Sustainability Services
Driving responsible growth

"We aspire to leverage our deep expertise in Sustainability topics to bring significant insights that are most valuable to businesses."

"...Verdantix finds that Deloitte ranks first in brand preference for both Sustainability consulting and Sustainability assurance worldwide."

- Verdantix Press release, November 19, 2014

Importance of Sustainability

Business and society are facing an array of urgent and critical social, environmental, ethical, and economic challenges.

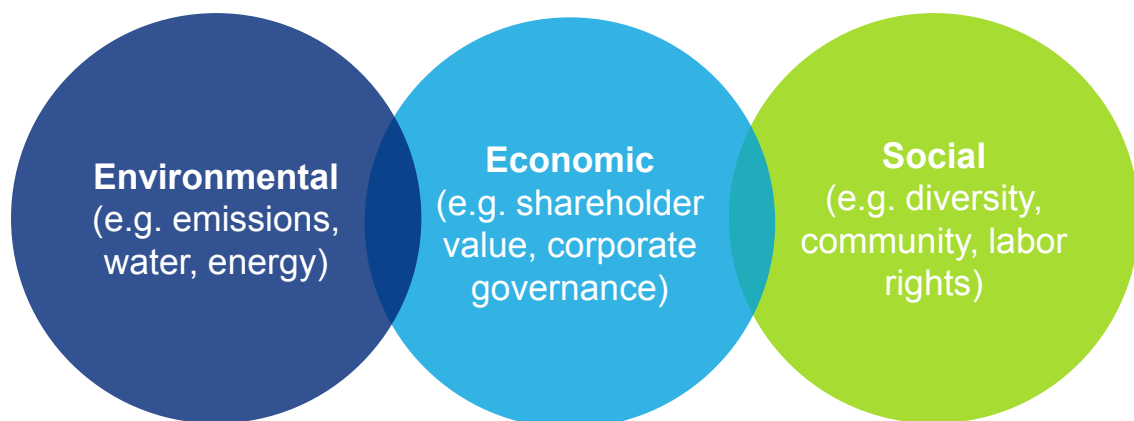

In fact, six of the ten global risks of highest concern (in terms of impact) identified in 2016 by the World Economic Forum are environmental and societal issues.

Because of this, broad societal responses are playing out in the realms of policy, technology, and the marketplace, including a significant growth in the number of CSR indices launched by financial institutions.

Many of the fundamental factors that influence a company's performance and profitability today — energy prices and availability, supply chain reach and resilience, regulation, and public sentiment, among many others — are therefore changing quickly and dramatically. No business or organization is immune to these systemic challenges and societal responses.

This means it is critical to plot adaptive strategies for operating effectively and communicating transparently. While the risks of taking inadequate action are formidable, the sustainability imperative is also creating tremendous opportunities. Each vulnerability constitutes a call for innovation; each unmet need offers a prospect for growth.

Sustainability is about creating strong, inclusive growth based on a foundation of economic, social, and environmental commitment.

“ The continual improvement of business operations to ensure long-term resource availability through environmental, socially sensitive, and transparent performance as it relates to consumer business partners, and the community. ”

In response to sustainability-related opportunities and risks, organizations need to:

- Comprehend sustainability pressures and societal responses to appropriately assess and prioritize risks,
- Convert this understanding into opportunities to reduce cost, increase revenue and profits and manage risks more effectively, and
- Capitalize by implementing sustainable practices across every aspect of their businesses and accounting for their impact in a credible manner.

Service offerings

Sustainability Strategy & Governance

- Establish vision, strategy and goals
- Design systematic Sustainability initiatives which are clearly linked to overall business strategy
- Establish framework to identify risks and opportunities
- Set up system to measure, value and track performance targets

Energy & Resource Management

- Analyse energy, materials, water and waste data
