of shareholders, none individually holding more than 2%.</p>
NZ IFRS 10.C4(a)	<p>The directors of the Company made an assessment as at the date of initial application of NZ IFRS 10 (i.e. 1 January 2013) as to whether or not the Group has control over C Plus Limited in accordance with the new definition of control and the related guidance set out in NZ IFRS 10. The directors concluded that it has had control over C Plus Limited since the acquisition in June 2010 on the basis of the Group's absolute size of holding in C Plus Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. Therefore, in accordance with the requirements of NZ IFRS 10, C Plus Limited has been a subsidiary of the Company since June 2010. Previously, C Plus Limited was treated as an associate of the Group and accounted for using the equity method of accounting.</p>
NZ IAS 8.28(b),(d)	<p>Comparative amounts for 2012 and the related amounts as at 1 January 2012 have been restated in accordance with the relevant transitional provisions set out in NZ IFRS 10 (see the tables below for details).</p>
	<i>Impact of the application of NZ IFRS 11</i>
NZ IAS 8.28(c)	<p>NZ IFRS 11 replaces NZ IAS 31 <i>Interests in Joint Ventures</i>, and the guidance contained in a related interpretation, NZ SIC-13 <i>Jointly Controlled Entities – Non-Monetary Contributions by Venturers</i>, has been incorporated in NZ IAS 28 (as revised in 2011). NZ IFRS 11 deals with how a joint arrangement of which two or more parties have joint control should be classified and accounted for. Under NZ IFRS 11, there are only two types of joint arrangements – joint operations and joint ventures. The classification of joint arrangements under NZ IFRS 11 is determined based on the rights and obligations of parties to the joint arrangements by considering the structure, the legal form of the arrangements, the contractual terms agreed by the parties to the arrangement, and, when relevant, other facts and circumstances. A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint operators) have rights to the assets, and obligations for the liabilities, relating to the</p>

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

arrangement. A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement (i.e. joint venturers) have rights to the net assets of the arrangement. Previously, NZ IAS 31 contemplated three types of joint arrangements – jointly controlled entities, jointly controlled operations and jointly controlled assets. The classification of joint arrangements under NZ IAS 31 was primarily determined based on the legal form of the arrangement (e.g. a joint arrangement that was established through a separate entity was accounted for as a jointly controlled entity).

NZ IAS 8.28(c) The initial and subsequent accounting of joint ventures and joint operations is different. Investments in joint ventures are accounted for using the equity method (proportionate consolidation is no longer allowed). Investments in joint operations are accounted for such that each joint operator recognises its assets (including its share of any assets jointly held), its liabilities (including its share of any liabilities incurred jointly), its revenue (including its share of revenue from the sale of the output by the joint operation) and its expenses (including its share of any expenses incurred jointly). Each joint operator accounts for the assets and liabilities, as well as revenues and expenses, relating to its interest in the joint operation in accordance with the applicable Standards.

NZ IFRS 11.C2,C3 The directors of the Company reviewed and assessed the classification of the Group's investments in joint arrangements in accordance with the requirements of NZ IFRS 11. The directors concluded that the Group's investment in Electronics JV Limited, which was classified as a jointly controlled entity under NZ IAS 31 and was accounted for using the proportionate consolidation method, should be classified as a joint venture under NZ IFRS 11 and accounted for using the equity method.

NZ IAS 8.28(b),(d) The change in accounting of the Group's investment in Electronics JV Limited has been applied in accordance with the relevant transitional provisions set out in NZ IFRS 11. Comparative amounts for 2012 have been restated to reflect the change in accounting for the Group's investment in Electronics JV Limited. The initial investment as at 1 January 2012 for the purposes of applying the equity method is measured as the aggregate of the carrying amounts of the assets and liabilities that the Group had previously proportionately consolidated (see the tables below for details). Also, the directors of the Company performed an impairment assessment on the initial investment as at 1 January 2012 and concluded that no impairment loss is required.

Impact of the application of NZ IFRS 12

NZ IAS 8.28(c) NZ IFRS 12 is a new disclosure standard and is applicable to entities that have interests in subsidiaries, joint arrangements, associates and/or unconsolidated structured entities. In general, the application of NZ IFRS 12 has resulted in more extensive disclosures in the consolidated financial statements (please see notes 4, 19, 20, 20A and 21 for details).

NZ IAS 8.28(a) **NZ IFRS 13 Fair Value Measurement**

NZ IAS 8.28(c) The Group has applied NZ IFRS 13 for the first time in the current year. NZ IFRS 13 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The scope of NZ IFRS 13 is broad; the fair value measurement requirements of NZ IFRS 13 apply to both financial instrument items and non-financial instrument items for which other NZ IFRSs require or permit fair value measurements and disclosures about fair value measurements, except for share-based payment transactions that are within the scope of NZ IFRS 2 *Share-based Payment*, leasing transactions that are within the scope of NZ IAS 17 *Leases*, and measurements that have some similarities to fair value but are not fair value (e.g. net realisable value for the purposes of measuring inventories or value in use for impairment assessment purposes).

NZ IAS 8.28(c) NZ IFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions. Fair value under NZ IFRS 13 is an exit price regardless of whether that price is directly observable or estimated using another valuation technique. Also, NZ IFRS 13 includes extensive disclosure requirements.

NZ IAS 8.28(b),(d) NZ IFRS 13 requires prospective application from 1 January 2013. In addition, specific transitional provisions were given to entities such that they need not apply the disclosure requirements set out in the Standard in comparative information provided for periods before the initial application of the Standard. In accordance with these transitional provisions, the Group has not made any new disclosures required by NZ IFRS 13 for the 2012 comparative period (please see notes 15, 16 and 40 for the 2013 disclosures).

Source	NZ IFRS RDR Holdings Limited
NZ IAS 1.10(e),(ea), 51(b),(c)	Notes to the consolidated financial statements for the year ended 31 December 2013- continued
NZ IAS 8.28(c)	Other than the additional disclosures, the application of NZ IFRS 13 has not had any material impact on the amounts recognised in the consolidated financial statements.
NZ IAS 8.28(a)	Amendments to NZ IAS 1 Presentation of Items of Other Comprehensive Income
NZ IAS 8.28(c)	<p>The Group has applied the amendments to NZ IAS 1 <i>Presentation of Items of Other Comprehensive Income</i> for the first time in the current year. The amendments introduce new terminology, whose use is not mandatory, for the statement of comprehensive income and income statement. Under the amendments to NZ IAS 1, the 'statement of comprehensive income' is renamed as the 'statement of profit or loss and other comprehensive income' [and the 'income statement' is renamed as the 'statement of profit or loss'].</p> <p>The amendments to NZ IAS 1 retain the option to present profit or loss and other comprehensive income in either a single statement or in two separate but consecutive statements. However, the amendments to NZ IAS 1 require items of other comprehensive income to be grouped into two categories in the other comprehensive income section: (a) items that will not be reclassified subsequently to profit or loss and (b) items that may be reclassified subsequently to profit or loss when specific conditions are met. Income tax on items of other comprehensive income is required to be allocated on the same basis – the amendments do not change the option to present items of other comprehensive income either before tax or net of tax. The amendments have been applied retrospectively, and hence the presentation of items of other comprehensive income has been modified to reflect the changes. Other than the above mentioned presentation changes, the application of the amendments to NZ IAS 1 does not result in any impact on profit or loss, other comprehensive income and total comprehensive income.</p>
NZ IAS 8.28(a)	Amendments to NZ IAS 1 Presentation of Financial Statements
NZ IAS 8.28(b),(c),(d)	(as part of the Annual Improvements to NZ IFRSs 2009 - 2011 Cycle issued in May 2012)
NZ IAS 8.28(c)	<p>The Annual Improvements to NZ IFRSs 2009 - 2011 have made a number of amendments to NZ IFRSs. The amendments that are relevant to the Group are the amendments to NZ IAS 1 regarding when a statement of financial position as at the beginning of the preceding period (third statement of financial position) and the related notes are required to be presented. The amendments specify that a third statement of financial position is required when a) an entity applies an accounting policy retrospectively, or makes a retrospective restatement or reclassification of items in its financial statements, and b) the retrospective application, restatement or reclassification has a material effect on the information in the third statement of financial position. The amendments specify that related notes are not required to accompany the third statement of financial position.</p>
NZ IAS 8.28(c)	<p>In the current year, the Group has applied a number of new and revised NZ IFRSs (see the discussion above), which has resulted in material effects on the information in the consolidated statement of financial position as at 1 January 2012. In accordance with the amendments to NZ IAS 1, the Group has presented a third statement of financial position as at 1 January 2012 without the related notes except for the disclosure requirements of NZ IAS 8 <i>Accounting Policies, Changes in Accounting Estimates and Errors</i> as detailed below.</p>
NZ IAS 8.28(a)	NZ IAS 19 Employee Benefits (as revised in 2011)
NZ IAS 8.28(c)	<p>In the current year, the Group has applied NZ IAS 19 <i>Employee Benefits</i> (as revised in 2011) and the related consequential amendments for the first time.</p>
NZ IAS 8.28(c)	<p>NZ IAS 19 (as revised in 2011) changes the accounting for defined benefit plans and termination benefits. The most significant change relates to the accounting for changes in defined benefit obligations and plan assets. The amendments require the recognition of changes in defined benefit obligations and in the fair value of plan assets when they occur, and hence eliminate the 'corridor approach' permitted under the previous version of NZ IAS 19 and accelerate the recognition of past service costs.</p> <p>All actuarial gains and losses are recognised immediately through other comprehensive income in order for the net pension asset or liability recognised in the consolidated statement of financial position to reflect the full value of the plan deficit or surplus. Furthermore, the interest cost and expected return on plan assets used in the previous version of NZ IAS 19 are replaced with a 'net interest' amount under NZ IAS 19 (as revised in 2011), which is calculated by applying the discount rate to the net defined benefit liability or asset. These changes have had an impact on the amounts recognised in profit or loss and other comprehensive income in prior years (see the tables below for</p>

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013 - continued**

details). In addition, NZ IAS 19 (as revised in 2011) introduces certain changes in the presentation of the defined benefit cost including more extensive disclosures.

NZ IAS 8.28(b),(d) Specific transitional provisions are applicable to first-time application of NZ IAS 19 (as revised in 2011). The Group has applied the relevant transitional provisions and restated the comparative amounts on a retrospective basis (see the tables below for details).

COMMENTARY

The tables below illustrate the financial impact of new and revised Standards. Tier 2 entities and other entities where only a small number of line items are affected may wish to disclose this information in the related notes instead.

The disclosures below illustrate the impact on profit or loss with expenses analysed by function. Entities should adopt the approach consistent with how expenses have been analysed in the statement of profit or loss and other comprehensive income.

In accordance with the amendments to NZ IFRSs 10, 11 and 12 regarding the transition guidance on the first-time application of these Standards, an entity need only present the quantitative information required by paragraph 28(f) of NZ IAS 8 for the annual period immediately preceding the date of initial application of NZ IFRS 10 (i.e. 2012). The note below, therefore, has not included the quantitative information required by NZ IAS 8.28(f) for the current year on the application of NZ IFRSs 10, 11 and 12.

COMMENTARY

The table above shows the aggregate impact on total comprehensive income of the application of the new and revised Standards adopted for the first time in the current year. Although such disclosure is not specifically required by NZ IAS 8, it is considered useful to provide users of the financial statements with the aggregate effect.

Furthermore, in accordance with the transitional provisions set out in NZ IFRS 10 and NZ IFRS 11, the Group has not shown the impact of the application of NZ IFRS 10 and NZ IFRS 11 on profit (loss) for the year ended 31 December 2013. Therefore, the impact on total comprehensive income for the year ended 31 December 2013 reflects only the effect of the application of NZ IAS 19 (as revised in 2011).

2.1A Correction of prior period errors

COMMENTARY

Entities are required to correct material prior period errors retrospectively, unless impracticable. The disclosures relating to correction of errors is similar to the disclosures relating to the adoption of new standards. Entities will also need to disclose the nature of the error, the amount of the correction at the beginning of the earliest prior period presented, and for each prior period presented the amount of the correction:

(a) for each line item affected; and
 (b) if NZ IAS 33 applies, the amount of the correction for basic and diluted earnings per share.

If retrospective restatement is impracticable for a particular prior period, entities shall disclose the circumstances that led to the existence of that condition and a description of how and from when the error has been corrected.

NZ IAS 8.42,43
 NZ IAS 8.49(a)-(c)
 NZ IAS 8.49(d)

2.2 New and revised NZ IFRSs in issue but not yet effective

COMMENTARY

Entities are required to disclose in their financial statements the potential impact of new and revised NZ IFRSs that have been issued but are not yet effective. The disclosures below demonstrate a list of new and revised NZ IFRSs at the cut-off date of 30 September 2014. For the key changes example disclosure is provided however entities should carefully tailor the disclosures to what is relevant to their entity, and include additional disclosures if necessary.

The potential impact of the application of any new and revised NZ IFRSs (including IFRSs not yet approved in New Zealand) issued by the IASB after 30 September 2014 but before the financial statements are issued should also be considered and disclosed.

NZ IAS 8.30

The Group has not applied the following new and revised NZ IFRSs that have been issued but are not yet effective [delete those which are not applicable to the entity type]:

NZ IAS 8.31(d)

These NZ IFRS will be adopted when they first become mandatory. Significant changes are discussed below [tailor detail below as necessary]:

NZ IAS 8.31(a)

NZ IFRS 9 Financial Instruments

NZ IAS 8.30

NZ IFRS 9, issued in 2009, introduced new requirements for the classification and measurement of financial assets. NZ IFRS 9 was amended in 2010 to include requirements for the classification and measurement of financial liabilities and for derecognition, and in 2013 incorporated new hedge accounting requirements. In 2014, a new expected loss impairment model was also introduced. For annual periods beginning before 1 January 2018, an entity may elect to apply an earlier version of NZ IFRS 9 if the entity's date of initial application is before 1 February 2015.

NZ IAS 8.31

Key requirements of NZ IFRS 9:

NZ IAS 8.31(b)

- all recognised financial assets that are within the scope of NZ IAS 39 Financial Instruments: Recognition and Measurement are required to be subsequently measured at amortised cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortised cost at the end of subsequent accounting periods. Debt investments held within a business model whose objective is achieved both by collecting contractual cash flows and selling financial assets will be measured at fair value through other comprehensive income (if the 2014 version of NZ IFRS 9 is adopted). All other debt investments and equity investments are measured at their fair value at the end of subsequent accounting periods. In addition, under NZ IFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading) in other comprehensive income, with only dividend income generally recognised in profit or loss. No equity investments are measured at cost (including unquoted equity instruments).

NZ IAS 8.31(b)

- with regard to the measurement of financial liabilities designated as at fair value through profit or loss, NZ IFRS 9 requires that the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under NZ IAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.

NZ IAS 8.31(b)

NZ IFRS 9 will also impact hedge accounting by the Group. NZ IFRS 9 broadens the risk eligible for hedge accounting and changes the way forward contracts and derivative options are accounted for when in a hedge accounting relationship, which reduces profit or loss volatility. The effectiveness test has been replaced with the principle of an "economic relationship" and retrospective assessment of effectiveness is no longer required.

NZ IAS 8.31(b)

NZ IFRS 9 will also impact impairment recognised, as it will no longer be necessary for a credit event to have occurred before credit losses are recognised. Instead, the Group will account for expected credit losses, and changes in those expected credit losses.

NZ IAS 8.31(e)

The directors of the Company anticipate that the application of NZ IFRS 9 in the future may have a significant impact on amounts reported in respect of the Group's financial assets and financial liabilities (e.g. hedge accounting, and the Group's investments in redeemable notes that are currently classified as available-for-sale investments will have to be measured at fair value at the end of subsequent reporting periods, with changes in the fair value being recognised in profit or loss). However, it is not practicable to provide a reasonable estimate of the effect of NZ IFRS 9 until a detailed review has been completed.

NZ IAS 8.31(a)

Amendments to NZ IFRS 10, NZ IFRS 12 and NZ IAS 27 Investment Entities

NZ IAS 8.31(b)

The amendments to NZ IFRS 10 define an investment entity and require a reporting entity that meets the definition of an investment entity not to consolidate its subsidiaries but instead to measure its subsidiaries at fair value through profit or loss in its consolidated and separate financial statements.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

NZ IAS 8.31(b)

To qualify as an investment entity, a reporting entity is required to:

- obtain funds from one or more investors for the purpose of providing them with professional investment management services;
- commit to its investor(s) that its business purpose is to invest funds solely for returns from capital appreciation, investment income, or both; and
- measure and evaluate performance of substantially all of its investments on a fair value basis.

NZ IAS 8.31(b)

Consequential amendments have been made to NZ IFRS 12 and NZ IAS 27 to introduce new disclosure requirements for investment entities.

NZ IAS 8.31(e)

The directors of the Company do not anticipate that the investment entities amendments will have any effect on the Group's consolidated financial statements as the Company is not an investment entity.

NZ IAS 8.31(a)

Amendments to NZ IAS 32 Offsetting Financial Assets and Financial Liabilities

NZ IAS 8.31(b)

The amendments to NZ IAS 32 clarify the requirements relating to the offset of financial assets and financial liabilities. Specifically, the amendments clarify the meaning of 'currently has a legally enforceable right of set-off' and 'simultaneous realisation and settlement'.

NZ IAS 8.31(e)

The directors of the Company do not anticipate that the application of these amendments to NZ IAS 32 will have a significant impact on the Group's consolidated financial statements as the Group does not have any financial assets and financial liabilities that qualify for offset.

NZ IAS 8.31(a)

NZ IFRS 15 Revenue from Contracts with Customers

NZ IFRS 15 provides a single comprehensive principles based five-step model to be applied to all contracts with customers. The five steps in the model are as follows:

NZ IAS 8.31(b)

- identify the contract with the customer;
- identify the performance obligations in the contract;
- determine the transaction price;
- allocate the transaction price to the performance obligations in the contracts; and
- recognise revenue when (or as) the entity satisfies a performance obligation.

NZ IAS 8.31(e)

The directors of the Company anticipate that the application of NZ IFRS 15 in the future may have a significant impact on amounts reported in respect of the Group's financial assets and financial liabilities. However, it is not practicable to provide a reasonable estimate of the effect of NZ IFRS 15 until a detailed review has been completed.

NZ IAS 8.31(e)

[Describe the potential impact of the application of other new and revised NZ IFRSs, if any.]

COMMENTARY

NZ entities which will be adopting Public Sector Public Benefit Entity standards (PS PBEs) or Not For Profit Public Benefit Entity Standards (NFP PBEs) in future will need to make similar disclosures of the impact of these approved but not yet effective standards.

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

NZ IAS 1.112(a),
117,119-121 **3. Significant accounting policies**

COMMENTARY
<p><i>The following are <u>examples</u> of the types of accounting policies that might be disclosed in this entity's financial statements. Entities are required to disclose in the summary of significant accounting policies the measurement basis (or bases) used in preparing the financial statements and the other accounting policies used that are relevant to an understanding of the financial statements. An accounting policy may be significant because of the nature of the entity's operations even if amounts for the current and prior periods are not material.</i></p> <p><i>In deciding whether a particular accounting policy should be disclosed, management considers whether disclosure would assist users in understanding how transactions, other events and conditions are reflected in the reported financial performance and financial position. Disclosure of particular accounting policies is especially useful to users when those policies are selected from alternatives allowed in Standards and Interpretations.</i></p> <p><i>Each entity considers the nature of its operations and the policies that users of its financial statements would expect to be disclosed for that type of entity. It is also appropriate to disclose each significant accounting policy that is not specifically required by NZ IFRSs, but that is selected and applied in accordance with NZ IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors.</i></p> <p><i>For completeness, in these model financial statements, accounting policies have been provided for some immaterial items, although this is not required under NZ IFRSs.</i></p>

3.1 Statement of compliance and reporting framework

FRS 44.7(a),(b)
NZ IAS 1.16
FRS 44.5

The consolidated financial statements have been prepared in accordance with New Zealand generally accepted accounting practice (NZ GAAP). For the purposes of complying with NZ GAAP, the Company is a for-profit entity. These financial statements comply with International Financial Reporting Standards and New Zealand International Financial Reporting Standards.

COMMENTARY
<p><i><u>A tier 2 entity would not be able to state compliance with IFRS.</u></i></p>
<p><i><u>An entity which is eligible for and has elected to report in accordance with tier 2 accounting standards (NZ IFRS RDR) shall disclose:</u></i></p> <p>(a) <i><u>that it is a tier 2 for-profit entity and has elected to report in accordance with tier 2 for-profit accounting standards; and</u></i></p> <p>(b) <i><u>the criteria that establish the entity as eligible to report in accordance with tier 2 for-profit accounting standards.</u></i></p> <p><i><u>For example:</u></i></p> <p><i><u>"The group has adopted External Reporting Board Standard A1 Accounting Standards Framework (For-profit Entities Update) (XRB A1). The Group qualifies for NZ IFRS (RDR) as it does not have public accountability and it is not a large for-profit public sector entity. The group has elected to apply NZ IFRS (RDR) and has applied disclosure concessions."</u></i></p>

NZ IAS 1.17(b),
112(a),117(a)

3.2 Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for certain properties and financial instruments that are measured at revalued amounts or fair values at the end of each reporting period, as explained in the accounting policies below.

Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Source

NZ IFRS RDR Holdings LimitedNZ IAS 1.10(e),(ea),
51(b),(c)**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. In estimating the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date. Fair value for measurement and/or disclosure purposes in these consolidated financial statements is determined on such a basis, except for share-based payment transactions that are within the scope of NZ IFRS 2, leasing transactions that are within the scope of NZ IAS 17, and measurements that have some similarities to fair value but are not fair value, such as net realisable value in NZ IAS 2 or value in use in NZ IAS 36.

