

# 1. Maturity model for CSR functions and strategy development

Deloitte supports sustainable development for the business community and the environment. We work with government institutions as well as nonprofit and non-governmental organisations to develop and implement solutions that promote future stability.

Deloitte CIS launched its CSR maturity assessment project in 2016 as part of our commitment to making an impact that matters to society and sustainable development. On a pro bono basis, we will model your CSR maturity and provide you with recommendations for development taking into account best practices.

### Our focus

CSR (corporate social responsibility) is a means by which business owners can systemise their responsibility towards stakeholders to deliver economic efficiency and set out the company's strategic values through three areas of activity:

1. Stakeholder relationship management

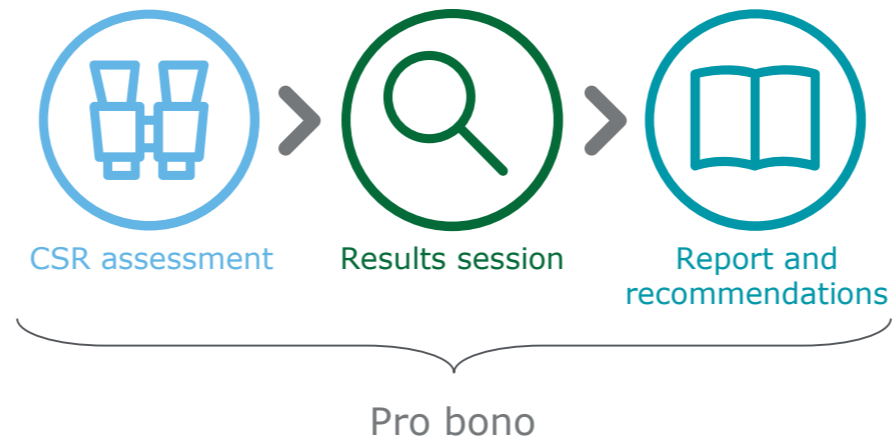

2. Social investment management

3. Non-financial risk management

# 2. CSR function maturity assessment

## Module 1: CSR function maturity assessment (one week)

## Module 2: Strategy development (discussed after module 1)

# 3. Assessment areas for sustainable development and social investment

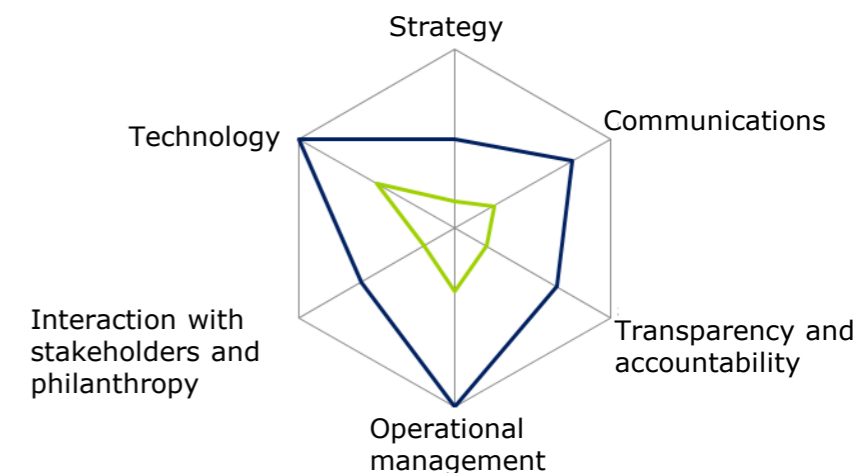

We are ready to model your CSR function's maturity, where CSR is defined the responsibility of an enterprise or company towards society for the consequences of its business operations. We can also assess your company's current level of sustainability to identify competitive advantages and opportunities for improvement.

### Assessment areas:

- Strategy
- Operational management
- Interaction with stakeholders and philanthropy
- Communications
- Transparency and accountability
- Technology
