# Supporting your journey with a Sustainability Reporting Readiness Assessment

Organisations need to have appropriate systems, processes, data and controls in place to effectively meet various Standards' requirements. Our Sustainability Reporting Readiness Assessment Tool has been developed to prepare our clients for changing Sustainability reporting landscape.

## Step 1:

Our **Sustainability Reporting Readiness Assessment Tool** synthesises disclosure requirements to evaluate and compare your **current ESG reporting** and disclosures and data to **Sustainability and Climate Standards' requirements**. The outputs are summarised into a **Readiness Insights Report**.

## Step 2: ESG Lab (Series)

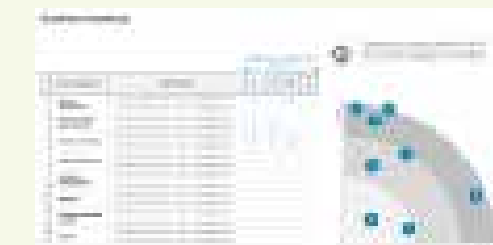

Design and facilitate an **ESG Lab (Series)** with your identified representatives to workshop information from the Readiness Insights Report.

Discussion areas will include **information requirements, gaps identified and opportunities** for the business and **key ESG data** needed to enhance decision making and disclosure.

## Step 3: Readiness Roadmap

Deloitte will document the outcomes from the **ESG Lab series** and your priorities into a **Readiness Roadmap** covering key initiatives and **priorities, people, process, technology and data**.