3.2.1 Fair value hierarchy

In addition, for financial reporting purposes, fair value measurements are categorised into Level 1, 2 or 3 based on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement in its entirety, which are described as follows:

- Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;
- Level 2 inputs are inputs, other than quoted prices included within Level 1, that are observable for the asset or liability, either directly or indirectly; and
- Level 3 inputs are unobservable inputs for the asset or liability.

NZ IAS 1.17(b),
112(a), 117(a)

The principal accounting policies are set out below.

3.3 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including structured entities) controlled by the Company and its subsidiaries. Control is achieved when the Company:

- has power over the investee;
- is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

The Company reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control listed above.

When the Company has less than a majority of the voting rights of an investee, it has power over the investee when the voting rights are sufficient to give it the practical ability to direct the relevant activities of the investee unilaterally. The Company considers all relevant facts and circumstances in assessing whether or not the Company's voting rights in an investee are sufficient to give it power, including:

- the size of the Company's holding of voting rights relative to the size and dispersion of holdings of the other vote holders;
- potential voting rights held by the Company, other vote holders or other parties;
- rights arising from other contractual arrangements; and
- any additional facts and circumstances that indicate that the Company has, or does not have, the current ability to direct the relevant activities at the time that decisions need to be made, including voting patterns at previous shareholders' meetings.

Consolidation of a subsidiary begins when the Company obtains control over the subsidiary and ceases when the Company loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Company gains control until the date when the Company ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with the Group's accounting policies.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

3.3.1 Changes in the Group's ownership interests in existing subsidiaries

Changes in the Group's ownership interests in subsidiaries that do not result in the Group losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Group's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, a gain or loss is recognised in profit or loss and is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. All amounts previously recognised in other comprehensive income in relation to that subsidiary are accounted for as if the Group had directly disposed of the related assets or liabilities of the subsidiary (i.e. reclassified to profit or loss or transferred to another category of equity as specified/permitted by applicable NZ IFRSs). The fair value of any investment retained in the former subsidiary at the date when control is lost is regarded as the fair value on initial recognition for subsequent accounting under NZ IAS 39, when applicable, the cost on initial recognition of an investment in an associate or a joint venture.

3.4 Business combinations

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value, except that:

- deferred tax assets or liabilities, and assets or liabilities related to employee benefit arrangements are recognised and measured in accordance with NZ IAS 12 *Income Taxes* and NZ IAS 19 respectively;
- liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Group entered into to replace share-based payment arrangements of the acquiree are measured in accordance with NZ IFRS 2 at the acquisition date (see note 3.16.2); and
- assets (or disposal groups) that are classified as held for sale in accordance with NZ IFRS 5 *Non-current Assets Held for Sale and Discontinued Operations* are measured in accordance with that Standard.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognised amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another NZ IFRS.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

When the consideration transferred by the Group in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with NZ IAS 39, or NZ IAS 37 Provisions, Contingent Liabilities and Contingent Assets, as appropriate, with the corresponding gain or loss being recognised in profit or loss.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to its acquisition-date fair value and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognised at that date.

3.5 Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see note 3.4 above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate is described at note 3.6 below.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.6 Investments in associates and joint ventures

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

A joint venture is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The results and assets and liabilities of associates or joint ventures are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment, or a portion thereof, is classified as held for sale, in which case it is accounted for in accordance with NZ IFRS 5. Under the equity method, an investment in an associate or a joint venture is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate or joint venture. When the Group's share of losses of an associate or a joint venture exceeds the Group's interest in that associate or joint venture (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate or joint venture), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or joint venture.

An investment in an associate or a joint venture is accounted for using the equity method from the date on which the investee becomes an associate or a joint venture. On acquisition of the investment in an associate or a joint venture, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The requirements of NZ IAS 39 are applied to determine whether it is necessary to recognise any impairment loss with respect to the Group's investment in an associate or a joint venture. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with NZ IAS 36 *Impairment of Assets* as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs to sell) with its carrying amount. Any impairment loss recognised forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognised in accordance with NZ IAS 36 to the extent that the recoverable amount of the investment subsequently increases.

The Group discontinues the use of the equity method from the date when the investment ceases to be an associate or a joint venture, or when the investment is classified as held for sale. When the Group retains an interest in the former associate or joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the fair value is regarded as its fair value on initial recognition in accordance with NZ IAS 39. The difference between the carrying amount of the associate or joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture. In addition, the Group accounts for all amounts previously recognised in other comprehensive income in relation to that associate or joint venture on the same basis as would be required if that associate or joint venture had directly disposed of the related assets or liabilities. Therefore, if a gain or loss previously recognised in other comprehensive income by that associate or joint venture would be reclassified to profit or loss on the disposal of the related assets or liabilities, the Group reclassifies the gain or loss from equity to profit or loss (as a reclassification adjustment) when the equity method is discontinued.

The Group continues to use the equity method when an investment in an associate becomes an investment in a joint venture or an investment in a joint venture becomes an investment in an associate. There is no remeasurement to fair value upon such changes in ownership interests.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

When the Group reduces its ownership interest in an associate or a joint venture but the Group continues to use the equity method, the Group reclassifies to profit or loss the proportion of the gain or loss that had previously been recognised in other comprehensive income relating to that reduction in ownership interest if that gain or loss would be reclassified to profit or loss on the disposal of the related assets or liabilities.

When a group entity transacts with an associate or a joint venture of the Group, profits and losses resulting from the transactions with the associate or joint venture are recognised in the Group's consolidated financial statements only to the extent of interests in the associate or joint venture that are not related to the Group.

3.7 Interests in joint operations

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- its assets, including its share of any assets held jointly;
- its liabilities, including its share of any liabilities incurred jointly;
- its revenue from the sale of its share of the output arising from the joint operation;
- its share of the revenue from the sale of the output by the joint operation; and
- its expenses, including its share of any expenses incurred jointly.

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the NZ IFRSs applicable to the particular assets, liabilities, revenues and expenses.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a sale or contribution of assets), the Group is considered to be conducting the transaction with the other parties to the joint operation, and gains and losses resulting from the transactions are recognised in the Group's consolidated financial statements only to the extent of other parties' interests in the joint operation.

When a group entity transacts with a joint operation in which a group entity is a joint operator (such as a purchase of assets), the Group does not recognise its share of the gains and losses until it resells those assets to a third party.

3.8 Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate or a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with NZ IAS 39 unless the retained interest continues to be an associate or a joint venture, in which case the Group uses the equity method (see the accounting policy regarding investments in associates or joint ventures above).

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their previous carrying amount and fair value less costs to sell.

NZ IAS 18.35(a) **3.9 Revenue recognition**

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

3.9.1 Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- the Group has transferred to the buyer the significant risks and rewards of ownership of the goods;
- the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits associated with the transaction will flow to the Group; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Sales of goods that result in award credits for customers, under the Group's Maxi-Points Scheme, are accounted for as multiple element revenue transactions and the fair value of the consideration received or receivable is allocated between the goods supplied and the award credits granted. The consideration allocated to the award credits is measured by reference to their fair value – the amount for which the award credits could be sold separately. Such consideration is not recognised as revenue at the time of the initial sale transaction – but is deferred and recognised as revenue when the award credits are redeemed and the Group's obligations have been fulfilled.

3.9.2 Rendering of services

Revenue from a contract to provide services is recognised by reference to the stage of completion of the contract. The stage of completion of the contract is determined as follows:

- installation fees are recognised by reference to the stage of completion of the installation, determined as the proportion of the total time expected to install that has elapsed at the end of the reporting period;
- servicing fees included in the price of products sold are recognised by reference to the proportion of the total cost of providing the servicing for the product sold; and
- revenue from time and material contracts is recognised at the contractual rates as labour hours and direct expenses are incurred.

The Group's policy for recognition of revenue from construction contracts is described in note 3.10 below.

3.9.3 Royalties

Royalty revenue is recognised on an accrual basis in accordance with the substance of the relevant agreement (provided that it is probable that the economic benefits will flow to the Group and the amount of revenue can be measured reliably). Royalties determined on a time basis are recognised on a straight-line basis over the period of the agreement. Royalty arrangements that are based on production, sales and other measures are recognised by reference to the underlying arrangement.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

3.9.4 Dividend and interest income

Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably).

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3.9.5 Rental income

The Group's policy for recognition of revenue from operating leases is described in note 3.11.1 below.

NZ IAS 11.39(b),(c) **3.10 Construction contracts**

When the outcome of a construction contract can be estimated reliably, revenue and costs are recognised by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

When the outcome of a construction contract cannot be estimated reliably, contract revenue is recognised to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognised as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

When contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is shown as amounts due from customers for contract work. For contracts where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is shown as the amounts due to customers for contract work. Amounts received before the related work is performed are included in the consolidated statement of financial position, as a liability, as advances received. Amounts billed for work performed but not yet paid by the customer are included in the consolidated statement of financial position under trade and other receivables.

3.11 Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

3.11.1 The Group as lessor

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.11.2 The Group as lessee

Assets held under finance leases are initially recognised as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the consolidated statement of financial position as a finance lease obligation.

Lease payments are apportioned between finance expenses and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance expenses are recognised immediately in profit or loss, unless they are directly attributable to qualifying assets, in which case they are capitalised in accordance with the Group's general policy on borrowing costs (see note 3.13 below). Contingent rentals are recognised as expenses in the periods in which they are incurred.

Operating lease payments are recognised as an expense on a straight-line basis over the lease term, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed. Contingent rentals arising under operating leases are recognised as an expense in the period in which they are incurred.

In the event that lease incentives are received to enter into operating leases, such incentives are recognised as a liability. The aggregate benefit of incentives is recognised as a reduction of rental expense on a straight-line basis, except where another systematic basis is more representative of the time pattern in which economic benefits from the leased asset are consumed.

3.12 Foreign currencies

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and position of each group entity are expressed in CU, which is the functional currency of the Company and the presentation currency for the consolidated financial statements.

In preparing the financial statements of each individual group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences on monetary items are recognised in profit or loss in the period in which they arise except for:

- exchange differences on foreign currency borrowings relating to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- exchange differences on transactions entered into in order to hedge certain foreign currency risks (see 3.28 below for hedging accounting policies); and
- exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognised initially in other comprehensive income and reclassified from equity to profit or loss on repayment of the monetary items.

For the purposes of presenting these consolidated financial statements, the assets and liabilities of the Group's foreign operations are translated into Currency Units using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (and attributed to non-controlling interests as appropriate).

Source

NZ IFRS RDR Holdings Limited

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

On the disposal of a foreign operation (i.e. a disposal of the Group's entire interest in a foreign operation, or a disposal involving loss of control over a subsidiary that includes a foreign operation, or a partial disposal of an interest in a joint arrangement or an associate that includes a foreign operation of which the retained interest becomes a financial asset), all of the exchange differences accumulated in equity in respect of that operation attributable to the owners of the Company are reclassified to profit or loss.

In addition, in relation to a partial disposal of a subsidiary that includes a foreign operation that does not result in the Group losing control over the subsidiary, the proportionate share of accumulated exchange differences are re-attributed to non-controlling interests and are not recognised in profit or loss. For all other partial disposals (i.e. partial disposals of associates or joint arrangements that do not result in the Group losing significant influence or joint control), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments to identifiable assets acquired and liabilities assumed through acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

3.13 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

NZ IAS 20.39(a)

3.14 Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred revenue in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

Government grants that are receivable as compensation for expenses or losses already incurred or for the purpose of giving immediate financial support to the Group with no future related costs are recognised in profit or loss in the period in which they become receivable.

The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates.

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.15 Retirement benefit costs and termination benefits

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered service entitling them to the contributions.

For defined benefit retirement benefit plans, the cost of providing benefits is determined using the projected unit credit method, with actuarial valuations being carried out at the end of each annual reporting period. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate (based on the Government bond rates) at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as follows:

- service cost (including current service cost, past service cost, as well as gains and losses on curtailments and settlements);
- net interest expense or income; and
- remeasurement.

The Group presents the first two components of defined benefit costs in profit or loss in the line item ['employee benefits expense'/others (please specify)]. Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the consolidated statement of financial position represents the actual deficit or surplus in the Group's defined benefit plans. Any surplus resulting from this calculation is limited to the present value of any economic benefits available in the form of refunds from the plans or reductions in future contributions to the plans.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs.

3.16 Share-based payment arrangements

3.16.1 Share-based payment transactions of the Company

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 42.

The fair value determined at the grant date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of each reporting period, the Group revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

For cash-settled share-based payments, a liability is recognised for the goods or services acquired, measured initially at the fair value of the liability. At the end of each reporting period until the liability is settled, and at the date of settlement, the fair value of the liability is remeasured, with any changes in fair value recognised in profit or loss for the year.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

3.16.2 Share-based payment transactions of the acquiree in a business combination

When the share-based payment awards held by the employees of an acquiree (acquiree awards) are replaced by the Group's share-based payment awards (replacement awards), both the acquiree awards and the replacement awards are measured in accordance with NZ IFRS 2 ("market-based measure") at the acquisition date. The portion of the replacement awards that is included in measuring the consideration transferred in a business combination equals the market-based measure of the acquiree awards multiplied by the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the acquiree award. The excess of the market-based measure of the replacement awards over the market-based measure of the acquiree awards included in measuring the consideration transferred is recognised as remuneration cost for post-combination service.

However, when the acquiree awards expire as a consequence of a business combination and the Group replaces those awards when it does not have an obligation to do so, the replacement awards are measured at their market-based measure in accordance with NZ IFRS 2. All of the market-based measure of the replacement awards is recognised as remuneration cost for post-combination service.

At the acquisition date, when the outstanding equity-settled share-based payment transactions held by the employees of an acquiree are not exchanged by the Group for its share-based payment transactions, the acquiree share-based payment transactions are measured at their market-based measure at the acquisition date. If the share-based payment transactions have vested by the acquisition date, they are included as part of the non-controlling interest in the acquiree. However, if the share-based payment transactions have not vested by the acquisition date, the market-based measure of the unvested share-based payment transactions is allocated to the non-controlling interest in the acquiree based on the ratio of the portion of the vesting period completed to the greater of the total vesting period or the original vesting period of the share-based payment transaction. The balance is recognised as remuneration cost for post-combination service.

3.17 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

3.17.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from 'profit before tax' as reported in the consolidated [statement of profit or loss and other comprehensive income/ statement of profit or loss] because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3.17.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax liabilities and deferred tax assets for investment properties that are measured using the fair value model, the carrying amounts of such properties are presumed to be recovered entirely through sale, unless the presumption is rebutted. The presumption is rebutted when the investment property is depreciable and is held within a business model whose objective is to consume substantially all of the economic benefits embodied in the investment property over time, rather than through sale. The directors of the Company reviewed the Group's investment property portfolios and concluded that none of the Group's investment properties are held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, the directors have determined that the 'sale' presumption set out in the amendments to NZ IAS 12 is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of the investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.

3.17.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

3.17.4 Goods and services tax

Revenue, expenses, assets and liabilities are recognised net of the amount of goods and services tax (GST) except:

- where the amount of GST incurred is not recovered from the taxation authority, it is recognised as part of the cost of acquisition of an asset or as part of an item of expense; or
- for receivables and payables which are recognised inclusive of GST. (The net amount of GST recoverable from or payable to the taxation authority is included as part of receivables or payables).

NZ IAS 16.73(a),(b)

3.18 Property, plant and equipment

Land and buildings held for use in the production or supply of goods or services, or for administrative purposes, are stated in the consolidated statement of financial position at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Revaluations are performed with sufficient regularity such that the carrying amounts do not differ materially from those that would be determined using fair values at the end of each reporting period.

Any revaluation increase arising on the revaluation of such land and buildings is recognised in other comprehensive income and accumulated in equity, except to the extent that it reverses a revaluation decrease for the same asset previously recognised in profit or loss, in which case the increase is credited to profit or loss to the extent of the decrease previously expensed. A decrease in the carrying amount arising on the revaluation of such land and buildings is recognised in profit or loss to the extent that it exceeds the balance, if any, held in the properties revaluation reserve relating to a previous revaluation of that asset.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Cost includes professional fees and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

Depreciation on revalued buildings is recognised in profit or loss. On the subsequent sale or retirement of a revalued property, the attributable revaluation surplus remaining in the properties revaluation reserve is transferred directly to retained earnings.

Freehold land is not depreciated.

Fixtures and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

Depreciation is recognised so as to write off the cost or valuation of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Assets held under finance leases are depreciated over their expected useful lives on the same basis as owned assets. However, when there is no reasonable certainty that ownership will be obtained by the end of the lease term, assets are depreciated over the shorter of the lease term and their useful lives.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

NZ IAS 40.75(a)

3.19 Investment property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at fair value. Gains and losses arising from changes in the fair value of investment properties are included in profit or loss in the period in which they arise.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

3.20 Intangible assets

3.20.1 Intangible assets acquired separately

NZ IAS 38.118(b)

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Source

NZ IFRS RDR Holdings Limited

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.20.2 Internally-generated intangible assets - research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

NZ IAS 38.118(b)

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

3.20.3 Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

NZ IAS 38.118(b)

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

3.20.4 Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

3.21 Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any).

When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease (see note 3.18 above).

When an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase (see note 3.18 above).

NZ IAS 2.36(a) **3.22 Inventories**

Inventories are stated at the lower of cost and net realisable value. Costs of inventories are determined on a first-in-first-out basis. Net realisable value represents the estimated selling price for inventories less all estimated costs of completion and costs necessary to make the sale.

3.23 Provisions

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognised as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

3.23.1 Onerous contracts

Present obligations arising under onerous contracts are recognised and measured as provisions. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

3.23.2 Restructurings

A restructuring provision is recognised when the Group has developed a detailed formal plan for the restructuring and has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement the plan or announcing its main features to those affected by it. The measurement of a restructuring provision includes only the direct expenditures arising from the restructuring, which are those amounts that are both necessarily entailed by the restructuring and not associated with the ongoing activities of the entity.

3.23.3 Warranties

Provisions for the expected cost of warranty obligations under local sale of goods legislation are recognised at the date of sale of the relevant products, at the directors' best estimate of the expenditure required to settle the Group's obligation.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.23.4 Contingent liabilities acquired in a business combination

Contingent liabilities acquired in a business combination are initially measured at fair value at the acquisition date. At the end of subsequent reporting periods, such contingent liabilities are measured at the higher of the amount that would be recognised in accordance with NZ IAS 37 and the amount initially recognised less cumulative amortisation recognised in accordance with NZ IAS 18 *Revenue*.

NZ IFRS 7.21 **3.24 Financial instruments**

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instruments.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

NZ IFRS 7.21 **3.25 Financial assets**

Financial assets are classified into the following specified categories: financial assets 'at fair value through profit or loss' (FVTPL), 'held-to-maturity' investments, 'available-for-sale' (AFS) financial assets and 'loans and receivables'. The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition. All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

3.25.1 Effective interest method

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

NZ IFRS 7.85(e) Income is recognised on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

3.25.2 Financial assets at FVTPL

Financial assets are classified as at FVTPL when the financial asset is either held for trading or it is designated as at FVTPL.

- A financial asset is classified as held for trading if:
- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial asset forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

- it forms part of a contract containing one or more embedded derivatives, and NZ IAS 39 permits the entire combined contract to be designated as at FVTPL.

NZ IFRS 7.B5(e)

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in note 40.

3.25.3 Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity. Subsequent to initial recognition, held-to-maturity investments are measured at amortised cost using the effective interest method less any impairment.

3.25.4 Available-for-sale financial assets (AFS financial assets)

AFS financial assets are non-derivatives that are either designated as AFS or are not classified as (a) loans and receivables, (b) held-to-maturity investments or (c) financial assets at fair value through profit or loss.

Listed redeemable notes held by the Group that are traded in an active market are classified as AFS and are stated at fair value at the end of each reporting period. The Group also has investments in unlisted shares that are not traded in an active market but that are also classified as AFS financial assets and stated at fair value at the end of each reporting period (because the directors consider that fair value can be reliably measured). Fair value is determined in the manner described in note 40. Changes in the carrying amount of AFS monetary financial assets relating to changes in foreign currency rates (see below), interest income calculated using the effective interest method and dividends on AFS equity investments are recognised in profit or loss. Other changes in the carrying amount of available-for-sale financial assets are recognised in other comprehensive income and accumulated under the heading of available-for-sale revaluation reserve. When the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the available-for-sale revaluation reserve is reclassified to profit or loss.

Dividends on AFS equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established.

The fair value of AFS monetary financial assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate prevailing at the end of the reporting period. The foreign exchange gains and losses that are recognised in profit or loss are determined based on the amortised cost of the monetary asset. Other foreign exchange gains and losses are recognised in other comprehensive income.

AFS equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity investments are measured at cost less any identified impairment losses at the end of each reporting period.

3.25.5 Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. Loans and receivables (including [trade and other receivables, bank balances and cash, and others [describe]]) are measured at amortised cost using the effective interest method, less any impairment.

Interest income is recognised by applying the effective interest rate, except for short-term receivables when the effect of discounting is immaterial.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

3.25.6 Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

NZ IFRS 7.B5(f),
37(b)

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as a default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as trade receivables, assets are assessed for impairment on a collective basis even if they were assessed not to be impaired individually. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 60 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets that are carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income and accumulated under the heading of available-for-sale revaluation reserve. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

3.25.7 Derecognition of financial assets

The Group derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

NZ IFRS 7.21 **3.26 Financial liabilities and equity instruments**

3.26.1 Classification as debt or equity

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

3.26.2 Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by a group entity are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Company's own equity instruments is recognised and deducted directly in equity. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Company's own equity instruments.

