

Asset management A risk based approach

Bucharest, 13 May 2015

Organizations operating in the Energy & Resources sector are highly dependent on the proper functioning of the assets they own or manage.

Deloitte specialists are inviting you on the **13th of May 2015**, at Deloitte premises on **4-8 Nicolae Titulescu Road, America House Building, 2nd floor**, starting with **09.00 a.m.** to an event during which we would like to present the solution developed by our company for a more effective management of the equipment composing the electric energy production infrastructure.

Modeling data such as equipment standard functioning parameters, defects typology in frequency, conditions that led to equipment malfunction using analytical concepts may create the foundation for the adequate and timely identification of the events that may impact the proper functioning of the equipment and not ultimately can aid the definition of structured and coherent maintenance and investment plans.

Agenda:

- **Trends and challenges in managing the electric energy production infrastructure** (Farrukh Khan - Energy & Resources Deloitte Central Europe Leader)
- **Predictive Asset Management concepts and simulation** (Enrique Doheijo - Senior Manager Deloitte Spain)

During the event we propose to debate together with you on the existing opportunities and challenges and also find solution to problems in practice.

Participation is based on invite. **The seats are limited**, and the enrolment is made in the order of your registration. **There is no participation fee.**

Discussions will be held in English.

For details regarding the registration procedure, please access the following link: [A risk based approach](#)

We are looking forward to meet you!

Farrukh Khan
Energy & Resources Deloitte Central Europe Leader
