

### Time is running out for SGX listed companies!

The Singapore stock exchange announced that it would require all listed companies to submit annual sustainability reports from 2017 onwards, on a "comply or explain" basis.  
**Time to take action!**

**Did you know?**  
Marina Bay Sands (Platinum Awardee)  
Estimated energy savings: 47,830,000 kWh/yr ;  
Estimated water savings: 60,000 m<sup>3</sup>/yr

### Let's keep it cool

In 2015, an unprecedented binding climate change agreement was reached at the Paris Climate Conference (COP 21), with the aim of keeping global warming below 2°C. In response to that, Singapore's Intended Nationally Determined Contributions (INDC) pledges to reduce Emissions Intensity by 36%. Such ambitious target will greatly affect how businesses use their resources and energy.

**Time to develop climate change mitigation & adaptation plans!**

### Growing money from waste

The mandatory waste reporting requirement expects large commercial premises, such as large hotels and shopping malls to report their waste data and waste reduction plan. This presents an opportunity for businesses to look into improving their resource efficiency which leads to cost savings. Meanwhile, businesses could explore opportunities to turn waste into useful resources.

**Time to improve resource efficiency!**

### Making money sense to build sustainably

With the launch of the 3rd Green Building Masterplan, and the release of Green Mark Version 5, there will be more initiatives to drive green building movement.

**Time to build sustainably!**

### Have you invested in sustainability analytics?

With the Singapore government's vision to develop a smart & sustainable city, they are committed to spend \$0.9 billion on urban solutions and sustainability.

**Time to invest in sustainability analytics to drive sustainable business growth!**