3.26.3 Compound instruments

The component parts of compound instruments (convertible notes) issued by the Company are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument. Conversion option that will be settled by the exchange of a fixed amount of cash or another financial asset for a fixed number of the Company's own equity instruments is an equity instrument.

At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for similar non-convertible instruments. This amount is recorded as a liability on an amortised cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

The conversion option classified as equity is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognised and included in equity, net of income tax effects, and is not subsequently remeasured. In addition, the conversion option classified as equity will remain in equity until the conversion option is exercised, in which case, the balance recognised in equity will be transferred to [other equity [describe]]. When the conversion option remains unexercised at the maturity date of the convertible note, the balance recognised in equity will be transferred to [retained profits/other equity [describe]]. No gain or loss is recognised in profit or loss upon conversion or expiration of the conversion option.

Transaction costs that relate to the issue of the convertible notes are allocated to the liability and equity components in proportion to the allocation of the gross proceeds. Transaction costs relating to the equity component are recognised directly in equity. Transaction costs relating to the liability component are included in the carrying amount of the liability component and are amortised over the lives of the convertible notes using the effective interest method.

3.26.4 *Financial liabilities*

Financial liabilities are classified as either financial liabilities 'at FVTPL' or 'other financial liabilities'.

3.26.4.1 *Financial liabilities at FVTPL*

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or it is designated as at FVTPL.

A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument.

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise; or
- the financial liability forms part of a group of financial assets or financial liabilities or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Group's documented risk management or investment strategy, and information about the grouping is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and NZ IAS 39 permits the entire combined contract to be designated as at FVTPL.

NZ IFRS 7.B5(e)

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item. Fair value is determined in the manner described in note 40.

3.26.4.2 *Other financial liabilities*

Other financial liabilities (including borrowings and trade and other payables) are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

3.26.4.3 Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payments when due in accordance with the terms of a debt instrument.

Financial guarantee contracts issued by a group entity are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of the obligation under the contract, as determined in accordance with NZ IAS 37; and
- the amount initially recognised less, where appropriate, cumulative amortisation recognised in accordance with the revenue recognition policies.

3.26.4.4 Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

NZ IFRS 7.21 **3.27 Derivative financial instruments**

The Group enters into a variety of derivative financial instruments to manage its exposure to interest rate and foreign exchange rate risks, including foreign exchange forward contracts, interest rate swaps and cross currency swaps. Further details of derivative financial instruments are disclosed in note 40.

Derivatives are initially recognised at fair value at the date the derivative contracts are entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognised in profit or loss immediately unless the derivative is designated and effective as a hedging instrument, in which event the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

3.27.1 Embedded derivatives

Derivatives embedded in non-derivative host contracts are treated as separate derivatives when they meet the definition of a derivative, their risks and characteristics are not closely related to those of the host contracts and the contracts are not measured at FVTPL.

NZ IFRS 7.21 **3.28 Hedge accounting**

The Group designates certain hedging instruments, which include derivatives, embedded derivatives and non-derivatives in respect of foreign currency risk, as either fair value hedges, cash flow hedges, or hedges of net investments in foreign operations. Hedges of foreign exchange risk on firm commitments are accounted for as cash flow hedges.

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item attributable to the hedged risk.

Note 40 sets out details of the fair values of the derivative instruments used for hedging purposes.

3.28.1 Fair value hedges

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognised in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognised in profit or loss in the line item relating to the hedged item.

Source

NZ IFRS RDR Holdings Limited

NZ IAS 1.10(e),(ea),
51(b),(c)Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortised to profit or loss from that date.

3.28.2 Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognised in other comprehensive income and accumulated under the heading of cash flow hedging reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognised in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item affects profit or loss, in the same line as the recognised hedged item. However, when the hedged forecast transaction results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously recognised in other comprehensive income and accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the Group revokes the hedging relationship, when the hedging instrument expires or is sold, terminated, or exercised, or when it no longer qualifies for hedge accounting. Any gain or loss recognised in other comprehensive income and accumulated in equity at that time remains in equity and is recognised when the forecast transaction is ultimately recognised in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognised immediately in profit or loss.

3.28.3 Hedges of net investments in foreign operations

Hedges of net investments in foreign operations are accounted for similarly to cash flow hedges. Any gain or loss on the hedging instrument relating to the effective portion of the hedge is recognised in other comprehensive income and accumulated under the heading of foreign currency translation reserve. The gain or loss relating to the ineffective portion is recognised immediately in profit or loss, and is included in the 'other gains and losses' line item. Gains and losses on the hedging instrument relating to the effective portion of the hedge accumulated in the foreign currency translation reserve are reclassified to profit or loss on the disposal of the foreign operation.

4. Critical accounting judgements and key sources of estimation uncertainty

COMMENTARY

The following are examples of the types of disclosures that might be required in this area.

Judgements in determining:

- (a) *whether financial assets are held-to-maturity investments;*
- (b) *when substantially all the significant risks and rewards of ownership of financial assets and lease assets are transferred to other entities;*
- (c) *whether, in substance, particular sales of goods are financing arrangements and therefore do not give rise to revenue;*
- (d) *whether the substance of the relationship between the entity and a special purpose entity indicates that the entity controls the special purpose entity;*
- (e) *whether the entity controls an investee;*
- (f) *whether an available-for-sale investment is subject to significant or prolonged impairment;*
- (g) *what is the functional currency of the entity;*
- (h) *how the entity has satisfied the conditions for designating financial assets or liabilities as at fair value through profit or loss;*
- (i) *whether owner-occupied property is property, plant and equipment, or investment property and the criteria used to determine such classifications;*
- (j) *the allocation of cost between land and buildings on acquisition; and*
- (k) *the threshold applied when determining if a significant or prolonged decline has occurred for AFS instruments.*

Assumptions and estimates regarding:

- (l) *useful lives, residual values, dismantling costs, and depreciation methods in determining asset carrying values and*

NZ IFRS RDR Holdings Limited

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

recoverable values;

(m) the effect of technological obsolescence on inventories;

(n) the estimated selling price and estimated costs to sell, in determining the realisable value of inventories;

(o) the outcome of litigation, in determining provisions;

(p) the recoverability of deferred tax assets; and

(q) future increases in wages and salaries and anticipated employee turnover, in determining long term employee benefit liabilities.

The matters disclosed will be dictated by the circumstances of the individual entity, and by the significance of judgements and estimates made to the performance and financial position of the entity.

Instead of disclosing this information in a separate note, it may be more appropriate to include such disclosures in the relevant asset and liability notes, or as part of the relevant accounting policy disclosures.

NZ IFRS 12.7 requires entities to disclose information about significant judgements and assumptions they have made in determining (i) whether they have control of another entity, (ii) whether they have joint control of an arrangement or significant influence over another entity, and (iii) the type of joint arrangement when the arrangement has been structured through a separate vehicle.

NZ IFRS 12.7

In the application of the Group’s accounting policies, which are described in note 3, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

NZ IAS 1.122

4.1 Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see note 4.2 below), that the directors have made in the process of applying the Group’s accounting policies and that have the most significant effect on the amounts recognised in the consolidated financial statements.

4.1.1 Revenue recognition

Note 13.6 describes the expenditure required in the year for rectification work carried out on goods supplied to one of the Group’s major customers. These goods were delivered to the customer in the months of January to July 2013, and shortly thereafter the defects were identified by the customer. Following negotiations, a schedule of works was agreed, which will involve expenditure by the Group until 2014. In the light of the problems identified, the directors were required to consider whether it was appropriate to recognise the revenue from these transactions of CU19 million in the current year, in line with the Group’s general policy of recognising revenue when goods are delivered, or whether it was more appropriate to defer recognition until the rectification work was complete.

In making their judgement, the directors considered the detailed criteria for the recognition of revenue from the sale of goods set out in NZ IAS 18 and, in particular, whether the Group had transferred to the buyer the significant risks and rewards of ownership of the goods. Following the detailed quantification of the Group’s liability in respect of rectification work, and the agreed limitation on the customer’s ability to require further work or to require replacement of the goods, the directors are satisfied that the significant risks and rewards have been transferred and that recognition of the revenue in the current year is appropriate, in conjunction with the recognition of an appropriate provision for the rectification costs.

4.1.2 Held-to-maturity financial assets

The directors have reviewed the Group’s held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group’s positive intention and ability to hold those assets to maturity. The carrying amount of the held-to-maturity financial assets is CU5.905 million (31 December 2012: CU4.015 million). Details of these assets are set out in note 22.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

4.1.3 *Deferred taxation on investment properties*

For the purposes of measuring deferred tax liabilities or deferred tax assets arising from investment properties that are measured using the fair value model, the directors have reviewed the Group's investment property portfolios and concluded that the Group's investment properties are not held under a business model whose objective is to consume substantially all of the economic benefits embodied in the investment properties over time, rather than through sale. Therefore, in determining the Group's deferred taxation on investment properties, the directors have determined that the presumption that the carrying amounts of investment properties measured using the fair value model are recovered entirely through sale is not rebutted. As a result, the Group has not recognised any deferred taxes on changes in fair value of investment properties as the Group is not subject to any income taxes on the fair value changes of the investment properties on disposal.

NZ IFRS 12.7(a) **4.1.4** *Control over C Plus Limited*

NZ IFRS 12.9(b) Note 19 describes that C Plus Limited is a subsidiary of the Group even though the Group has only a 45% ownership interest and has only 45% of the voting rights in C Plus Limited. C Plus Limited is listed on the stock exchange of A Land. The Group has held its 45% ownership since June 2010 and the remaining 55% of the ownership interests are held by thousands of shareholders that are unrelated to the Group.

The directors of the Company assessed whether or not the Group has control over C Plus Limited based on whether the Group has the practical ability to direct the relevant activities of C Plus Limited unilaterally. In making their judgement, the directors considered the Group's absolute size of holding in C Plus Limited and the relative size of and dispersion of the shareholdings owned by the other shareholders. After assessment, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of C Plus Limited and therefore the Group has control over C Plus Limited.

NZ IFRS 12.7(a) **4.1.5** *Control over Subtwo Limited*

NZ IFRS 12.9(b) Note 19 describes that Subtwo Limited is a subsidiary of the Group although the Group only owns a 45% ownership interest in Subtwo Limited. Based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited that has the power to direct the relevant activities of Subtwo Limited. Therefore, the directors of the Company concluded that the Group has the practical ability to direct the relevant activities of Subtwo Limited unilaterally and hence the Group has control over Subtwo Limited.

NZ IFRS 12.7(b) **4.1.6** *Significant influence over B Plus Limited*

NZ IFRS 12.9(e) Note 20 describes that B Plus Limited is an associate of the Group although the Group only owns a 17% ownership interest in B Plus Limited. The Group has significant influence over B Plus Limited by virtue of its contractual right to appoint two out of seven directors to the board of directors of that company.

NZ IFRS 12.7(b),(c) **4.1.7** *Classification of Electronics JV Limited as a joint venture*

Electronics JV Limited is a limited liability company whose legal form confers separation between the parties to the joint arrangement and the company itself. Furthermore, there is no contractual arrangement or any other facts and circumstances that indicate that the parties to the joint arrangement have rights to the assets and obligations for the liabilities of the joint arrangement. Accordingly, Electronics JV Limited is classified as a joint venture of the Group. See note 20A for details.

NZ IAS 1.125,129 **4.2** *Key sources of estimation uncertainty*

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

4.2.1 Recoverability of internally generated intangible asset

During the year, the directors considered the recoverability of the Group's internally generated intangible asset arising from its e-business development, which is included in the consolidated statement of financial position at 31 December 2013 with a carrying amount of CU0.5 million (31 December 2012: CU0.5 million).

The project continues to progress in a satisfactory manner, and customer reaction has reconfirmed the directors' previous estimates of anticipated revenues from the project. However, increased competitor activity has caused the directors to reconsider their assumptions and anticipated margins on these products. Detailed sensitivity analysis has been carried out and the directors are confident that the carrying amount of the asset will be recovered in full, even if returns are reduced. This situation will be closely monitored, and adjustments made in future periods if future market activity indicates that such adjustments are appropriate.

4.2.2 Impairment of goodwill

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the directors to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value. Where the actual future cash flows are less than expected, a material impairment loss may arise.

The carrying amount of goodwill at 31 December 2013 was CU20.5 million (31 December 2012: CU24.3 million) after an impairment loss of CU235,000 was recognised during 2013 (2012: nil). Details of the impairment loss calculation are set out in note 17.

4.2.3 Useful lives of property, plant and equipment

As described at 3.18 above, the Group reviews the estimated useful lives of property, plant and equipment at the end of each reporting period. During the current year, the directors determined that the useful lives of certain items of equipment should be shortened, due to developments in technology.

The financial effect of this reassessment, assuming the assets are held until the end of their estimated useful lives, is to increase the consolidated depreciation expense in the current financial year and for the next 3 years, by the following amounts:

	CU'000
2013	879
2014	607
2015	144
2016	102

4.2.4 Fair value measurements and valuation processes

Some of the Group's assets and liabilities are measured at fair value for financial reporting purposes. The board of directors of the Company has set up a valuation committee, which is headed up by the Chief Financial Officer of the Company, to determine the appropriate valuation techniques and inputs for fair value measurements.

**NZ IFRS 13.93(g),
NZ IFRS 13.IE65**

In estimating the fair value of an asset or a liability, the Group uses market-observable data to the extent it is available. Where Level 1 inputs are not available, the Group engages third party qualified valuers to perform the valuation. The valuation committee works closely with the qualified external valuers to establish the appropriate valuation techniques and inputs to the model. The Chief Financial Officer reports the valuation committee's findings to the board of directors of the Company every quarter to explain the cause of fluctuations in the fair value of the assets and liabilities.

Information about the valuation techniques and inputs used in determining the fair value of various assets and liabilities are disclosed in notes 15, 16 and 40.

Source **NZ IFRS RDR Holdings Limited**

5. Revenue

NZ IAS 18.35(b) The following is an analysis of the Group’s revenue for the year from continuing operations (excluding investment income – see note 7).

	Year ended 31/12/13 CU’000	Year ended 31/12/12 CU’000 (restated)
NZ IAS 18.35(b)(i) Revenue from the sale of goods	119,248	129,087
NZ IAS 18.35(b)(ii) Revenue from the rendering of services	16,388	18,215
NZ IAS 11.39(a) Construction contract revenue	5,298	4,773
	140,934	152,075

6. Segment information

COMMENTARY

NZ IFRS 8.2(b) *The following segment information is required by NZ IFRS 8 Operating Segments to be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):*

(a) *whose debt or equity instruments are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local and regional markets); or*

(b) *that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing any class of instruments in a public market.*

As tier 2 entities are not in scope of NZ IFRS 8, they will not be required to disclose segment information and it has been shaded below.

6.1 Products and services from which reportable segments derive their revenues

NZ IFRS 8.22 Information reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance focuses on the types of goods or services delivered or provided, and in respect of the ‘electronic equipment’ and ‘leisure goods’ operations, the information is further analysed based on the different classes of customers. The directors of the Company have chosen to organise the Group around differences in products and services. No operating segments have been aggregated in arriving at the reportable segments of the Group.

Specifically, the Group’s reportable segments under NZ IFRS 8 are as follows:

Electronic equipment - direct sales
- wholesalers
- internet sales

Leisure goods - wholesalers
- retail outlets

Computer software – Installation of computer software for specialised business applications

Construction – Construction of residential properties.

The leisure goods segments supply sports shoes and equipment, as well as outdoor play equipment.

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

6.2 Segment revenues and results

The following is an analysis of the Group's revenue and results from continuing operations by reportable segment.

NZ IFRS 8.23,23(a)

	Segment revenue		Segment profit	
	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000
		(restated)		(restated)
Electronic equipment - direct sales	37,525	39,876	6,621	9,333
- wholesalers	20,194	22,534	6,618	5,954
- internet sales	27,563	29,699	6,604	5,567
Leisure goods - wholesalers	13,514	18,332	3,252	4,110
- retail outlets	20,452	18,646	4,921	4,372
Computer software	16,388	18,215	3,201	5,260
Construction	5,298	4,773	389	1,500
Total for continuing operations	140,934	152,075	31,606	36,096
Share of profit of associates			866	1,209
Share of profit of a joint venture			337	242
Gain recognised on disposal of interest in former associate			581	-
Investment income			3,633	2,396
Other gains and losses			647	1,005
Central administration costs and directors' salaries			(2,933)	(2,666)
Finance costs			(4,420)	(6,025)
Profit before tax (continuing operations)			30,317	32,257

NZ IFRS 8.28(a)

NZ IFRS 8.28(b)

NZ IFRS 8.23(b)

Segment revenue reported above represents revenue generated from external customers. There were no inter-segment sales in the current year (2012: nil).

NZ IFRS 8.27

The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit represents the profit before tax earned by each segment without allocation of central administration costs and directors' salaries, share of profit of associates, share of profit of a joint venture, gain recognised on disposal of interest in former associate, investment income, other gains and losses, as well as finance costs. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

6.3 Segment assets and liabilities

NZ IFRS 8.23

	31/12/13 CU'000	31/12/12 CU'000

NZ IFRS 8.28(d)	90,810	90,902

NZ IFRS 8.27 For the purposes of monitoring segment performance and allocating resources between segments:

NZ IFRS 8.27(c)

- all assets are allocated to reportable segments other than interests in associates, interests in a joint venture, 'other financial assets', and current and deferred tax assets. Goodwill is allocated to reportable segments as described in note 17.1. Assets used jointly by reportable segments are allocated on the basis of the revenues earned by individual reportable segments; and

NZ IFRS 8.27(d)

- all liabilities are allocated to reportable segments other than borrowings, 'other financial liabilities', current and deferred tax liabilities. Liabilities for which reportable segments are jointly liable are allocated in proportion to segment assets

6.4 Other segment information

6.5 Revenue from major products and services

NZ IFRS 8.32 The following is an analysis of the Group's revenue from continuing operations from its major products and services.

	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000 (restated)
NZ IFRS 8.32 Electronic equipment	85,282	92,109
NZ IFRS 8.32 Sports shoes	11,057	11,850
NZ IFRS 8.32 Sports equipment	9,946	11,000
NZ IFRS 8.32 Outdoor play equipment	12,963	14,128
NZ IFRS 8.32 Installation of computer software	16,388	18,215
NZ IFRS 8.32 Construction	5,298	4,773
	140,934	152,075

6.6 Geographical information

The Group operates in three principal geographical areas – A Land (country of domicile), B Land and C Land.

NZ IFRS 8.33(a),(b) The Group's revenue from continuing operations from external customers by location of operations and information about its non-current assets* by location of assets are detailed below.

	Revenue from external customers		Non-current assets *	
	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000 (restated)	31/12/13 CU'000	31/12/12 CU'000 (restated)
NZ IFRS 8.33 A Land	84,202	73,971	94,085	84,675
NZ IFRS 8.33 B Land	25,898	43,562	21,411	25,745
NZ IFRS 8.33 C Land	25,485	25,687	16,085	19,341
NZ IFRS 8.33 Other	5,349	8,855	5,826	8,809
	140,934	152,075	137,407	138,570

* Non-current assets exclude those relating to toy and bicycle operations and non-current assets classified as held for sale, and exclude financial instruments, deferred tax assets, post-employment benefit assets, and assets arising from insurance contracts.

6.7 Information about major customers

NZ IFRS 8.34 Included in revenues arising from direct sales of electronic equipment of CU37.5 million (2012: CU39.9 million) (see note 6.2 above) are revenues of approximately CU25.6 million (2012: CU19.8 million) which arose from sales to the Group's largest customer. No other single customers contributed 10% or more to the Group's revenue for both 2013 and 2012.

COMMENTARY

NZ IFRS 7.RDR 20.1 *Tier 2 entities are not required to make the separate disclosure required by NZ IFRS 7.20(a)(i) (i.e. they are not required to separate FVTPL items into those held for trading and those designated as at FVTPL).*

- (i) The net loss on these financial liabilities designated as at FVTPL includes a gain of CU125,000 resulting from the decrease in fair value of the liabilities, offset by dividends of CU613,000 paid during the year.
- (ii) The amount represents a net gain on non-derivative held for trading financial assets (see note 22) and comprises an increase in fair value of CU202,000 (2012: 99,000), including interest of CU46,000 received during the year (2012: CU27,000).
- (iii) The amount represents a net loss arising on an interest rate swap that economically hedges the fair value of the redeemable cumulative preference shares, but for which hedge accounting is not applied (see note 34). The net loss on the interest rate swap comprises an increase in fair value of CU51,000 of the swap, including interest of CU3,000 paid during the year.

No other gains or losses have been recognised in respect of loans and receivables or held-to-maturity investments, other than as disclosed in notes 7 and 9 and impairment losses recognised/reversed in respect of trade receivables (see notes 13 and 25).

10.5 Deferred tax balances

The following is the analysis of deferred tax assets/(liabilities) presented in the consolidated statement of financial position:

	31/12/13 CU'000	31/12/12 CU'000 (restated)
Deferred tax assets	2,083	1,964
Deferred tax liabilities	(6,782)	(5,224)
	(4,699)	(3,260)

COMMENTARY

The following illustrative deferred tax balances disclosure is considered "best practice". The only requirements for a breakdown by type of temporary difference (i.e. the first column) are the opening and closing balances (the second and last columns), and the amount charged to income (being the aggregate of the third and sixth columns). The other columns could be amalgamated or excluded so long as the other disclosures required by NZ IAS 12 are made elsewhere in the financial statements in aggregate.

