#### Amendment of norms regarding the administration of tariff quotas

New technical norms bring changes to the allocation request and the necessary guarantees for accessing tariff quotas.

They bring changes regarding the allocation request and the necessary guarantees for accessing tariff quotas.

The tariff quotas represent volumes of freight expressed quantitative or by value that can be imported into the European Community, benefiting from reduction or suspension of customs duties.

As of October 2<sup>nd</sup>, 2015, the technical norms regarding the administration of tariff quotas in Romania have been modified. Thus, the most important changes consist in:

- reducing the number of boxes to be filled in the customs declaration at the moment of request;
- limiting the relevant guarantee only under certain situations (e.g. tariff quota is critical).

### What does this mean for you?

If you import goods in Romania they may receive favorable treatment in terms of customs duties (customs duties reduced or null), based on the tariff quotas managed at European Union level.

For further questions regarding the availability of the tariff quotas for your imported goods and the new request procedure, do not hesitate to contact us.
