# Our sustainability services

Deloitte assists clients to embed sustainability strategies through eight service offerings, creating value for organisations through brand enhancement, cost reduction, risk management and business model innovation.

## Sustainability & Integrated Reporting

With expectations around Environmental, Social and Governance (ESG) issues continuing to heighten, we help organisations develop their sustainability and integrated reports whilst providing insights to strengthen existing ones against globally recognised reporting frameworks such as the Global Reporting Initiative (GRI) Standards, the Sustainability Accounting Standards Board (SASB) Standards and the International Integrated Reporting <IR> Framework.

## Stakeholder Engagement & Partnership

We assist our clients in advancing their sustainability agenda by advising on stakeholder engagement strategies and assessments, including engagement measurement and design services, in order to achieve performance objectives and demonstrate accountability to external stakeholders.

## Social Impact

We help organisations identify, measure, value, monitor and report the social impacts of projects, programmes, and policies to align with the United Nations Sustainable Development Goals (SDGs) and optimise Social Return on Investment (SROI).

## Sustainable Finance

We help clients design and optimise responsible investment strategies, as well as assess, analyse and evaluate the environmental and social footprint of investments and green bonds so that they generate both financial rewards, and measurable environmental and social returns.

## Resource Excellence

We assist our clients in managing the business and environmental impacts of natural resources consumption, such as water, energy, waste, and emissions by translating analytical insights into actionable cost savings, risk mitigation opportunities and economic value using globally recognised frameworks such as the Greenhouse Gas (GHG) Protocol.

## Environment, Health & Safety (EHS)

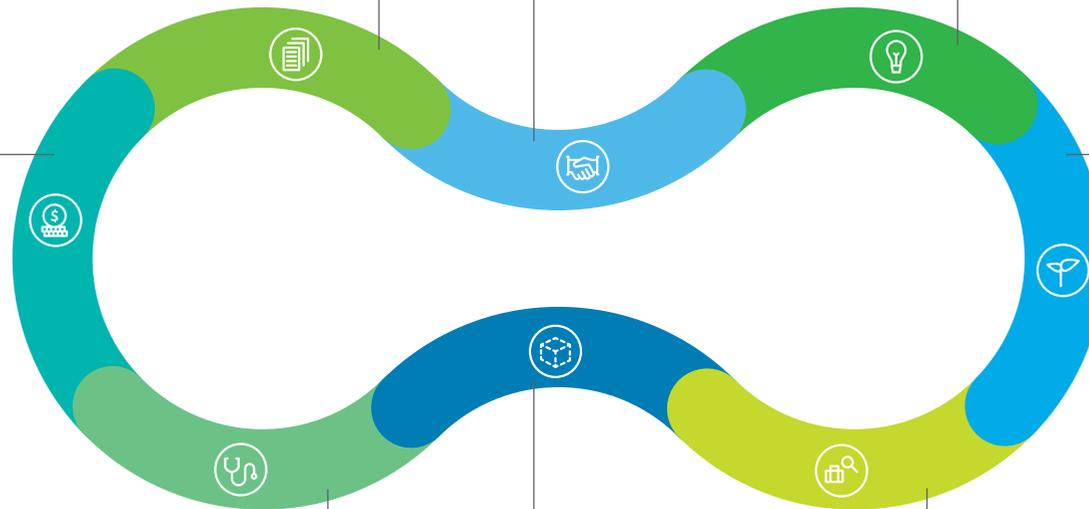

We help organisations navigate the EHS risk and compliance landscape by integrating critical EHS processes into their broader operational risk management and sustainability programmes, including the review of implementation against the ISO 14001 or other bespoke framework.

## Sustainable Supply Chain

We help our clients refine supply chains, product lifecycles and internal operations by addressing diverse issues in supplier engagement and extended producer strategy, sourcing and procurement, packaging, closed loop recycling, supply chain transparency and respecting international human and labour rights.

## Sustainability Assurance

We advise clients on ways to improve the credibility and reliability of their sustainability disclosures by providing both internal and external assurance on sustainability reports, greenhouse gas (GHG) statements and other forms of non-financial information in accordance to standards such as the ASAE3000 and ISAE3000.