11. Discontinued operations

COMMENTARY
<i>Tier 2 entities are not required to disclose the segment in which the non-current asset (or disposal group) is presented.</i>

NZ IFRS 5.41(d)

11.1 Disposal of toy manufacturing operations

NZ IFRS 5.30
NZ IFRS 5.41(a)-(c)

On 28 September 2013, the Company entered into a sale agreement to dispose of Subzero Limited, which carried out all of the Group's toy manufacturing operations. The proceeds of sale substantially exceeded the carrying amount of the related net assets and, accordingly, no impairment losses were recognised on the reclassification of these operations as held for sale. The disposal of the toy manufacturing operations is consistent with the Group's long-term policy to focus its activities in the electronic equipment and other leisure goods markets. The disposal was completed on 30 November 2013, on which date control of the toy manufacturing operations passed to the acquirer. Details of the assets and liabilities disposed of, and the calculation of the profit or loss on disposal, are disclosed in note 45.

11.2 Plan to dispose of the bicycle business

NZ IFRS 5.30
NZ IFRS 5.41(a)-(c)

On 30 November 2013, the directors announced a plan to dispose of the Group's bicycle business. The disposal is consistent with the Group's long-term policy to focus its activities on the electronic equipment and other leisure goods markets. The Group is actively seeking a buyer for its bicycle business and expects to complete the sale by 31 July 2014. The Group has not recognised any impairment losses in respect of the bicycle business, neither when the assets and liabilities of the operation were reclassified as held for sale nor at the end of the reporting period (see note 12).

Net cash outflows from financing activities	(5,000)	-
	4,148	7,078

The bicycle business has been classified and accounted for at 31 December 2013 as a disposal group held for sale (see note 12).

12. Assets classified as held for sale

COMMENTARY

NZ IFRS 5.41(d)

Tier 2 entities are not required to disclose the segment in which the non-current asset (or disposal group) is presented.

	31/12/13 CU'000	31/12/12 CU'000
Freehold land held for sale (i)	1,260	-
Assets related to bicycle business (ii)	21,076	-
	22,336	-
Liabilities associated with assets held for sale (ii)	3,684	-

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

- NZ IFRS 5.41(a)-(c) (i) The Group intends to dispose of a parcel of freehold land it no longer utilises in the next 12 months. The property located on the freehold land was previously used in the Group's toy operations and has been fully depreciated. A search is underway for a buyer. No impairment loss was recognised on reclassification of the land as held for sale nor as at 31 December 2013 as the directors of the Company expect that the fair value (estimated based on the recent market prices of similar properties in similar locations) less costs to sell is higher than the carrying amount.
- NZ IFRS 5.41(a)-(c),
NZ IFRS 5.38 (ii) As described in note 11, the Group plans to dispose of its bicycle business and anticipates that the disposal will be completed by 31 July 2014. The Group is currently in negotiation with some potential buyers and the directors of the Company expect that the fair value less costs to sell of the business will be higher than the aggregate carrying amount of the related assets and liabilities. Therefore, no impairment loss was recognised on reclassification of the assets and liabilities as held for sale nor as at 31 December 2013. The major classes of assets and liabilities of the bicycle business at the end of the reporting period are as follows:

		<u>31/12/13</u> <u>CU'000</u>
NZ IFRS 5.38	Goodwill	1,147
NZ IFRS 5.38	Property, plant and equipment	16,944
NZ IFRS 5.38	Inventories	2,090
NZ IFRS 5.38	Trade receivables	720
NZ IFRS 5.38	Cash and bank balances	175
		<u>21,076</u>
Assets of bicycle business classified as held for sale		
NZ IFRS 5.38	Trade payables	(3,254)
NZ IFRS 5.38	Current tax liabilities	-
NZ IFRS 5.38	Deferred tax liabilities	(430)
		<u>(3,684)</u>
Liabilities of bicycle business associated with assets classified as held for sale		
Net assets of bicycle business classified as held for sale		<u>17,392</u>

13. Profit for the year from continuing operations

COMMENTARY

NZ IAS 1.97

When items of income and expense are material, their nature and amount shall be disclosed separately.

Profit for the year from continuing operations is attributable to:

		<u>Year ended</u> <u>31/12/13</u> <u>CU'000</u>	<u>Year ended</u> <u>31/12/12</u> <u>CU'000</u> <u>(restated)</u>

51(b),(c)**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued****14. Earnings per share****COMMENTARY**

NZ IAS 33.2

NZ IAS 33 Earnings per Share requires that earnings per share (EPS) information be presented in the consolidated financial statements of a group with a parent (and in the separate or individual financial statements of an entity):

- (a) whose ordinary shares or potential ordinary shares are traded in a public market (a domestic or foreign stock exchange or an over-the-counter market, including local or regional markets); or
- (b) that files, or is in the process of filing, its (consolidated) financial statements with a securities commission or other regulatory organisation for the purpose of issuing ordinary shares in a public market.

As tier 2 entities are not in scope of NZ IAS 33, they will not be required to disclose earnings per share information and it has been shaded below.

NZ IAS 33.3

If other entities choose to disclose EPS information voluntarily in their financial statements that comply with NZ IFRSs, the disclosures in relation to the EPS information should comply fully with the requirements set out in NZ IAS 33.

	Year ended 31/12/13 Cents per share	Year ended 31/12/12 Cents per share (restated)

14.3 Impact of changes in accounting policies

COMMENTARY

NZ IFRS 10.C2A
NZ IFRS 11.C1B

When an entity applies an NZ IFRS for the first time that has an effect on the current or prior period, NZ IAS 8.28(f) requires the entity to disclose, for the current and each prior period presented, to the extent practicable, the amount of the adjustment for each financial statement line item affected and for basic and diluted earnings per share. NZ IFRS 10 and NZ IFRS 11 contain specific transitional provisions that require entities to disclose only the effect for the period immediately preceding the date of initial application of the Standards (i.e. 2012). Therefore, the table below does not present the effect for the current period (i.e. 2013) regarding the application of NZ IFRSs 10 and 11.

NZ IAS 8.28(f)(ii)

Changes in the Group's accounting policies during the year are described in detail in note 2.1. The changes in accounting policies affected only the Group's results from continuing operations. To the extent that those changes have had an impact on results reported for 2013 and 2012, they have had an impact on the amounts reported for earnings per share.

The following table summarises that effect on both basic and diluted earnings per share

	Increase (decrease) in profit for the year attributable to the owners of the Company		Increase (decrease) in basic earnings per share		Increase (decrease) in diluted earnings per share	
	Year ended 31/12/13	Year ended 31/12/12	Year ended 31/12/13 Cents per share	Year ended 31/12/12 Cents per share	Year ended 31/12/13 Cents per share	Year ended 31/12/12 Cents per share

NZ IAS 16.73(c)
NZ IAS 16.73(c)
NZ IAS 16.73(c)

The following useful lives are used in the calculation of depreciation:

Buildings	20 – 30 years
Plant and equipment	5 – 15 years
Equipment under finance lease	5 years

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013 - continued**

15.1 Fair value measurement of the Group's freehold land and buildings

NZ IAS 16.77(a),(b) The Group's freehold land and buildings are stated at their revalued amounts, being the fair value at the date of revaluation, less any subsequent accumulated depreciation and subsequent accumulated impairment losses. The fair value measurements of the Group's freehold land and buildings as at 31 December 2013 and 31 December 2012 were performed by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of A Land, and they have appropriate qualifications and recent experience in the fair value measurement of properties in the relevant locations.

NZ IFRS 13.91(a), 93(d) The fair value of the freehold land was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/other methods [describe]]. The fair value of the buildings was determined using [the cost approach that reflects the cost to a market participant to construct assets of comparable utility and age, adjusted for obsolescence/other methods (describe)]. There has been no change to the valuation technique during the year.

COMMENTARY
Depending on the valuation method used for level 2 or level 3 items, for example if a discounted cash flow methodology was used, additional disclosure of the valuation technique and inputs used may be required. For level 3 items entities disclose quantitative information about the significant unobservable inputs used.

NZ IFRS 13.93(d)

	Level 1	Level 2	Level 3	Total
	CU'000	CU'000	CU'000	CU'000
Fair value as at 31/12/13				
A manufacturing plant in A land that contains:				
- freehold land	-	-	13,868	13,868
- buildings	-	-	11,147	11,147

COMMENTARY
The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only.

Details of the Group's freehold land and buildings and information about the fair value hierarchy as at 31 December 2013 are as follows:

NZ IFRS 13.93(c)
 NZ IFRS 13.95 There were no transfers between Level 1 and Level 2 during the year. [Where there had been a transfer between different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).]

COMMENTARY
NZ IFRS 13 contains specific transitional provisions such that entities that apply NZ IFRS 13 for the first time do not need to make the disclosures required by the Standard in comparative information provided for periods before initial application of the Standard. Nevertheless, an entity should provide disclosures for the prior period that were required by the then applicable Standards.

NZ IFRS 13.C3

NZ IAS 16.77(e) Had the Group's freehold and buildings (other than land and buildings classified as held for sale or included in a disposal group) been measured on a historical cost basis, their carrying amount would have been as follows.

	31/12/13	31/12/12
	CU'000	CU'000
Freehold land	11,957	13,104
Buildings	7,268	10,340

 NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**
15.2 Impairment losses recognised in the year

NZ IAS 36.130(a)-(g)

During the year, as the result of the unexpected poor performance of a manufacturing plant, the Group carried out a review of the recoverable amount of that manufacturing plant and the related equipment. These assets are used in the Group's electronic equipment reportable segment. The review led to the recognition of an impairment loss of CU1.09 million, which has been recognised in profit or loss. The Group also estimated the fair value less costs to sell of the manufacturing plant and the related equipment, which is based on the recent market prices of assets with similar age and obsolescence. The fair value less costs to sell is less than the value in use and hence the recoverable amount of the relevant assets has been determined on the basis of their value in use. The discount rate used in measuring value in use was 9% per annum. No impairment assessment was performed in 2012 as there was no indication of impairment.

NZ IAS 36.131

Additional impairment losses recognised in respect of property, plant and equipment in the year amounted to CU0.114 million. These losses are attributable to greater than anticipated wear and tear. Those assets have been impaired in full and they belonged to the Group's electronic equipment reportable segment.

NZ IAS 36.126(a),(b)

The impairment losses/(reversals) have been included in profit or loss in the [other expenses/cost of sales] line item.

15.3 Assets pledged as security

NZ IAS 16.74(a)

Freehold land and buildings with a carrying amount of approximately CU22 million (31 December 2012: approximately CU26.2 million) have been pledged to secure borrowings of the Group (see note 32). The freehold land and buildings have been pledged as security for bank loans under a mortgage. The Group is not allowed to pledge these assets as security for other borrowings or to sell them to another entity. In addition, the Group's obligations under finance leases (see note 38) are secured by the lessors' title to the leased assets, which have a carrying amount of CU28,000 (31 December 2012: CU162,000).

16. Investment property

16.1 Fair value measurement of the Group's investment properties

NZ IAS 40.75(e)
NZ IFRS 13.91(a), 93(d)

The fair value of the Group's investment property as at 31 December 2013 and 31 December 2012 has been arrived at on the basis of a valuation carried out on the respective dates by Messrs R & P Trent, independent valuers not related to the Group. Messrs R & P Trent are members of the Institute of Valuers of A Land, and they have appropriate qualifications and recent experience in the valuation of properties in the relevant locations. The fair value was determined [based on the market comparable approach that reflects recent transaction prices for similar properties/other methods [describe]]. In estimating the fair value of the properties, the highest and best use of the properties is their current use. There has been no change to the valuation technique during the year.

COMMENTARY

NZ IFRS 13.93(d)

For level 2 and level 3 hierarchy items, depending on the valuation method used (for example if a discounted cash flow methodology was used) additional disclosure of the valuation technique and inputs used may be required.

NZ IFRS 13.93(a),(b)

Details of the Group's investment properties and information about the fair value hierarchy as at 31 December 2013 are as follows:

Fair value as at 31/12/13	Level 1	Level 2	Level 3	Total
	CU'000	CU'000	CU'000	CU'000
Commercial property units located in A Land	-	-	1,968	1,968

NZ IFRS 13.93(c)

There were no transfers between Levels 1 and 2 during the year.

NZ IFRS 13.95

[Where there had been a transfer between the different levels of the fair value hierarchy, the Group should disclose the reasons for the transfer and the Group's policy for determining when transfers between levels are deemed to have occurred (for example, at the beginning or end of the reporting period or at the date of the event that caused the transfer).]

COMMENTARY

Fair value hierarchy
The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only.

NZ IFRS 13.C3

Transitional provisions
NZ IFRS 13 contains specific transitional provisions such that entities that apply NZ IFRS 13 for the first time do not need to make the disclosures required by the Standard in comparative information provided for periods before initial application of the Standard. Nevertheless, an entity should provide disclosures for the prior period that were required by the then applicable Standards

NZ IFRS 13.97

Fair value disclosures for investment properties measured using the cost model
For investment properties that are measured using the cost model, NZ IAS 40.79(e) requires the fair value of the properties to be disclosed in the notes to the financial statements. In that case, the fair value of the properties (for disclosure purpose) should be measured in accordance with NZ IFRS 13. In addition, NZ IFRS 13.97 requires the following disclosures:

- (a) at which level fair value measurement is categorised (i.e. Level 1, 2 or 3);
- (b) where the fair value measurement is categorised within Level 2 or Level 3, a description of the valuation technique(s) and the inputs used in the fair value measurement; and
- (c) the highest and best use of the properties (if different from their current use) and the reasons why the properties are being used in a manner that is different from their highest and best use.

NZ IAS 36.134,135

17.1 Allocation of goodwill to cash-generating units

Goodwill has been allocated for impairment testing purposes to the following cash-generating units.

- Leisure goods – retail outlets
- Electronic equipment – internet sales
- Construction operations – Murphy Construction
- Construction operations – other.

Before recognition of impairment losses, the carrying amount of goodwill (other than goodwill relating to discontinued operations) was allocated to cash-generating units as follows.

	31/12/13	31/12/12
	CU'000	CU'000
Leisure goods – retail outlets	10,162	9,620
Electronic equipment – internet sales	8,623	8,478
Construction operations – Murphy Construction	235	235
Construction operations – other	1,500	1,500
	20,520	19,833

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

Leisure goods – retail outlets

The recoverable amount of this cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 9% per annum (2012: 8% per annum).

Cash flow projections during the budget period are based on the same expected gross margins and raw materials price inflation throughout the budget period. The cash flows beyond that five-year period have been extrapolated using a steady 5% (2012: 5%) per annum growth rate which is the projected long-term average growth rate for the international leisure goods market. The directors believe that any reasonably possible change in the key assumptions on which recoverable amount is based would not cause the aggregate carrying amount to exceed the aggregate recoverable amount of the cash-generating unit.

Electronic equipment – internet sales

The recoverable amount of the 'electronic equipment – internet sales' segment as a cash-generating unit is determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 9% per annum (2012: 8% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 11% (2012: 10%) per annum growth rate. This growth rate exceeds by 0.5 percentage points the long-term average growth rate for the international electronic equipment market. However, among other factors, the internet sales cash-generating unit benefits from the protection of a 20-year patent on the Series Z electronic equipment, granted in 2008, which is still acknowledged as one of the top models in the market. The steady growth rate of 11% is estimated by the directors of the Company based on past performance of the cash-generating unit and their expectations of market development. The directors estimate that a decrease in growth rate by 1 to 5% would result in the aggregate carrying amount of the cash-generating unit exceeding the recoverable amount of the cash-generating unit by approximately CU 1 to 5 million. The directors believe that any reasonably possible change in the other key assumptions on which recoverable amount is based would not cause the 'electronic equipment – internet sales' carrying amount to exceed its recoverable amount.

Construction operations – Murphy Construction

NZ IAS 36.130

The goodwill associated with Murphy Construction arose when that business was acquired by the Group in 2007. The business has continued to operate on a satisfactory basis, but without achieving any significant increase in market share. During the year, the government of A Land introduced new regulations requiring registration and certification of builders for government contracts. In the light of the decision to focus the Group's construction activities through the other operating units in Subthree Limited, the directors have decided not to register Murphy Construction for this purpose, which means that it has no prospects of obtaining future contracts. The directors have consequently determined to write off the goodwill directly related to Murphy Construction amounting to CU235,000. No other write-down of the assets of Murphy Construction is considered necessary. Contracts in progress at the end of the year will be completed without loss to the Group.

NZ IAS 36.126(a)

The impairment loss has been included in profit or loss in the 'other expenses' line item.

Construction operations – other

The recoverable amount of the Group's remaining construction operations has been determined based on a value in use calculation which uses cash flow projections based on financial budgets approved by the directors covering a five-year period, and a discount rate of 9% per annum (2012: 8% per annum). Cash flows beyond that five-year period have been extrapolated using a steady 8% (2012: 8%) per annum growth rate. This growth rate does not exceed the long-term average growth rate for the construction market in A Land. The directors believe that any reasonably possible further change in the key assumptions on which recoverable amount is based would not cause the construction operations carrying amount to exceed its recoverable amount.

51(b),(c)Notes to the consolidated financial statements
for the year ended 31 December 2013- continued

Key assumptions

The key assumptions used in the value in use calculations for the leisure goods and electronic equipment cash-generating units are as follows.

Budgeted market share Average market share in the period immediately before the budget period, plus a growth of 1-2% of market share per year. The values assigned to the assumption reflect past experience and are consistent with the directors' plans for focusing operations in these markets. The directors believe that the planned market share growth per year for the next five years is reasonably achievable.

Budgeted gross margin Average gross margins achieved in the period immediately before the budget period, increased for expected efficiency improvements. This reflects past experience, except for efficiency improvements. The directors expect efficiency improvements of 3 - 5% per year to be reasonably achievable.

Raw materials price inflation Forecast consumer price indices during the budget period for the countries from which raw materials are purchased. The values assigned to the key assumption are consistent with external sources of information.

COMMENTARY

NZ IFRSs do not explicitly require an entity to disclose a list of its subsidiaries in the consolidated financial statements. Nevertheless, local laws or regulations may require an entity to make such a disclosure. The above disclosure is for information only (in respect of consolidated financial statements) and may have to be modified to comply with the additional local requirements. NZ IFRS 12.10(a) does require disclosure of information that enables users to understand the composition of the group.

New Zealand entities which are required to prepare parent financial statements should also consider, in respect of the parent entity, the requirements of NZ IAS 27 Separate Financial Statements and NZ IAS 24 Related Party Disclosures.

19.1 Composition of the Group

NZ IFRS 12.4, 10(a)(i), B4(a), B5-B6

Information about the composition of the Group at the end of the reporting period is as follows:

Principal activity	Place of incorporation and operation	Number of wholly-owned subsidiaries	
		31/12/13	31/12/12
Manufacture of electronic equipment	A Land	-	1
	C Land	1	1
Manufacture of leisure goods	A Land	1	-
Construction	A Land	1	1
Toys manufacturing	A Land	-	1
		3	4

Principal activity	Place of incorporation and operation	Number of non-wholly-owned subsidiaries	
		31/12/13	31/12/12
Manufacture of electronic equipment	A Land	2	1
Manufacture of leisure goods	A Land	2	1
	B Land	1	1
		5	3

**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**
19.2 Details of non-wholly owned subsidiaries that have material non-controlling interests

The table below shows details of non-wholly owned subsidiaries of the Group that have material non-controlling interests:

COMMENTARY							
<i>For illustrative purposes, the following non-wholly subsidiaries are assumed to have non-controlling interests that are material to the Group. The amounts disclosed below do not reflect the elimination of intragroup transactions.</i>							
Name of subsidiary	Place of incorporation and principal place of business	Proportion of ownership interests and voting rights held by non-controlling interests		Profit (loss) allocated to non-controlling interests		Accumulated non-controlling interests	
		31/12/13	31/12/12	31/12/13 CU '000	31/12/12 CU '000	31/12/12 CU '000	31/12/12 CU '000
Subtwo Limited (i)	A Land	55%	55%	1,180	860	10,320	9,140
Subfour Limited	A Land	30%	30%	1,020	980	10,680	9,660
C Plus Limited (ii)	A Land	55%	55%	392	464	2,445	2,053
Individually immaterial subsidiaries with non-controlling interests						3,316	1,205
						26,761	22,058

NZ IFRS 12.10(a)(ii)

NZ IFRS 12.9(b)

(i) The Group owns 45% equity shares of Subtwo Limited. However, based on the contractual arrangements between the Group and other investors, the Group has the power to appoint and remove the majority of the board of directors of Subtwo Limited. The relevant activities of Subtwo Limited are determined by the board of directors of Subtwo Limited based on simple majority votes. Therefore, the directors of the Group concluded that the Group has control over Subtwo Limited and Subtwo Limited is consolidated in these financial statements.

NZ IFRS 12.9(b)

(ii) C Plus Limited is listed on the stock exchange of A Land. Although the Group has only 45% ownership in C Plus Limited, the directors concluded that the Group has a sufficiently dominant voting interest to direct the relevant activities of C Plus Limited on the basis of the Group's absolute size of shareholding and the relative size of and dispersion of the shareholdings owned by other shareholders. The 55% ownership interests in C Plus Limited are owned by thousands of shareholders that are unrelated to the Group, none individually holding more than 2%.

NZ IFRS 12.12(g),

NZ IFRS 12.B10,

NZ IFRS 12.B11

Summarised financial information in respect of each of the Group's subsidiaries that has material non-controlling interests is set out below. The summarised financial information below represents amounts before intragroup eliminations.

