The great indoors: the final frontier for digital navigation

Deloitte Global predicts that by 2022, at least a quarter of human and machine uses of digital navigation will include or exclusively be indoors.

Enabled by growing availability of:
- Wi-Fi hotspots
- LED lighting
- Dense cellular networks
- Ultra-wideband (UWB)
- Beacons
- Magnetic positioning

It should have the same disruptive impact as outdoor navigation.

It will enable:
- New business models
- Improved existing ones
- Over the next decade