19.3 Change in the Group's ownership interest in a subsidiary

NZ IFRS 12.18

During the year, the Group disposed of 10% of its interest in Subone Limited, reducing its continuing interest to 90%. The proceeds on disposal of CU213,000 were received in cash. An amount of CU179,000 (being the proportionate share of the carrying amount of the net assets of Subone Limited) has been transferred to non-controlling interests (see note 31). The difference of CU34,000 between the increase in the non-controlling interests and the consideration received has been credited to retained earnings (see note 30).

19.4 Significant restrictions

NZ IFRS 12.13

[When there are significant restrictions on the Company's or its subsidiaries' ability to access or use the assets and settle the liabilities of the Group, the Group should disclose the nature and extent of significant restrictions. Please see NZ IFRS 12.13 for details.]

COMMENTARY
<i>Tier 2 entities receive a partial concession for NZ IFRS 12.13. See NZ IFRS 12.13 for details.</i>

NZ IFRS 12.13

19.5 Financial support

NZ IFRS 12.14-17

[When the Group gives financial support to a consolidated structured entity, the nature and risks (including the type and amount of support provided) should be disclosed in the financial statements. Please see NZ IFRS 12.14 – 17 for details.]

COMMENTARY
<i>Tier 2 entities are not required to comply with NZ IFRS 12.16. See NZ IFRS 12.16 for details.</i>

NZ IFRS 12.16

20. Associates

20.1 Details of material associates

NZ IFRS 12.21(a),(a)(ii)

Details of each of the Group's material associates at the end of the reporting period are as follows:

COMMENTARY
<i>For illustrative purposes, the following associates are assumed to be material to the Group.</i>

Name of associate	Principal activity	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group	
			31/12/13	31/12/12
A Plus Limited (i) & (ii)	Transport	M Land	35% / 37%	35% / 37%
B Plus Limited (iii)	Steel manufacturing	A Land	17%	17%

NZ IFRS 12.21(b)(i), NZ IFRS 12.21(a)(iv)

All of the above associates are accounted for using the equity method in these consolidated financial statements. Pursuant to a shareholder agreement, the Company has the right to cast 37% of the votes at shareholder meetings of A Plus Limited.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

NZ IFRS 12.22(b),
NZ IFRS 12.21(b)(iii),
NZ IFRS 13.97

The financial year end date of A Plus Limited is 31 October. This was the reporting date established when that company was incorporated, and a change of reporting date is not permitted in M Land. For the purposes of applying the equity method of accounting, the financial statements of A Plus Limited for the year ended 31 October 2013 have been used, and appropriate adjustments have been made for the effects of significant transactions between that date and 31 December 2013. As at 31 December 2013, the fair value of the Group's interest in A Plus Limited, which is listed on the stock exchange of M Land, was CU8 million (31 December 2012: CU7.8 million) based on the quoted market price available on the stock exchange of M Land, which is a level 1 input in terms of NZ IFRS 13.

NZ IFRS 12.9(e)

Although the Group holds less than 20% of the equity shares of B Plus Limited, and it has less than 20% of the voting power at shareholder meetings, the Group exercises significant influence by virtue of its contractual right to appoint two out of seven directors to the board of directors of that company.

20.2 Change in the Group's ownership interest in an associate

NZ IAS 28.22

In the prior year, the Group held a 40% interest in E Plus Limited and accounted for the investment as an associate. In December 2013, the Group disposed of a 30% interest in E Plus Limited to a third party for proceeds of CU1.245 million (received in January 2014). The Group has accounted for the remaining 10% interest as an available-for-sale investment whose fair value at the date of disposal was CU360,000, which was determined using a discounted cash flow model (please describe key factors and assumptions used in determining the fair value). This transaction has resulted in the recognition of a gain in profit or loss, calculated as follows.

	<u>CU'000</u>
Proceeds of disposal	1,245
Plus: fair value of investment retained (10%)	360
Less: carrying amount of investment on the date of loss of significant influence	<u>(1,024)</u>
Gain recognised	<u>581</u>

The gain recognised in the current year comprises a realised profit of CU477,000 (being the proceeds of CU1.245 million less CU768,000 carrying amount of the interest disposed of) and an unrealised profit of CU104,000 (being the fair value less the carrying amount of the 10% interest retained). A current tax expense of CU143,000 arose on the gain realised in the current year, and a deferred tax expense of CU32,000 has been recognised in respect of the portion of the profit recognised that is not taxable until the remaining interest is disposed of.

20.3 Significant restriction

NZ IFRS 12.22(a)

[When there are significant restrictions on the ability of associates to transfer funds to the Group in the form of cash dividends, or to repay loans or advances made by the Group, the Group should disclose the nature and extent of significant restrictions in the financial statements. Please see NZ IFRS 12.22(a) for details.]

20A. Joint venture

COMMENTARY

Similar to the disclosures applicable to investments in associates, NZ IFRS 12 requires the following information to be disclosed for each of the Group's material joint ventures. In this model, the Group only has one joint venture, Electronics JV Limited, and for illustrative purposes, Electronics JV Limited is assumed to be material to the Group.

20A.1 Details of material joint venture

NZ IFRS 12.21(a),(a)(ii)

Details of the Group's material joint venture at the end of the reporting period is as follows:

Name of Joint Venture	Principal activity	Place of incorporation and operation	Proportion of ownership interest and voting power held by the Group	
			31/12/13	31/12/12
Electronics JV Limited	Manufacture of electronic equipment	C Land	33%	33%

NZ IFRS 12.21(b)(i)

The above joint venture is accounted for using the equity method in these consolidated financial statements.

NZ IFRS 12.B12,

NZ IFRS 12.B14,

NZ IFRS 12.21(b)(ii)

Summarised financial information in respect of the Group's material joint venture is set out below. The summarised financial information below represents amounts shown in the joint venture's financial statements prepared in accordance with NZ IFRSs [adjusted by the Group for equity accounting purposes].

21. Joint operation

NZ IFRS 12.21(a) The Group has a material joint operation, Project ABC. The Group has a 25% share in the ownership of a property located in Central District, City A. The property upon completion will be held for leasing purposes. The Group is entitled to a proportionate share of the rental income received and bears a proportionate share of the joint operation's expenses.

25.1 Trade receivables

NZ IFRS 7.33(b) The average credit period on sales of goods is 60 days. No interest is charged on trade receivables for the first 60 days from the date of the invoice. Thereafter, interest is charged at 2% per annum on the outstanding balance. The Group has recognised an allowance for doubtful debts of 100% against all receivables over 120 days because historical experience has been that receivables that are past due beyond 120 days are not recoverable. Allowances for doubtful debts are recognised against trade receivables between 60 days and 120 days based on estimated irrecoverable amounts determined by reference to past default experience of the counterparty and an analysis of the counterparty's current financial position.

NZ IFRS 7.34(c),
36(c) Before accepting any new customer, the Group uses an external credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed twice a year. 80% of the trade receivables that are neither past due nor impaired have the best credit scoring attributable under the external credit scoring system used by the Group. Of the trade receivables balance at the end of the year, CU6.9 million (31 December 2012: CU5.9 million) is due from Company A, the Group's largest customer (see notes 6.7 and 40.9). There are no other customers who represent more than 5% of the total balance of trade receivables.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

NZ IFRS 7.37

Trade receivables disclosed above include amounts (see below for aged analysis) that are past due at the end of the reporting period for which the Group has not recognised an allowance for doubtful debts because there has not been a significant change in credit quality and the amounts (which include interest accrued after the receivable is more than 60 days outstanding) are still considered recoverable.

NZ IFRS 7.37(a)

Age of receivables that are past due but not impaired

	31/12/13 CU'000	31/12/12 CU'000
60-90 days	1,100	700
91-120 days	462	333
Total	1,562	1,033
Average age (days)	84	85

NZ IFRS 7.16

Amounts written off during the year as uncollectible	-	(220)
Amounts recovered during the year	-	-
Impairment losses reversed	(103)	-
Foreign exchange translation gains and losses	-	-
Unwind of discount	-	-

Balance at end of the year

798	838
-----	-----

NZ IFRS 7.33(a),(b)

In determining the recoverability of a trade receivable, the Group considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the end of the reporting period. The concentration of credit risk is limited due to the fact that the customer base is large and unrelated.

NZ IFRS 7.37(b)

Included in the allowance for doubtful debts are individually impaired trade receivables amounting to CU63,000 (31 December 2012: CU430,000) which have been placed under liquidation. The impairment recognised represents the difference between the carrying amount of these trade receivables and the present value of the expected liquidation proceeds. The Group does not hold any collateral over these balances.

NZ IFRS 7.37(b)

Age of impaired trade receivables

	31/12/13 CU'000	31/12/12 CU'000
60-90 days	353	320
91-120 days	191	101
121+ days	654	717
Total	1,198	1,138

25.2 Transfer of financial assets

**NZ IFRS 7.14(a),
42D(a),(b),(c)**

During the year, the Group discounted trade receivables with an aggregate carrying amount of CU1.052 million to a bank for cash proceeds of CU1 million. If the trade receivables are not paid at maturity, the bank has the right to request the Group to pay the unsettled balance. As the Group has not transferred the significant risks and rewards relating to these trade receivables, it continues to recognise the full carrying amount of the receivables and has recognised the cash received on the transfer as a secured borrowing (see note 32).

NZ IFRS 7.42D(e)

At the end of the reporting period, the carrying amount of the trade receivables that have been transferred but have not been derecognised amounted to CU0.946 million and the carrying amount of the associated liability is CU0.923 million.

COMMENTARY	
NZ IAS 1.79, 106,106A	<p>Notes 28 to 31 below set out detailed descriptions and reconciliations for each class of share capital and each component of equity, as required by NZ IAS 1.79, NZ IAS 1.106 and NZ IAS 1.106A. NZ IAS 1 permits some flexibility regarding the level of detail presented in the statement of changes in equity and these supporting notes. NZ IAS 1 allows an analysis of other comprehensive income by item for each component of equity to be presented either in the statement of changes in equity or in the notes. For the purposes of the preparation of this model, the Group has elected to present the analysis of other comprehensive income in the notes.</p> <p>NZ IAS 1 also allows that some of the details regarding items of other comprehensive income (<i>income tax and reclassification adjustments</i>) may be disclosed in the notes rather than in the statement of profit or loss and other comprehensive income. Entities will determine the most appropriate presentation for their circumstances – electing to present much of the detail in the notes (as we have done in these model financial statements) ensures that the primary financial statements are not cluttered by unnecessary detail, but it does result in very detailed supporting notes.</p>
NZ IAS 1.90,92	<p><u>Tier 2 entities are not required to disclose income tax relating to each item of other comprehensive income or reclassifications adjustments, and to prevent duplication may choose to present the reduced disclosures on the face of the statement of profit or loss and other comprehensive income instead.</u></p> <p>Whichever presentation is selected, entities will need to ensure that the following requirements are met:</p> <p>(a) detailed reconciliations are required for each class of share capital (in the statement of changes in equity or in the notes);</p> <p>(b) detailed reconciliations are required for each component of equity – separately disclosing the impact on each such component of (i) profit or loss, (ii) each item of other comprehensive income, and (iii) transactions with owners in their capacity as owners (in the statement of changes in equity or in the notes);</p>
NZ IAS 1.90	<p>(c) the amount of income tax relating to each item of other comprehensive income should be disclosed (in the statement of profit or loss and other comprehensive income or in the notes); and</p>
NZ IAS 1.92	<p>(d) reclassification adjustments should be presented separately from the related item of other comprehensive income (in the statement of profit or loss and other comprehensive income or in the notes).</p>

28. Issued capital

		31/12/13	31/12/12
		CU'000	CU'000
Issued capital comprises:			
NZ IAS 1.79(a)	14,844,000 fully paid ordinary shares (31 December 2012: 20,130,000)	29,469	45,797

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

NZ IFRS 2.46, 48,
RDR 46.1 The fair value of shares issued for consulting services was determined by reference to the market rate for similar consulting services.

The shares bought back in the current year were cancelled immediately.

NZ IAS 1.79(a)(ii),(iv) **28.2 Partly paid ordinary shares**

	Number of shares	Share capital
	'000	CU'000
<i>Balance at 1 January 2012</i>	2,500	1,775
Movements [describe]	-	-
<i>Balance at 31 December 2012</i>	2,500	1,775
Movements [describe]	-	-
<i>Balance at 31 December 2013</i>	2,500	1,775

NZ IAS 1.79(a)(v) Partly paid ordinary shares carry one vote per share but do not carry a right to dividends. They have a right to a pro rata share of net assets on wind up after repayment of the convertible non-participating preference shares.

NZ IAS 1.79(a)(ii),(iv) **28.3 Convertible non-participating preference shares**

	Number of shares	Share capital
	'000	CU'000
<i>Balance at 1 January 2012</i>	1,100	1,100
Movements [describe]	-	-
<i>Balance at 31 December 2012</i>	1,100	1,100
Issue of shares	100	100
Share issue costs	-	(6)
Income tax relating to share issue costs	-	1
<i>Balance at 31 December 2013</i>	1,200	1,195

NZ IAS 1.79(a) Convertible non-participating preference shares, which have a par value of CU1, are entitled to receive a discretionary 10% preference dividend before any dividends are declared to the ordinary shareholders. The convertible non-participating preference shares can be converted into ordinary shares on a one-for-one basis at the option of the holder from 1 November 2016 to 31 October 2019. Any unconverted preference shares remaining after the end of the conversion period will remain as outstanding non-participating preference shares. Convertible non-participating preference shares have no right to share in any surplus assets or profits and no voting rights.

28.4 Share options granted under the Company's employee share option plan

NZ IAS 1.79(a)(vii) At 31 December 2013, executives and senior employees held options over 196,000 ordinary shares of the Company, of which 136,000 will expire on 30 March 2014 and 60,000 will expire on 28 September 2014. At 31 December 2012, executives and senior employees held options over 290,000 ordinary shares of the Company, of which 140,000 were due to expire on 30 March 2013 and 150,000 were due to expire on 29 September 2013.

NZ IAS 1.79(a)(vii) Share options granted under the Company's employee share option plan carry no rights to dividends and no voting rights. Further details of the employee share option plan are provided in note 42.1.

28.5 Redeemable cumulative preference shares

The redeemable cumulative preference shares issued by the Company have been classified as liabilities (see note 34).

COMMENTARY

If an entity has effectively disclosed the components of the reconciliations below elsewhere (e.g. on the face of the statement of changes in equity or in the income tax note), then these reconciliations may be removed.

Tier 2 entities are permitted to disclose aggregate current and deferred tax relating to other comprehensive income (which may be presented in another note), rather than tax on each component of other comprehensive income. As a result the individual tax lines are shaded in the movement schedules below.

COMMENTARY

 NZ IFRS 7.RDR 23.1 *A tier 2 entity is required to show only the total amount of cash flow hedges reclassified from equity and included in profit or loss for the period in accordance with NZ IFRS 7.23(d).*
Please also read the commentary preceeding note 28.

NZ IAS 1.79(b)

The cash flow hedging reserve represents the cumulative effective portion of gains or losses arising on changes in fair value of hedging instruments entered into for cash flow hedges. The cumulative gain or loss arising on changes in fair value of the hedging instruments that are recognised and accumulated under the heading of cash flow hedging reserve will be reclassified to profit or loss only when the hedged transaction affects the profit or loss, or included as a basis adjustment to the non-financial hedged item, consistent with the Group's accounting policy.

NZ IFRS 7.23(d)

Cumulative (gains)/ losses arising on changes in fair value of hedging instruments reclassified from equity into profit or loss during the year are included in the following line items:

	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000

NZ IAS 1.79(b)

Exchange differences relating to the translation of the results and net assets of the Group's foreign operations from their functional currencies to the Group's presentation currency (i.e. Currency Units) are recognised directly in other comprehensive income and accumulated in the foreign currency translation reserve. Gains and losses on hedging instruments that are designated as hedging instruments for hedges of net investments in foreign operations are included in the foreign currency translation reserve. Exchange differences previously accumulated in the foreign currency translation reserve (in respect of translating both the net assets of foreign operations and hedges of foreign operations) are reclassified to profit or loss on the disposal of the foreign operation.

NZ IAS 1.107,
RDR 107.1 On 23 May 2013, a dividend of 32.1 cents per share (total dividend CU6.515 million) was paid to holders of fully paid ordinary shares. In May 2012, the dividend paid was 31.64 cents per share (total dividend CU6.369 million).

NZ IAS 1.107,
RDR 107.1 Dividends of 10 cents per share were paid on convertible non-participating preference shares during the year (2012: 10 cents per share) amounting to a total dividend of CU0.12 million (2012: CU0.11 million).

NZ IAS 1.137(a),
NZ IAS 10.13

In respect of the current year, the directors propose that a dividend of 26.31 cents per share be paid to shareholders on 25 May 2014. This dividend is subject to approval by shareholders at the Annual General Meeting and has not been included as a liability in these consolidated financial statements. The proposed dividend is payable to all shareholders on the Register of Members on 21 April 2014. The total estimated dividend to be paid is CU3.905 million. The payment of this dividend will not have any tax consequences for the Group.

(i) As at 31 December 2013, executives and senior employees of Subsix Limited held options over 5,000 ordinary shares of Subsix Limited, of which 2,000 will expire on 12 March 2015 and 3,000 will expire on 17 September 2015. These share options were issued by Subsix Limited before it was acquired by the Group in the current year. All of the outstanding share options had vested by the acquisition date of Subsix Limited. CU5,000 represents the market-based measure of these share options measured in accordance with NZ IFRS 2 at the acquisition date. Further details of the employee share option plan are provided in note 42.2.

NZ IFRS 7.7 **32.1 Summary of borrowing arrangements**

- (i) Bills of exchange with a variable interest rate were issued in 2006. The current weighted average effective interest rate on the bills is 6.8% per annum (31 December 2012: 6.8% per annum).
- (ii) Amounts repayable to related parties of the Group. Interest of 8.0% - 8.2% per annum is charged on the outstanding loan balances (31 December 2012: 8.0% - 8.2% per annum).
- (iii) Fixed rate loans with a finance company with remaining maturity periods not exceeding 3 years (31 December 2012: 4 years). The weighted average effective interest rate on the loans is 8.15% per annum (31 December 2012: 8.10% per annum). The Group hedges a portion of the loans for interest rate risk via an interest rate swap exchanging fixed rate interest for variable rate interest. The outstanding balance is adjusted for fair value movements in the hedged risk, being movements in the inter-bank rate in A Land.
- NZ IAS 20.39(b),(c) (iv) On 17 December 2012, the Group received an interest-free loan of CU3 million from the government of A Land to finance staff training over a two-year period. The loan is repayable in full at the end of that two-year period. Using prevailing market interest rates for an equivalent loan of 7.2%, the fair value of the loan is estimated at CU2.61 million. The difference of CU390,000 between the gross proceeds and the fair value of the loan is the benefit derived from the interest-free loan and is recognised as deferred revenue (see note 41). Interest expenses CU188,000 were recognised on this loan in 2013 and CU202,000 will be recognised in 2014 (see note 9).
- (v) 2,500 perpetual notes with a coupon rate of 6% per annum were issued on 27 August 2013 at CU2.5 million principal value. Issue costs of CU0.595 million were incurred.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013- continued**

- (vi) Secured by a mortgage over the Group's freehold land and buildings (see note 15). The weighted average effective interest rate on the bank loans is 8.30% per annum (31 December 2012: 8.32% per annum).
- (vii) Secured by a charge over certain of the Group's trade receivables (see note 25.2).
- (viii) Secured by the assets leased. The borrowings are a mix of variable and fixed interest rate debt with repayment periods not exceeding 5 years (see note 38.2).

32.2 Breach of loan agreement

NZ IFRS 7.18

During the current year, the Group was late in paying interest for the first quarter on one of its loans with a carrying amount of CU5.00 million. The delay arose because of a temporary lack of funds on the date when interest was payable due to a technical problem on settlement. The interest payment outstanding of CU107,500 was repaid in full a week later, including the additional interest and penalty. The lender did not request accelerated repayment of the loan and the terms of the loan were not changed. Management has reviewed the Group's settlement procedures to ensure that such circumstances do not recur.

COMMENTARY

NZ IFRS 7.RDR 18.1

Tier 2 entities are not required to make the separate disclosure required by NZ IFRS 7.18. Instead, tier 2 entities disclose, only for loans payable recognised at the end of the reporting period for which there is a breach (of terms or default of principal, interest, sinking fund, or redemption of terms) that has not been remedied by the end of the reporting period:

- (e) *details of that breach or default;*
- (f) *the carrying amount of the related loans payable at the end of the reporting period;*
- (g) *whether the breach or default was remedied, or the terms of the loans payable were renegotiated, before the financial statements were authorised for issue.*

NZ IFRS 7.7

33. Convertible notes

On 13 September 2013, the Company issued 4.5 million 5.5% CU denominated convertible notes with an aggregate principal amount of CU4.5 million. Each note entitles the holder to convert to ordinary shares at a conversion price of CU1.00.

Conversion may occur at any time between 13 July 2014 and 12 September 2016. If the notes have not been converted, they will be redeemed on 13 September 2016 at CU1 each. Interest of 5.5% per annum will be paid quarterly up until the notes are converted or redeemed.

NZ IAS 32.28

The convertible notes contain two components: liability and equity elements. The equity element is presented in equity under the heading of "option premium on convertible notes". The effective interest rate of the liability element on initial recognition is 8.2% per annum.

	CU'000
Proceeds of issue	4,950
Liability component at the date of issue	(4,116)
Equity component	834
Liability component at the date of issue	4,116
Interest charged calculated at an effective interest rate of 8.2%	110
Interest paid	(82)
Liability component at 31 December 2013 (included in "borrowings" (note 32))	4,144

	15,117	18
Current	116	18
Non-current	15,001	-
	15,117	18

- (i) 3,000,000 redeemable cumulative preference shares with a coupon rate of 7% per annum were issued on 1 June 2013 at an issue price of CU5 per share. The shares are redeemable on 31 May 2015 at CU5 per share. The shares are unsecured borrowings of the Group and are designated as at FVTPL (see below).

These redeemable cumulative preference shares do not contain any equity component and are classified as financial liabilities in their entirety. In addition, the Group has designated these preference shares as financial liabilities at FVTPL as permitted by NZ IAS 39. The preference shares have fixed interest payments and mature on 31 May 2015.

To reduce the fair value risk of changing interest rates, the Group has entered into a pay-floating receive-fixed interest rate swap. The swap's notional principal is CU15 million and matches the principal of the cumulative redeemable preference shares. The swap matures on 31 May 2015. The designation of preference shares as at FVTPL eliminates the accounting mismatch arising on measuring the liability at amortised cost and measuring the derivative at FVTPL.

Dividends of CU613,000 (2012: nil) were paid on redeemable cumulative preference shares and are included in profit or loss in the "other gains and losses" line item.

- (ii) A pay-floating receive-fixed interest rate swap economically hedges fair value interest rate risk of redeemable cumulative preference shares.

NZ IFRS 3.B64(f)(iii),(g)(i)-(ii) (iii) Other financial liabilities include CU75,000 representing the estimated fair value of the contingent consideration relating to the acquisition of Subsix Limited (see note 44.2). There has been no change in the fair value of the contingent consideration since the acquisition date.

COMMENTARY

NZ IFRS 7.RDR 8.2 *Tier 2 entities are not required to make the separate disclosure required by NZ IFRS 7.8(e) (i.e. they are not required to separate FVTPL items into those held for trading and those designated as at FVTPL).*

Others [describe]	-	-	-	-
NZ IAS 37.84(a) <i>Balance at 31 December 2013</i>	3,058	528	730	4,316

- NZ IFRS 3.B64(j),
NZ IAS 37.84(a),
85(a),(b) (i) The provision for employee benefits represents annual leave and vested long service leave entitlements accrued and compensation claims made by employees. On the acquisition of Subsix Limited, the Group recognised an additional contingent liability of CU45,000 in respect of employees' compensation claims outstanding against that company, which was settled in February 2014. The decrease in the carrying amount of the provision for the current year results from benefits being paid in the current year.
- NZ IAS 37.85(a),(b) (ii) The provision for rectification work relates to the estimated cost of work agreed to be carried out for the rectification of goods supplied to one of the Group's major customers (see note 13.6). Anticipated expenditure for 2014 is CU1.94 million, and for 2015 is CU1.118 million. These amounts have not been discounted for the purposes of measuring the provision for rectification work, because the effect is not material.
- NZ IAS 37.85(a),(b) (iii) The provision for warranty claims represents the present value of the directors' best estimate of the future outflow of economic benefits that will be required under the Group's obligations for warranties under local sale of goods legislation. The estimate has been made on the basis of historical warranty trends and may vary as a result of new materials, altered manufacturing processes or other events affecting product quality.
- NZ IAS 37.85(a),(b) (iv) The provision for onerous lease contracts represents the present value of the future lease payments that the Group is presently obligated to make under non-cancellable onerous operating lease contracts, less revenue expected to be earned on the lease, including estimated future sub-lease revenue, where applicable. The estimate may vary as a result of changes in the utilisation of the leased premises and sub-lease arrangements where applicable. The unexpired terms of the leases range from 3 to 5 years.

39. Retirement benefit plans

39.1 Defined contribution plans

The Group operates defined contribution retirement benefit plans for all qualifying employees of its subsidiary in C Land. The assets of the plans are held separately from those of the Group in funds under the control of trustees. Where employees leave the plans prior to full vesting of the contributions, the contributions payable by the Group are reduced by the amount of forfeited contributions.

NZ IAS 19.43 The employees of the Group's subsidiary in B Land are members of a state-managed retirement benefit plan operated by the government of B Land. The subsidiary is required to contribute a specified percentage of payroll costs to the retirement benefit scheme to fund the benefits. The only obligation of the Group with respect to the retirement benefit plan is to make the specified contributions.

NZ IAS 19.53 The total expense recognised in profit or loss of CU160,000 (2012: CU148,000) represents contributions payable to these plans by the Group at rates specified in the rules of the plans. As at 31 December 2013, contributions of CU8,000 (2012: CU8,000) due in respect of the 2013 (2012) reporting period had not been paid over to the plans. The amounts were paid subsequent to the end of the reporting period.

39.2 Defined benefit plans

NZ IAS 19.139(a)(i)-(iii) The Group sponsors funded defined benefit plans for qualifying employees of its subsidiaries in A Land. The defined benefit plans are administered by a separate Fund that is legally separated from the entity. The board of the pension fund is composed of an equal number of representatives from both employers and (former) employees. The board of the pension fund is required by law and by its articles of association to act in the interest of the fund and of all relevant stakeholders in the scheme, i.e. active employees, inactive employees, retirees, employers. The board of the pension fund is responsible for the investment policy with regard to the assets of the fund.

NZ IAS 19.139(a)(i)-(iii) Under the plans, the employees are entitled to post-retirement yearly installments amounting to 1.75% of final salary for each year of service until the retirement age of 65. The pensionable salary is limited to CU 20. The pensionable salary is the difference between the current salary of the employee and the state retirement benefit. In addition, the service period is limited to 40 years resulting in a maximum yearly entitlement (life-long annuity) of 70% of final salary.

COMMENTARY

NZ IAS 19.139(a) *Tier 2 entities are required to disclose information about the characteristics of its defined benefit plans, but are exempt from the specific prescribed characteristic-related disclosures of NZ IAS 19.139(a). Entities will need to consider the appropriate level of disclosure in this area.*

NZ IAS 19.139(b) The plans in A-land typically expose the Group to actuarial risks such as: investment risk, interest rate risk, longevity risk and salary risk.

Investment risk	The present value of the defined benefit plan liability is calculated using a discount rate determined by reference to high quality corporate bond yields; if the return on plan asset is below this rate, it will create a plan deficit. Currently the plan has a relatively balanced investment in equity securities, debt instruments and real estates. Due to the long-term nature of the plan liabilities, the board of the pension fund considers it appropriate that a reasonable portion of the plan assets should be invested in equity securities and in real estate to leverage the return generated by the fund.
Interest risk	A decrease in the bond interest rate will increase the plan liability; however, this will be partially offset by an increase in the return on the plan's debt investments.
Longevity risk	The present value of the defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after their employment. An increase in the life expectancy of the plan participants will increase the plan's liability.
Salary risk	The present value of the defined benefit plan liability is calculated by reference to the future salaries of plan participants. As such, an increase in the salary of the plan participants will increase the plan's liability.

Source **NZ IFRS RDR Holdings Limited**
**NZ IAS 1.10(e),(ea),
51(b),(c)** **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

The risk relating to benefits to be paid to the dependents of plan members (widow and orphan benefits) is re-insured by an external insurance company.

No other post-retirement benefits are provided to these employees.

The most recent actuarial valuation of the plan assets and the present value of the defined benefit obligation were carried out at 31 December 2013 by Mr. F.G. Ho, Fellow of the Institute of Actuaries of A Land. The present value of the defined benefit obligation, and the related current service cost and past service cost, were measured using the projected unit credit method.

**NZ IAS 19.144,
RDR 144.1**

The principal assumptions used for the purposes of the actuarial valuations were as follows.

	Valuation at	
	31/12/13	31/12/12
Discount rate(s)	5.52%	5.20%
Expected rate(s) of salary increase	5.00%	5.00%
Average longevity at retirement age for current pensioners (years)*		
Males	27.5	27.3
Females	29.8	29.6
Average longevity at retirement age for current employees (future pensioners) (years)*		
Males	29.5	29.3
Females	31.0	30.9
Others [describe]	-	-

* Based on A Land's standard mortality table [with modification to reflect expected changes in mortality/ others (please describe)].

COMMENTARY

Under NZ IAS 19.144 entities shall disclose the significant actuarial assumptions used to determine the present value of the defined benefit obligation. This disclosure shall be in absolute terms (e.g. as an absolute percentage, and not just as a margin between different percentages and other variables). When an entity provides disclosures in total for a grouping of plans, it shall provide such disclosures in the form of weighted averages or relatively narrow ranges.

However, tier 2 entities are only required to disclose the significant actuarial assumptions used to determine the present value of the defined benefit obligation, which is demonstrated above.

Amounts recognised in comprehensive income in respect of these defined benefit plans are as follows.

	Year ended 31/12/13	Year ended 31/12/12
	CU'000	CU'000 (restated)
Service cost:		
Current service cost	1,259	738
Past service cost and (gain)/loss from settlements	-	-

NZ IAS 19.142 Other [describe]	-	-
Total	4,202	4,326

COMMENTARY

NZ IAS 19.RDR
142.1

In the table above, the separate line items represent examples provided by NZ IAS 19.142. Tier 2 entities shall disaggregate the fair value of the plan assets into classes that distinguish the nature and risks of those items.

NZ IAS 19.142

The fair values of the above equity and debt instruments are determined based on quoted market prices in active markets whereas the fair values of properties and derivatives are not based on quoted market prices in active markets. It is the policy of the fund to use interest rate swaps to hedge its exposure to interest rate risk. This policy has been implemented during the current and prior years. Foreign currency exposures are fully hedged by the use of the forward foreign exchange contracts.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013- continued**

The actual return on plan assets was CU0.743 million (2012: CU0.349 million).

NZ IAS 19.143 The plan assets include ordinary shares of the Company with an aggregate fair value of CU0.38 million (31 December 2012: CU0.252 million) and a property occupied by a subsidiary of the Company with fair value of CU0.62 million (31 December 2012: CU0.62 million).

NZ IAS 19.145(a),(b) Significant actuarial assumptions for the determination of the defined obligation are discount rate, expected salary increase and mortality. The sensitivity analyses below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

NZ IAS 19.145(a) • If the discount rate is 100 basis points higher (lower), the defined benefit obligation would decrease by CU744,000 (increase by CU740,000).

NZ IAS 19.145(a) • If the expected salary growth increases (decreases) by 1%, the defined benefit obligation would increase by CU120,000 (decrease by CU122,000).

NZ IAS 19.145(a) • If the life expectancy increases (decreases) by one year for men and women, the defined benefit obligation would increase by CU150,000 (decrease by CU156,000).

NZ IAS 19.145(b) The sensitivity analysis presented above may not be representative of the actual change in the defined benefit obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

NZ IAS 19.145(b) Furthermore, in presenting the above sensitivity analysis, the present value of the defined benefit obligation has been calculated using the projected unit credit method at the end of the reporting period, which is the same as that applied in calculating the defined benefit obligation liability recognised in the statement of financial position.

NZ IAS 19.145(c) There was no change in the methods and assumptions used in preparing the sensitivity analysis from prior years.

COMMENTARY

NZ IAS 19.173(b) *In accordance with NZ IAS 19(2011).173(b), for financial statements with accounting periods that begin before 1 January 2014, entities need not present comparative information for the disclosures required by NZ IAS 19.145 (i.e. the sensitivity of the defined benefit obligation).*

NZ IAS 19.146 Each year an Asset-Liability-Matching study is performed in which the consequences of the strategic investment policies are analysed in terms of risk-and-return profiles. Investment and contribution policies are integrated within this study. Main strategic choices that are formulated in the actuarial and technical policy document of the Fund are:

- NZ IAS 19.146 • Asset mix based on 25% equity instruments, 50% debt instruments and 25% investment property;
- NZ IAS 19.146 • Interest rate sensitivity caused by the duration of the defined benefit obligation should be reduced by 30% by the use of debt instruments in combination with interest rate swaps.
- NZ IAS 19.146 • Maintaining an equity buffer that gives a 97.5% assurance that assets are sufficient within the next 12 months.

NZ IAS 19.146 There has been no change in the process used by the Group to manage its risks from prior periods.

NZ IAS 19.147(a) The Group's subsidiaries fund the cost of the entitlements expected to be earned on a yearly basis. Employees pay a fixed 5% percentage of pensionable salary. The residual contribution (including back service payments) is paid by the entities of the Group. The funding requirements are based on the local actuarial measurement framework. In this framework the discount rate is set on a risk free rate. Furthermore, premiums are determined on a current salary base. Additional liabilities stemming from past service due to salary increases (back-service liabilities) are paid immediately to the Fund. Apart from paying the costs of the entitlements, the Group's subsidiaries are not liable to pay additional contributions in case the Fund does not hold sufficient assets. In that case, the Fund would take other measures to restore its solvency, such as a reduction of the entitlements of the plan members.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

NZ IAS 19.147(c) The average duration of the benefit obligation at 31 December 2013 is 16.5 years (2012: 15.6 years). This number can be analysed as follows:

- NZ IAS 19.147(c)** • active members: 19.4 years (2012: 18.4 years);
- NZ IAS 19.147(c)** • deferred members: 22.6 years (2012: 21.5 years); and
- NZ IAS 19.147(c)** • retired members: 9.3 years (2012: 8.5 years).

NZ IAS 19.147(b) The Group expects to make a contribution of CU0.95 million (2012: CU0.91 million) to the defined benefit plans during the next financial year.

40. Financial instruments

COMMENTARY

The following are examples of the types of disclosures that might be required in this area. The matters disclosed will be dictated by the circumstances of the individual entity, by the significance of judgements and estimates made to the results and financial position, and the information provided to key management personnel.

NZ IAS 1.134,135

40.1 Capital management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to stakeholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from 2012.

The capital structure of the Group consists of net debt (borrowings as detailed in notes 32, 33 and 34 offset by cash and bank balances) and equity of the Group (comprising issued capital, reserves, retained earnings and non-controlling interests as detailed in notes 28 to 31).

The Group is not subject to any externally imposed capital requirements.

The Group's risk management committee reviews the capital structure of the Group on a semi-annual basis. As part of this review, the committee considers the cost of capital and the risks associated with each class of capital. The Group has a target gearing ratio of 20% - 25% determined as the proportion of net debt to equity. The gearing ratio at 31 December 2013 of 15.21% (see below) was at the lower end of the target range, and has returned to a more typical level of 23% after the end of the reporting period.

40.1.1 Gearing ratio

The gearing ratio at end of the reporting period was as follows

	31/12/13 CU'000	31/12/12 CU'000 (restated)
Debt (i)	50,881	51,486
Cash and bank balances (including cash and bank balances in a disposal group held for sale)	(24,271)	(20,278)
Net debt	26,610	31,208
Equity (ii)	174,976	168,334
Net debt to equity ratio	15.21%	18.54%

(i) Debt is defined as long- and short-term borrowings (excluding derivatives and financial guarantee contracts), as described in notes 32, 33 and 34.

(ii) Equity includes all capital and reserves of the Group that are managed as capital.

Source **NZ IFRS RDR Holdings Limited**NZ IAS 1.10(e),(ea),
51(b),(c)**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued****40.2.3 Financial liabilities designated as at FVTPL**

	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000
NZ IFRS 7.10(a) Changes in fair value attributable to changes in credit risk recognised during the year (i)	(20)	-
	31/12/13 CU'000	31/12/12 CU'000
NZ IFRS 7.10(a) Cumulative changes in fair value attributable to changes in credit risk (i)	(20)	-
Difference between carrying amount and contractual amount at maturity:		
Cumulative preference shares at fair value (note 34)	14,875	-
Amount payable at maturity	(15,000)	-
NZ IFRS 7.10(b)	(125)	-

NZ IFRS 7.11 (i) The change in fair value attributable to change in credit risk is calculated as the difference between total change in fair value of cumulative preference shares (CU125,000) and the change in fair value of cumulative redeemable preference shares due to change in market risk factors alone (CU105,000). The change in fair value due to market risk factors was calculated using benchmark interest yield curves as at the end of the reporting period holding credit risk margin constant. The fair value of cumulative redeemable preference shares was estimated by discounting future cash flows using quoted benchmark interest yield curves as at the end of the reporting period and by obtaining lender quotes for borrowings of similar maturity to estimate credit risk margin.

NZ IFRS 7.31 **40.3 Financial risk management objectives**

The Group's Corporate Treasury function provides services to the business, co-ordinates access to domestic and international financial markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyse exposures by degree and magnitude of risks. These risks include market risk (including currency risk, interest rate risk and other price risk), credit risk and liquidity risk.

The Group seeks to minimise the effects of these risks by using derivative financial instruments to hedge risk exposures. The use of financial derivatives is governed by the Group's policies approved by the board of directors, which provide written principles on foreign exchange risk, interest rate risk, credit risk, the use of financial derivatives and non-derivative financial instruments, and the investment of excess liquidity. Compliance with policies and exposure limits is reviewed by the internal auditors on a continuous basis. The Group does not enter into or trade financial instruments, including derivative financial instruments, for speculative purposes.

The Corporate Treasury function reports quarterly to the Group's risk management committee, an independent body that monitors risks and policies implemented to mitigate risk exposures.

NZ IFRS 7.33(a),(b) **40.4 Market risk**

The Group's activities expose it primarily to the financial risks of changes in foreign currency exchange rates (see note 40.6 below) and interest rates (see note 40.7 below). The Group enters into a variety of derivative financial instruments to manage its exposure to foreign currency risk and interest rate risk, including:

- forward foreign exchange contracts to hedge the exchange rate risk arising on the export of electronic equipment to B Land and C Land;
- interest rate swaps to mitigate the risk of rising interest rates; and
- forward foreign exchange contracts to hedge the exchange rate risk arising on translation of the Group's investment in a foreign operation, Subfour Limited, which has B Currency as its functional currency.

Market risk exposures are measured using value-at-risk (VaR) supplemented by sensitivity analysis.

NZ IFRS 7.33(c) There has been no change to the Group's exposure to market risks or the manner in which these risks are managed and measured.

**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

NZ IFRS 7.41

40.5 Value at Risk (VaR) analysis

The VaR measure estimates the potential loss in pre-taxation profit over a given holding period for a specified confidence level. The VaR methodology is a statistically defined, probability-based approach that takes into account market volatilities as well as risk diversification by recognising offsetting positions and correlations between products and markets. Risks can be measured consistently across all markets and products, and risk measures can be aggregated to arrive at a single risk number. The one-day 99% VaR number used by the Group reflects the 99% probability that the daily loss will not exceed the reported VaR.

VaR methodologies employed to calculate daily risk numbers include the historical and variance-covariance approaches. In addition to these two methodologies, Monte Carlo simulations are applied to the various portfolios on a monthly basis to determine potential future exposure.

Historical /VaR (99%, one-day by risk type)	Average		Minimum		Maximum		Year ended	
	2013 CU'000	2012 CU'000	2013 CU'000	2012 CU'000	2013 CU'000	2012 CU'000	31/12/13 CU'000	31/12/12 CU'000
Foreign exchange	980	1,340	546	943	1,200	1,600	980	1,350
Interest rate	115	60	85	45	150	95	105	55
Diversification	(45)	(40)	-	-	-	-	(55)	(50)
Total VaR exposure	1,050	1,360					1,030	1,355

While VaR captures the Group's daily exposure to currency and interest rate risk, sensitivity analysis evaluates the impact of a reasonably possible change in interest or foreign currency rates over a year. The longer time frame of sensitivity analysis complements VaR and helps the Group to assess its market risk exposures. Details of sensitivity analysis for foreign currency risk are set out in note 40.6 below and for interest rate risk in note 40.7 below.

40.6 Foreign currency risk management

NZ IFRS 7.33,34

The Group undertakes transactions denominated in foreign currencies; consequently, exposures to exchange rate fluctuations arise. Exchange rate exposures are managed within approved policy parameters utilising forward foreign exchange contracts.

The carrying amounts of the Group's foreign currency denominated monetary assets and monetary liabilities at the end of the reporting period are as follows.

	Liabilities		Assets	
	31/12/13 CU'000	31/12/12 CU'000	31/12/13 CU'000	31/12/12 CU'000
Currency of B Land	6,297	7,469	1,574	1,671
Currency of C Land	186	135	-	-
Others	-	-	-	-

40.6.1 Foreign currency sensitivity analysis

The Group is mainly exposed to the currency of B Land and the currency of C Land.

NZ IFRS 7.34(a),
40(b)

The following table details the Group's sensitivity to a 10% increase and decrease in the CU against the relevant foreign currencies. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 10% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the functional currency of the lender or the borrower. A positive number below indicates an increase in profit or equity where the CU strengthens 10% against the relevant currency. For a 10% weakening

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013 - continued**

of the CU against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be negative.

	Currency B impact		Currency C impact	
	2013	2012	2013	2012
	CU'000	CU'000	CU'000	CU'000
NZ IFRS 7.40(a) Profit or loss	472	579	(i) 19	14 (iii)
NZ IFRS 7.40(a) Equity	96	122	(ii) 17	19 (iv)

- (i) This is mainly attributable to the exposure outstanding on Currency B receivables and payables in the Group at the end of the reporting period.
- (ii) This is as a result of the changes in fair value of derivative instruments designated as hedging instruments in cash flow hedges and net investment hedges.
- (iii) This is mainly attributable to the exposure to outstanding Currency C payables at the end of the reporting period.
- (iv) This is mainly as a result of the changes in fair value of derivative instruments designated as hedging instruments in cash flow hedges.

NZ IFRS 7.33(c) The Group's sensitivity to foreign currency has decreased during the current year mainly due to the disposal of Currency B investments and the reduction in Currency B sales and purchases in the last quarter of the financial year which has resulted in lower Currency B denominated trade receivables and trade payables.

NZ IFRS 7.42 In management's opinion, the sensitivity analysis is unrepresentative of the inherent foreign exchange risk because the exposure at the end of the reporting period does not reflect the exposure during the year. Currency B denominated sales are seasonal, with lower sales volumes in the last quarter of the financial year, resulting in a reduction in Currency B receivables at the end of the reporting period.

In addition, the change in equity due to a 10% change in the CU against all exchange rates for the translation of new investment hedging instruments would be a decrease of CU13,000 (2012: CU9,000). However, there would be no net effect on equity because there would be an offset in the currency translation of the foreign operation.

40.6.2 Forward foreign exchange contracts

NZ IFRS 7.22,33,34 It is the policy of the Group to enter into forward foreign exchange contracts to cover specific foreign currency payments and receipts within 70% to 80% of the exposure generated. The Group also enters into forward foreign exchange contracts to manage the risk associated with anticipated sales and purchase transactions out to 6 months within 40% to 50% of the exposure generated. Basis adjustments are made to the carrying amounts of non-financial hedged items when the anticipated sale or purchase transaction takes place.

NZ IFRS 7.22 In the current year, the Group has designated certain forward contracts as a hedge of its net investment in Subfour Limited, which has B Currency as its functional currency. The Group's policy has been reviewed and, due to the increased volatility in B Currency, it was decided to hedge up to 50% of the net assets of the Subfour Limited for forward foreign currency risk arising on translation of the foreign operation. The Group utilises a rollover hedging strategy, using contracts with terms of up to 6 months. Upon the maturity of a forward contract, the Group enters into a new contract designated as a separate hedging relationship.

COMMENTARY

NZ IFRS 7.34(a)

The table above provides an example of summary quantitative data about exposure to foreign exchange risks at the end of the reporting period that an entity may provide internally to key management personnel.

NZ IFRS 7.22

The Group has entered into contracts to supply electronic equipment to customers in B Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 3 months) to hedge the exchange rate risk arising from these anticipated future transactions, which are designated as cash flow hedges.

NZ IFRS 7.23(a)

At 31 December 2013, the aggregate amount of losses under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to the exposure on these anticipated future transactions is CU70,000 (2012: gains of CU26,000). It is anticipated that the sales will take place during the first 3 months of the next financial year, at which time the amount deferred in equity will be reclassified to profit or loss.

NZ IFRS 7.22

The Group has entered into contracts to purchase raw materials from suppliers in B Land and C Land. The Group has entered into forward foreign exchange contracts (for terms not exceeding 6 months) to hedge the exchange rate risk arising from these anticipated future purchases, which are designated into cash flow hedges.

NZ IFRS 7.23(a)

At 31 December 2013, the aggregate amount of gains under forward foreign exchange contracts recognised in other comprehensive income and accumulated in the cash flow hedging reserve relating to these anticipated future purchase transactions is CU239,000 (2012: unrealised gains of CU194,000). It is anticipated that the purchases will take place during the first 6 months of the next financial year at which time the amount deferred in equity will be included in the carrying amount of the raw materials. It is anticipated that the raw materials will be converted into inventory and sold within 12 months after purchase, at which time the amount deferred in equity will be reclassified to profit or loss.

NZ IFRS 7.23(b)

At the start of the third quarter of 2013, the Group reduced its forecasts on sales of electronic equipment to B Land due to increased local competition and higher shipping costs. The Group had previously hedged CU1.079 million of future sales of which CU97,000 are no longer expected to occur, and CU982,000 remain highly probable. Accordingly, the Group has reclassified CU3,000 of gains on foreign currency forward contracts relating to forecast transactions that are no longer expected to occur from the cash flow hedging reserve to profit or loss.

NZ IFRS 7.24(c)

At 31 December 2013, no ineffectiveness has been recognised in profit or loss arising from hedging the net investment in Subfour Limited.

NZ IFRS 7.33,34

40.7 Interest rate risk management

The Group is exposed to interest rate risk because entities in the Group borrow funds at both fixed and floating interest rates. The risk is managed by the Group by maintaining an appropriate mix between fixed and floating rate borrowings, and by the use of interest rate swap contracts and forward interest rate contracts. Hedging activities are evaluated regularly to align with interest rate views and defined risk appetite, ensuring the most cost-effective hedging strategies are applied.

The Group's exposures to interest rates on financial assets and financial liabilities are detailed in the liquidity risk management section of this note.

40.7.1 Interest rate sensitivity analysis

NZ IFRS 7.40(b)

The sensitivity analyses below have been determined based on the exposure to interest rates for both derivatives and non-derivative instruments at the end of the reporting period. For floating rate liabilities, the analysis is prepared assuming the amount of the liability outstanding at the end of the reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

NZ IFRS 7.40(a)

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's:

- profit for the year ended 31 December 2013 would decrease/increase by CU43,000 (2012: decrease/increase by CU93,000). This is mainly attributable to the Group's exposure to interest rates on its variable rate borrowings; and
- other comprehensive income for the year ended 31 December 2013 would decrease/increase by CU19,000 (2012: decrease/increase by CU12,000), mainly as a result of the changes in the fair value of available-for-sale fixed rate instruments.

NZ IFRS 7.33(c)

The Group's sensitivity to interest rates has decreased during the current year mainly due to the reduction in variable rate debt instruments and the increase in interest rate swaps to swap floating rate debt to fixed.

40.7.2 Interest rate swap contracts

NZ IFRS 7.22,33,34

Under interest rate swap contracts, the Group agrees to exchange the difference between fixed and floating rate interest amounts calculated on agreed notional principal amounts. Such contracts enable the Group to mitigate the risk of changing interest rates on the fair value of issued fixed rate debt and the cash flow exposures on the issued variable rate debt. The fair value of interest rate swaps at the end of the reporting period is determined by discounting the future cash flows using the curves at the end of the reporting period and the credit risk inherent in the contract, and is disclosed below. The average interest rate is based on the outstanding balances at the end of the reporting period.

NZ IFRS 7.34(a)

The following tables detail the notional principal amounts and remaining terms of interest rate swap contracts outstanding at the end of the reporting period.

	Average contracted fixed interest rate		National principal value		Fair value assets (liabilities)	
	31/12/13	31/12/12	31/12/13	31/12/12	31/12/13	31/12/12
Cash flow hedges	%	%	CU'000	CU'000	CU'000	CU'000
Outstanding receive floating pay fixed contracts						
Less than 3 months	7.45	6.75	1,000	4,000	72	37
1 to 2 years	7.15	7.05	2,000	1,620	55	47
2 to 5 years	6.75	6.50	3,000	1,359	130	93
5 years +	7.05	-	1,000	-	27	-
			7,000	6,979	284	177

NZ IFRS 7.22(b)

COMMENTARY

NZ IFRS 7.34(a)

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

The interest rate swaps settle on a quarterly basis. The floating rate on the interest rate swaps is the local interbank rate of A Land. The Group will settle the difference between the fixed and floating interest rate on a net basis.

NZ IFRS 7.22 All interest rate swap contracts exchanging floating rate interest amounts for fixed rate interest amounts are designated as cash flow hedges in order to reduce the Group's cash flow exposure resulting from variable interest rates on borrowings. The interest rate swaps and the interest payments on the loan occur simultaneously and the amount accumulated in equity is reclassified to profit or loss over the period that the floating rate interest payments on debt affect profit or loss.

	Average contracted fixed interest rate		Notional principal amount		Fair value assets (liabilities)

COMMENTARY						
NZ IFRS 7.34(a)	<i>The table above provides an example of summary quantitative data about exposure to interest rate risks at the end of the reporting period that an entity may provide internally to key management personnel.</i>					

NZ IFRS 7.24(a) Interest rate swap contracts exchanging fixed rate interest for floating rate interest are designated and effective as fair value hedges in respect of interest rates. During the year, the hedge was 100% effective in hedging the fair value exposure to interest rate movements and as a result the carrying amount of the loan was adjusted by CU5,000 which was included in profit or loss at the same time that the fair value of the interest rate swap was included in profit or loss.

40.8 Other price risks

NZ IFRS 7.33 The Group is exposed to equity price risks arising from equity investments. Equity investments are held for strategic rather than trading purposes. The Group does not actively trade these investments.

40.8.1 Equity price sensitivity analysis

NZ IFRS 7.40(b) The sensitivity analyses below have been determined based on the exposure to equity price risks at the end of the reporting period.

NZ IFRS 7.40(a) If equity prices had been 5% higher/lower:

- profit for the year ended 31 December 2013 would have been unaffected as the equity investments are classified as available-for-sale and no investments were disposed of or impaired; and
- other comprehensive income for the year ended 31 December 2013 would increase/decrease by CU286,000 (2012: increase/decrease by CU265,000) as a result of the changes in fair value of available-for-sale shares.

NZ IFRS 7.40(c) The Group's sensitivity to equity prices has not changed significantly from the prior year.

Source **NZ IFRS RDR Holdings Limited**

NZ IFRS 7.33,34,B8

40.9 Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral, where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group only transacts with entities that are rated the equivalent of investment grade and above. This information is supplied by independent rating agencies where available and, if not available, the Group uses other publicly available financial information and its own trading records to rate its major customers. The Group's exposure and the credit ratings of its counterparties are continuously monitored and the aggregate value of transactions concluded is spread amongst approved counterparties. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee annually.

The carrying amounts shown on the statement of financial position represents the Group's maximum exposure to credit risk.

Trade receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable and, where appropriate, credit guarantee insurance cover is purchased.

Apart from Company A, the largest customer of the Group (see below and refer to notes 6.7 and 25.1), the Group does not have significant credit risk exposure to any single counterparty. Concentration of credit risk related to Company A did not exceed 20% of gross monetary assets at any time during the year. Concentration of credit risk to any other counterparty did not exceed 5% of gross monetary assets at any time during the year.

The credit risk on liquid funds and derivative financial instruments is limited because the counterparties are banks with high credit-ratings assigned by international credit-rating agencies.

NZ IFRS 7.B10(c)

In addition, the Group is exposed to credit risk in relation to financial guarantees given to banks provided by the Group. The Group's maximum exposure in this respect is the maximum amount the Group could have to pay if the guarantee is called on (see note 40.10.1). As at 31 December 2013, an amount of CU24,000 (31 December 2012: CU18,000) has been recognised in the consolidated financial position as financial liabilities (see note 34).

40.9.1 Collateral held as security and other credit enhancements

NZ IFRS 7.36(b)

The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets, except that the credit risk associated with the finance lease receivables is mitigated because the finance lease receivables are secured over the leased storage equipment. The carrying amount of the finance lease receivables amounts to CU1.028 million (31 December 2012: CU0.905 million) and the fair value of the leased assets is estimated to be approximately CU1.00 million (31 December 2012: CU0.9 million). The Group is not permitted to sell or repledge the collateral in the absence of default by the lessee.

40.10 Liquidity risk management

NZ IFRS 7.33,39(c)

Ultimate responsibility for liquidity risk management rests with the board of directors, which has established an appropriate liquidity risk management framework for the management of the Group's short-, medium- and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities. Note 40.10.2 below sets out details of additional undrawn facilities that the Group has at its disposal to further reduce liquidity risk.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c)

**Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

NZ IFRS 7.34,35

40.10.1 Liquidity and interest risk tables

NZ IFRS 7.39(a)

The following tables detail the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Group may be required to pay.

COMMENTARY

The tables below include the weighted average effective interest rate and a reconciliation to the carrying amount in the consolidated statement of financial position as an example of summary quantitative data about exposure to interest rates at the end of the reporting period that an entity may provide internally to key management personnel.

	Weighted average effective interest rate	Less than 1 month	1-3 months	3 months to 1 year	1-5 years	5+ years	Total	Carrying amount
	%	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000
31 December 2013								
Non-interest bearing	-	3,247	9,938	6,195	-	-	19,380	19,380
Finance lease liability	4.50	1	2	7	6	-	16	14
Variable interest rate instruments	8.18	896	221	6,001	5,780	-	12,898	11,570
Fixed interest rate instruments	7.56	98	333	1,145	41,595	2,500	45,671	35,576
Financial guarantee contracts	-	2,000	-	-	-	-	2,000	24
		6,242	10,494	13,348	47,381	2,500	79,965	66,564
31 December 2012								
Non-interest bearing	-	1,768	16,976	2,476	2,610	-	23,830	23,830
Finance lease liability	5.50	5	10	43	44	-	102	89
Variable interest rate instruments	8.08	1,294	362	1,086	19,576	-	22,318	18,698
Fixed interest rate instruments	8.03	227	454	2,044	44,572	-	47,297	34,010
Financial guarantee contracts	-	1,600	-	-	-	-	1,600	18
		4,894	17,802	5,649	66,802	-	95,147	76,645

NZ IFRS 7.B10(c)

The amounts included above for financial guarantee contracts are the maximum amounts the Group could be forced to settle under the arrangement for the full guaranteed amount if that amount is claimed by the counterparty to the guarantee. Based on expectations at the end of the reporting period, the Group considers that it is more likely than not that such an amount will not be payable under the arrangement. However, this estimate is subject to change depending on the probability of the counterparty claiming under the guarantee which is a function of the likelihood that the financial receivables held by the counterparty which are guaranteed suffer credit losses.

Source **NZ IFRS RDR Holdings Limited**NZ IAS 1.10(e),(ea),
51(b),(c)**Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**NZ IFRS 7.34,35,
B11E

The following table details the Group's expected maturity for its non-derivative financial assets. The table has been drawn up based on the undiscounted contractual maturities of the financial assets including interest that will be earned on those assets. The inclusion of information on non-derivative financial assets is necessary in order to understand the Group's liquidity risk management as the liquidity is managed on a net asset and liability basis.

	Weighted average effective interest rate						Total
		Less than 1 month	1-3 months	3 months to 1 year	1-5 years	5+ years	
	%	CU'000	CU'000	CU'000	CU'000	CU'000	CU'000
31 December 2013							
Non-interest bearing	-	11,216	7,653	-	-	-	18,869
Variable interest rate instruments	5.75	27,629	4,367	3,944	1,346	-	37,286
Fixed interest rate instruments	7.38	-	-	-	3,091	-	3,091
		38,845	12,020	3,944	4,437	-	59,246
31 December 2012							
Non-interest bearing	-	8,493	5,251	-	-	-	13,744
Variable interest rate instruments	4.83	21,918	3,125	5,204	353	-	30,600
Fixed interest rate instruments	7.00	-	-	-	2,600	-	2,600
		30,411	8,376	5,204	2,953	-	46,944

NZ IFRS 7.B10A(b)

The amounts included above for variable interest rate instruments for both non-derivative financial assets and liabilities is subject to change if changes in variable interest rates differ to those estimates of interest rates determined at the end of the reporting period.

NZ IFRS 7.39(c)

The Group has access to financing facilities as described in note 40.10.2 below, of which CU9.268 million were unused at the end of the reporting period (2012: CU12.617million). The Group expects to meet its other obligations from operating cash flows and proceeds of maturing financial assets.

NZ IFRS 7.39(b)

The following table details the Group's liquidity analysis for its derivative financial instruments. The table has been drawn up based on the undiscounted contractual net cash inflows and outflows on derivative instruments that settle on a net basis, and the undiscounted gross inflows and outflows on those derivatives that require gross settlement. When the amount payable or receivable is not fixed, the amount disclosed has been determined by reference to the projected interest rates as illustrated by the yield curves at the end of the reporting period.

COMMENTARY

NZ IFRS 7.50(a)

Details of used and unused financing facilities are not mandatory under NZ IFRS, however NZ IAS 7.50(a) encourages such disclosure since it may be relevant to users in understanding the financial position and liquidity of an entity.

40.11 Fair value measurements

This note provides information about how the Group determines fair values of various financial assets and financial liabilities.

40.11.1 Fair value of the Group's financial assets and financial liabilities that are measured at fair value on a recurring basis

NZ IFRS 13.91(a),
93(a),(b),(d),(g),(h)(i),
IE63,IE65(e)

Some of the Group's financial assets and financial liabilities are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets and financial liabilities are determined (in particular, the valuation technique(s) and inputs used).

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/13	31/12/12				
1) Foreign currency forward contracts (see notes 22 and 34)	Assets – CU 244,000; and Liabilities – CU87,000	Assets - CU220,000	Level 2	Discounted cash flow. Future cash flows are estimated based on forward exchange rates (from observable forward exchange rates at the end of the reporting period) and contract forward rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
2) Interest rate swaps (see notes 22 and 34)	Assets – CU284,000; Liabilities (designated for hedging) – CU5,000; and Liabilities (not designated for hedging) – CU51,000	Assets – CU177,000	Level 2	Discounted cash flow. Future cash flows are estimated based on forward interest rates (from observable yield curves at the end of the reporting period) and contract interest rates, discounted at a rate that reflects the credit risk of various counterparties.	N/A	N/A
3) Held-for- trading non- derivative financial assets (see note 22)	Listed equity securities in Z land: Real estate industry – CU911,000; and Oil and gas industry – CU628,000.	Listed equity securities in Z land: Real estate industry - CU911,000; and Oil and gas industry - CU728,000.	Level 1	Quoted bid prices in an active market.	N/A	N/A
4) Listed redeemable notes (see note 22)	Listed debt securities in Y Land – Energy industry – CU2,200,000	Listed debt securities in Y Land - Energy industry - CU2,180,000	Level 1	Quoted bid prices in an active market.	N/A	N/A

for the year ended 31 December 2013- continued**

Financial assets/ financial liabilities	Fair value as at		Fair value hierarchy	Valuation technique(s) and key input(s)	Significant unobservable input(s)	Relationship of unobservable inputs to fair value
	31/12/13	31/12/12				
5) Private equity investments (see note 22) (note 1)	20 per cent equity investment in Rocket Plus Limited engaged in refining and distribution of fuel products in A land – CU5,359,000; and 10 per cent equity investment in E Plus Limited engaged in Shoe manufacturing in A land – CU360,000	20 per cent equity investment in Rocket Plus Limited engaged in refining and distribution of fuel products in A land – CU5,285,000	Level 3	Discounted cash flow	Long-term revenue growth rates, taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 4.9 to 5.5 per cent (2012: 4.8 – 5.4 %).	The higher the revenue growth rate, the higher the fair value.
					Long-term pre-tax operating margin taking into account management's experience and knowledge of market conditions of the specific industries, ranging from 5- 12 per cent (2012: 5 – 10 %).	The higher the per-tax operating margin, the higher the fair value
					Weighted average cost of capital, determined using a Capital Asset Pricing Model, ranging from 11.9 to 12.5 per cent (2012: 11.2 to 12.1 %).	The higher the weighted average cost of capital, the lower the fair value
					Discount for lack of marketability, determined by reference to the share price of listed entities in similar industries, ranging from 5 – 20 per cent (2012: 4 – 19 per cent).	The higher the discount, the lower the fair value.
6) Redeemable cumulative preference shares (see note 34)	Liabilities – CU14,875,000	-	Level 2	Discounted cash flow at a discount rate of 8 per cent (2012: 7.5 per cent) that reflects the issuer's current borrowing rate at the end of the reporting period	N/A	N/A
NZ IFRS 3.B67(b) 7) Contingent consideration in a business combination (see note 34)	Liabilities – CU75,000	-	Level 3	Discounted cash flow.	Discount rate of 18 %.	The higher the discount rate, the lower the fair value
					Probability-adjusted revenues and profits, with a range from CU 100,000 to CU150,000 and a range from CU 60,000 to 90,000 respectively.	The higher the amounts of revenue and profit, the higher the fair value.

NZ IFRS 13.93(h)(ii)

Note 1: If the above unobservable inputs to the valuation model were 10% higher/lower while all the other variables were held constant, the carrying amount of the shares would decrease/increase by CU7,000 (31 December 2012: decrease/increase by CU8,000).

NZ IFRS 13.93(c)

There were no transfers between Level 1 and 2 in the period.

COMMENTARY
NZ IFRS 13.93(h)(ii)

For financial assets and financial liabilities whose recurring fair value measurements are categorised within Level 3, if changing one or more of the unobservable inputs to reflect reasonably possible alternative assumptions would change the fair value determined **significantly**, an entity should state that fact and disclose the effect of those changes. The entity should also disclose how the effect of a change to reflect a reasonably possible alternative assumption was calculated.

COMMENTARY

The categorisation of fair value measurements into the different levels of the fair value hierarchy depends on the degree to which the inputs to the fair value measurements are observable and the significance of the inputs to the fair value measurement. The above categorisations are for illustrative purpose only.

NZ IFRS 13.97,
NZ IFRS 13.93(d)

The fair values of the financial assets and financial liabilities included in the level 2 and level 3 categories above have been determined in accordance with generally accepted pricing models based on a discounted cash flow analysis, with the most significant inputs being the discount rate that reflects the credit risk of counterparties.

NZ IFRS 13.93(e)

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013- continued**

NZ IFRS 2.44 **42. Share-based payments**

42.1 Employee share option plan of the Company

42.1.1 Details of the employee share option plan of the Company

NZ IFRS 2.45(a) The Company has a share option scheme for executives and senior employees of the Company and its subsidiaries. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, executives and senior employees with more than five years' service with the Group may be granted options to purchase ordinary shares.

NZ IFRS 2.45(a) Each employee share option converts into one ordinary share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

NZ IFRS 2.45(a) The number of options granted is calculated in accordance with the performance-based formula approved by shareholders at the previous annual general meeting and is subject to approval by the remuneration committee. The formula rewards executives and senior employees to the extent of the Group's and the individual's achievement judged against both qualitative and quantitative criteria from the following financial and customer service measures:

- improvement in share price
- improvement in net profit
- improvement in return to shareholders
- reduction in warranty claims
- results of client satisfaction surveys
- reduction in rate of staff turnover

NZ IFRS 2.45(a) The following share-based payment arrangements were in existence during the current and prior years:

Options series	Number	Grant date	Expiry date	Fair value at grant date	
				Exercise price CU	CU
(1) Granted on 31 March 2012	140,000	31/03/12	30/03/13	1.00	1.15
(2) Granted on 30 September 2012	150,000	30/09/12	29/09/13	1.00	1.18
(3) Granted on 31 March 2013	160,000	31/03/13	30/03/14	1.00	0.98
(4) Granted on 29 September 2013	60,000	29/09/13	28/09/14	2.40	0.82

NZ IFRS 2.45(a),(b)(vii) All options vested on their date of grant and expire within twelve months of their issue, or one month after the resignation of the executive or senior employee, whichever is the earlier.

42.1.2 Fair value of share options granted in the year

NZ IFRS 2.46,47(a) The weighted average fair value of the share options granted during the financial year is CU0.94 (2012: CU1.17). Options were priced using a binomial option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 3 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price is two and a half times the exercise price.

NZ IFRS 2.46

Inputs into the model	Option series			
	Series 1	Series 2	Series 3	Series 4
Grant date share price	1.32	1.37	1.29	2.53
Exercise price	1.00	1.00	1.00	2.40
Expected volatility	15.20%	15.40%	13.10%	13.50%
Option life	1 year	1 year	1 year	1 year
Dividend yield	13.27%	13.12%	13.00%	13.81%
Risk-free interest rate	5.13%	5.14%	5.50%	5.45%

COMMENTARY	
NZ IFRS 2.RDR 46.1,46.2,47.1	<p><i>Tier 2 entities are required to disclose information about how it measured the fair value of goods or services received or the fair value of the equity instruments granted. If a valuation methodology was used, the entity shall disclose the method and its reason for choosing it.</i></p> <p><i>For cash-settled share based payment arrangements, a tier 2 entity shall disclose information about how the liability was measured.</i></p> <p><i>If a tier 2 entity has measured the fair value of goods or services received as consideration for equity instruments of the entity indirectly, by reference to the fair value of the equity instruments granted, the entity is required to disclose for share-based payments that were modified during the period, an explanation of those modifications.</i></p>

42.1.3 Movements in shares options during the year

NZ IFRS 2.45(b) The following reconciles the share options outstanding at the beginning and end of the year:

		2013		2012	
		Number of options	Weighted average exercise price CU	Number of options	Weighted average exercise price CU
NZ IFRS 2.45(b)(i)	<i>Balance at beginning of year</i>	290,000	1.00	-	-
NZ IFRS 2.45(b)(ii)	Granted during the year	220,000	1.38	290,000	1.00
NZ IFRS 2.45(b)(iii)	Forfeited during the year	-	-	-	-
NZ IFRS 2.45(b)(iv)	Exercised during the year	(314,000)	1.00	-	-
NZ IFRS 2.45(b)(v)	Expired during the year	-	-	-	-
NZ IFRS 2.45(b)(vi),(vii)	<i>Balance at end of year</i>	196,000	1.43	290,000	1.00

42.1.4 Share options exercised during the year

NZ IFRS 2.45(c) The following share options were exercised during year:

Options series	Number exercised	Exercise date	Share price at exercise date CU
(1) Granted on 31 March 2012	30,000	05/01/13	2.50
(1) Granted on 31 March 2012	45,000	31/01/13	2.25
(1) Granted on 31 March 2012	65,000	15/03/13	2.75
(2) Granted on 30 September 2012	65,000	03/07/13	2.95
(2) Granted on 30 September 2012	85,000	28/08/13	3.15
(3) Granted on 31 March 2013	24,000	20/12/13	3.50
	314,000		

42.1.5 Share options outstanding at the end of the year

NZ IFRS 2.45(d) The share options outstanding at the end of the year had a weighted average exercise price of CU1.43 (2012: CU1.00), and a weighted average remaining contractual life of 103 days (2012: 184 days).

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013- continued**

42.2 Employee share option plan of a subsidiary acquired in the current year

NZ IFRS 2.45(a) Subsix Limited has a share option scheme for its executives and senior employees. The outstanding share options were not replaced and were still in existence at the date of acquisition of Subsix Limited.

NZ IFRS 2.45(a) Each employee share option of Subsix Limited converts into one ordinary share of Subsix Limited on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry. All outstanding share options granted by Subsix Limited had been vested by the date when the Group acquired Subsix Limited.

NZ IFRS 2.45(a),(b) The following share-based payment arrangements were in existence during the current year:

Options series	Number	Grant date	Expiry date	Market-based measure at the acquisition date of Subsix Limited	
				Exercise price CU	CU
(1) Granted on 13 March 2012	2,000	13/03/12	12/03/15	0.2	1.00
(2) Granted on 18 September 2012	3,000	18/09/12	17/09/15	0.2	1.00

NZ IFRS 2.45(a),(b)(vii) All options vested on their date of grant and expire within three years of their issue.

42.2.1 Market-based measure of share options at the acquisition date

NZ IFRS 2.46,47(a) All outstanding vested share options were measured in accordance with NZ IFRS 2 at their market-based measure at the acquisition date. The weighted average market-based measure of the share options determined at the acquisition date of Subsix Limited is CU1.00. Options were priced using a binomial option pricing model. Where relevant, the expected life used in the model has been adjusted based on management's best estimate for the effects of non-transferability, exercise restrictions (including the probability of meeting market conditions attached to the option), and behavioural considerations. Expected volatility is based on the historical share price volatility over the past 5 years. To allow for the effects of early exercise, it was assumed that executives and senior employees would exercise the options after vesting date when the share price reaches three and a half times the exercise price.

Inputs into the model	Option series	
	Series 1	Series 2
Acquisition date share price	1.12	1.12
Exercise price	0.2	0.2
Expected volatility	8.10%	8.50%
Option life	1.7 years	2.2 years
Dividend yield	3.00%	3.81%
Risk-free interest rate	5.50%	5.45%
Others [describe]	-	-

COMMENTARY

NZ IFRS 2.RDR 46.1,46.2,47.1 *Tier 2 entities are required to disclose information about how it measured the fair value of goods or services received or the fair value of the equity instruments granted. If a valuation methodology was used, the entity shall disclose the method and its reason for choosing it.*

For cash-settled share based payment arrangements, a tier 2 for profit entity shall disclose information about how the liability was measured.

If a tier 2 entity has measured the fair value of goods or services received as consideration for equity instruments of the entity indirectly, by reference to the fair value of the equity instruments granted, the entity is required to disclose for share-based payments that were modified during the period, an explanation of those modifications.

NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013 - continued**

42.2.2 Movements in share options during the year

NZ IFRS 2.45(c),(d)

No share options were granted or exercised after the Group obtained control over Subsix Limited. The share options outstanding at 31 December 2013 had an exercise price of CU0.2 and a weighted average remaining contractual life of 551 days.

43. Related party transactions

COMMENTARY

New Zealand entities which are required to prepare parent financial statements should also consider, in respect of the parent entity, the requirements of NZ IAS 27 Separate Financial Statements and NZ IAS 24 Related Party Disclosures, including NZ IFRS(RDR) concessions as applicable.

Balances and transactions between the Company and its subsidiaries, which are related parties of the Company, have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

43.1 Trading transactions

NZ IAS 24.18(a),19 During the year, group entities entered into the following trading transactions with related parties that are not members of the Group:

	Sales of goods		Purchases of goods	
	Year ended 31/12/13	Year ended 31/12/12	Year ended 31/12/13	Year ended 31/12/12
	CU'000	CU'000	CU'000	CU'000

NZ IAS 24.18(a),19(a)	NZ Group Holdings Limited	693	582	439	427
NZ IAS 24.18(a),19(c)	Subsidiaries of NZ Group Holdings Limited	1,289	981	897	883
NZ IAS 24.18(a),19(d)	Associates of International Group Holdings Limited	398	291	-	-

NZ IAS 24.18(b),19 The following balances were outstanding at the end of the reporting period:

	Amounts owed by related parties		Amounts owed to related parties	
	31/12/13	31/12/12	31/12/13	31/12/12
	CU'000	CU'000	CU'000	CU'000

NZ IAS 24.18(b),19(a)	NZ Group Holdings Limited	209	197	231	139
NZ IAS 24.18(b),19(c)	Subsidiaries of NZ Group Holdings Limited	398	293	149	78
NZ IAS 24.18(b),19(d)	Associates of International Group Holdings Limited	29	142	-	-

NZ IAS 24.23 Sales of goods to related parties were made at the Group's usual list prices, less average discounts of 5%. Purchases were made at market price discounted to reflect the quantity of goods purchased and the relationships between the parties.

NZ IAS 24.18(b)(i) The amounts outstanding are unsecured and will be settled in cash. No guarantees have been given or received. No expense has been recognised in the current or prior years for bad or doubtful debts in respect of the amounts owed by related parties.

43.2 Loans to related parties

	31/12/13	31/12/12	
	CU'000	CU'000	
NZ IAS 24.18(b),19(f)	Loans to key management personnel	3,637	3,088

NZ IAS 24.18(b)(i) The Group has provided several of its key management personnel with short-term loans at rates comparable to the average commercial rate of interest.

NZ IAS 24.18(b)(i) The loans to key management personnel are unsecured.

Source **NZ IFRS RDR Holdings Limited**

 NZ IAS 1.10(e),(ea), 51(b),(c) **Notes to the consolidated financial statements for the year ended 31 December 2013- continued**

 NZ IFRS 7.7 **43.3 Loans from related parties**

	31/12/13 CU'000	31/12/12 CU'000
NZ IAS 24.18(b), 19(a)	10,376	29,843

NZ IAS 24.18(b)(i) The Group has been provided loans at rates comparable to the average commercial rate of interest. The loans from the ultimate controlling party are unsecured.

NZ IAS 24.18(a), 19(f) Interest expense of CU75,000 (2012: CU54,000) has been recognised in respect of this loan.

43.4 Compensation of key management personnel

NZ IAS 24.17 The remuneration of directors and other members of key management personnel during the year was as follows:

	Year ended 31/12/13 CU'000	Year ended 31/12/12 CU'000
NZ IAS 24.17(a)	1,368	1,027
NZ IAS 24.17(b)	160	139
NZ IAS 24.17(c)	115	176
NZ IAS 24.17(e)	94	86
NZ IAS 24.17(d)	-	-
NZ IAS 24.17	1,737	1,428

COMMENTARY

NZ IAS 24.RDR 17.1 *Tier 2 entities are not required to disclose key management personnel compensation by category.*

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

43.5 Other related party transactions

NZ IAS 24.18(a), 19(a) In addition to the above, NZ Group Holdings Limited performed certain administrative services for the Company, for which a management fee of CU0.18 million (2012: CU0.16 million) was charged and paid, being an appropriate allocation of costs incurred by relevant administrative departments.

44. Business combinations
44.1 Subsidiaries acquired

2013	Principal activity	Date of acquisition	Proportion of voting equity interests acquired (%)	Consideration transferred CU'000
NZ IFRS 3.B64(a)-(c)	Subsix Limited	15/07/13	80	505
NZ IFRS 3.B64(a)-(c)	Subseven Limited	30/11/13	100	687
				1,192

NZ IFRS 3.B64(d) Subsix Limited and Subseven Limited were acquired so as to continue the expansion of the Group's activities on leisure goods.

COMMENTARY

NZ IFRS 3.B66 *The disclosures illustrated are also required for business combinations after the end of the reporting period but before the financial statements are authorised for issue unless the initial accounting for the acquisition is incomplete at the time the financial statements are authorised for issue. In such circumstances, the entity is required to describe which disclosures could not be made and the reasons why they could not be made.*

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013 - continued**

NZ IFRS 3.B64(f) **44.2 Consideration transferred**

	Subsix Limited	Subseven Limited
	CU'000	CU'000
NZ IFRS 3.B64(f), NZ IAS 7.40(b) Cash	430	247
NZ IFRS 3.B64(f) Transfer of land and buildings at fair value at date of acquisition	-	400
NZ IFRS 3.B64(f) Contingent consideration arrangement (i)	75	-
NZ IFRS 3.B64(f) Plus: effect of settlement of legal claim against Subseven Limited (ii)	-	40
NZ IFRS 3.B64(f), NZ IAS 7.40(a) Total	<u>505</u>	<u>687</u>

NZ IFRS 3.B64(g) (i) Under the contingent consideration arrangement, the Group is required to pay the vendors an additional CU300,000 if Subsix Limited's profit before interest and tax (PBIT) in each of the years 2014 and 2015 exceeds CU500,000. Subsix's PBIT for the past three years has been CU350,000 on average and the directors do not consider it probable that this payment will be required. CU75,000 represents the estimated fair value of this obligation at the acquisition date.

NZ IFRS 3.B64(l) (ii) Prior to the acquisition of Subseven Limited, the Group was pursuing a legal claim against that company in respect of damage to goods in transit to a customer. Although the Group was confident of recovery, this amount had not previously been recognised as an asset. In line with the requirements of NZ IFRS 3, the Group has recognised the effective settlement of this legal claim on the acquisition of Subseven Limited by recognising CU40,000 (being the estimated fair value of the claim) as a gain in profit or loss within the 'other gains and losses' line item. This has resulted in a corresponding increase in the consideration transferred.

NZ IFRS 3.B64(m) Acquisition-related costs amounting to CU145,000 (Subsix Limited: CU65,000; Subseven Limited: CU80,000) have been excluded from the consideration transferred and have been recognised as an expense in profit or loss in the current year, within the 'other expenses' line item.

Source **NZ IFRS RDR Holdings Limited**

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

NZ IFRS 3.B67(a)

The initial accounting for the acquisition of Subsix Limited has only been provisionally determined at the end of the reporting period. For tax purposes, the tax values of Subsix's assets are required to be reset based on market values of the assets. At the date of finalisation of these consolidated financial statements, the necessary market valuations and other calculations had not been finalised and they have therefore only been provisionally determined based on the directors' best estimate of the likely tax values.

NZ IFRS 3.B64(h)

The receivables acquired (which principally comprised trade receivables) in these transactions with a fair value of CU87,000 (Subsix Limited) and CU105,000 (Subseven Limited) had gross contractual amounts of CU104,000 and CU120,000 respectively. The best estimate at acquisition date of the contractual cash flows not expected to be collected are CU10,000 (Subsix Limited) and CU8,000 (Subseven Limited).

44.4 Non-controlling interests

NZ IFRS 3.B64(o)(i)-(ii) The non-controlling interest (20% ownership interest in Subsix Limited) recognised at the acquisition date was measured by reference to the fair value of the non-controlling interest and amounted to CU127,000. This fair value was estimated by applying an income approach. The following were the key model inputs used in determining the fair value:

- NZ IFRS 3.B64(o)(ii)** • assumed discount rate of 18%;
- NZ IFRS 3.B64(o)(ii)** • assumed long-term sustainable growth rates of 3% to 5%; and
- NZ IFRS 3.B64(o)(ii)** • assumed adjustments because of the lack of control or lack of marketability that market participants would consider when estimating the fair value of the non-controlling interests in Subsix Limited.

NZ IFRS 2.44

All outstanding share options granted by Subsix Limited to its employees had vested by the acquisition date. These share options were measured in accordance with NZ IFRS 2 at their market-based measure of CU5,000 and were included in the non-controlling interest in Subsix Limited. Methods and significant assumptions used in determining the market-based measure at the acquisition date are set out in note 42.2.

44.5 Goodwill arising on acquisition

	Subsix Limited	Subseven Limited	Total
	CU'000	CU'000	CU'000
Consideration transferred	505	687	1,192
Plus: non-controlling interests (20% in Subsix Limited)	127	-	127
Plus: non-controlling interests (outstanding share options granted by Subsix Limited)	5	-	5
Less: fair value of identifiable net assets acquired	(350)	(496)	(846)
Goodwill arising on acquisition	287	191	478

NZ IFRS 3.B64(e)

Goodwill arose in the acquisition of Subsix Limited and Subseven Limited because the cost of the combination included a control premium. In addition, the consideration paid for the combination effectively included amounts in relation to the benefit of expected synergies, revenue growth, future market development and the assembled workforce of Subsix Limited and Subseven Limited. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets.

NZ IFRS 3.B64(k)

None of the goodwill arising on these acquisitions will be deductible for tax purposes.

COMMENTARY

**NZ IAS 36.84,
NZ IAS 36.133**

If the initial allocation of goodwill acquired in a business combination during the period cannot be completed before the end of the reporting period, the amount of the unallocated goodwill should be disclosed together with the reasons why that amount remains unallocated.

Less: cash and cash equivalent balances acquired		(200)
		477

NZ IAS 7.40(b)

NZ IAS 7.40(c)

44.7 Impact of acquisitions on the results of the Group

NZ IFRS 3.B64(q)(i)

Included in the profit for the year is CU35,000 attributable to the additional business generated by Subsix Limited, and CU13,000 attributable to Subseven Limited. Revenue for the year includes CU2.3 million in respect of Subsix Limited and CU2.8million in respect of Subseven Limited.

NZ IFRS 3.B64(q)(ii)

Had these business combinations been effected at 1 January 2013, the revenue of the Group from continuing operations would have been CU145 million, and the profit for the year from continuing operations would have been CU19.7 million. The directors consider these 'pro-forma' numbers to represent an approximate measure of the performance of the combined group on an annualised basis and to provide a reference point for comparison in future periods.

In determining the 'pro-forma' revenue and profit of the Group had Subsix Limited and Subseven Limited been acquired at the beginning of the current year, the directors have:

- calculated depreciation of plant and equipment acquired on the basis of the fair values arising in the initial accounting for the business combination rather than the carrying amounts recognised in the pre-acquisition financial statements;
- calculated borrowing costs on the funding levels, credit ratings and debt/equity position of the Group after the business combination; and
- excluded takeover defence costs of the acquiree as a one-off pre-acquisition transaction.

45. Disposal of a subsidiary

On 30 November 2013, the Group disposed of Subzero Limited which carried out its entire toy manufacturing operations.

		<u>23,733</u>	<u>19,900</u>

NZ IAS 7.43 **47. Non-cash transactions**

During the current year, the Group entered into the following non-cash investing and financing activities which are not reflected in the consolidated statement of cash flows:

- the Group disposed of property, plant and equipment with an aggregate fair value of CU0.4 million to acquire Subseven Limited as indicated in note 44;
- proceeds in respect of the Group's disposal of part of its interest in E Plus Limited and its entire interest in Subzero Limited (CU1.245 million and CU960,000 respectively – see notes 20 and 45) had not been received in cash at the end of the reporting period;
- share issue proceeds of CU3,000 were received in the form of consulting services (2013: CU8,000), as described in note 28.1; and

In addition, the Group acquired CU40,000 of equipment under a finance lease in 2012 (2013: nil).

48.2 The Group as lessor

48.2.1 Leasing arrangements

NZ IAS 17.56(c)

Operating leases relate to the investment property owned by the Group with lease terms of between 5 to 10 years, with an option to extend for a further 10 years. All operating lease contracts contain market review clauses in the event that the lessee exercises its option to renew. The lessee does not have an option to purchase the property at the expiry of the lease period.

Rental income earned by the Group from its investment property and direct operating expenses arising on the investment property for the year are set out in notes 7 and 13 respectively.

The amount disclosed represents the aggregate amount of such contingent liabilities for which the Group as an investor is liable. The extent to which an outflow of funds will be required is dependent on the future operations of the joint venture being more or less favourable than currently expected. The Group is not contingently liable for the liabilities of other venturers in its joint venture.		
NZ IFRS 12.23(b), NZ IAS 37.86(b)	(ii) The amount disclosed represents the Group's share of contingent liabilities of associates. The extent to which an outflow of funds will be required is dependent on the future operations of the associates being more or less favourable than currently expected.		
NZ IAS 37.86(b)	(iii) An entity in the Group is a defendant in a legal action involving the alleged failure of the entity to supply goods in accordance with the terms of the contract. The directors believe, based on legal advice, that the action can be successfully defended and therefore no losses (including for costs) will be incurred. The legal claim is expected to be settled in the course of the next eighteen months.

NZ IAS 1.10(e),(ea),
51(b),(c) **Notes to the consolidated financial statements
for the year ended 31 December 2013- continued**

50.2 Contingent assets

		<u>31/12/13</u>	<u>31/12/12</u>
		<u>CU'000</u>	<u>CU'000</u>
NZ IAS 37.89	Faulty goods claim (i)	140	-
NZ IAS 37.89(c)	(i) An entity in the Group has a claim outstanding against a supplier for the supply of faulty products. Based on negotiations to date, the directors believe that it is probable that their claim will be successful and that compensation of CU0.14 million will be recovered.		

51. Events after the reporting period

NZ IAS 10.21 On 18 January 2014, the premises of Subfive Limited were seriously damaged by fire. Insurance claims are in process, but the cost of refurbishment is currently expected to exceed the amount that will be reimbursed by CU8.3 million.

52. Approval of financial statements

NZ IAS 10.17 The financial statements were approved by the board of directors and authorised for issue on 15 March 2014.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

Deloitte provides audit, tax, consulting, and financial advisory services to public and private clients spanning multiple industries. With a globally connected network of member firms in more than 150 countries and territories, Deloitte brings world-class capabilities and high-quality service to clients, delivering the insights they need to address their most complex business challenges. Deloitte's more than 200,000 professionals are committed to becoming the standard of excellence.

Deloitte New Zealand brings together more than 1000 specialist professionals providing audit, tax, technology and systems, strategy and performance improvement, risk management, corporate finance, business recovery, forensic and accounting services. Our people are based in Auckland, Hamilton, Rotorua, Wellington, Christchurch and Dunedin, serving clients that range from New Zealand's largest companies and public sector organisations to smaller businesses with ambition to grow.
