In Southeast Asia, our team works to customise our service capabilities to each client's specific needs, size and ownership structure. With Deloitte Private, clients will have a dedicated lead partner who coordinates one team, comprising audit & assurance, consulting, financial and risk advisory, and tax & legal professionals.

Our collaborative approach brings the full breadth of our technical and industry capabilities, along with access to the resources of a global network. As clients expand their global footprint, our scale helps efficiently meet their multi-jurisdictional needs but at the same time ensures that they benefit fully from our deep local expertise.

Audit and Assurance

Deloitte's audit process for private companies is grounded on a precise understanding of each client and the industry and environment in which they operate. Our audit approach is thorough without being intrusive, and our professionals with experience in private company matters are able to provide high quality audit services that are transparent and customised to the needs of each organisation we work with.

Our audit methodology incorporates the latest technology including artificial intelligence and data analytic tools that enable us to offer valuable perspectives and to deliver insights which help our clients make informed, real-time decisions.

Financial Advisory

Deloitte Private provides services in mergers and acquisitions, fraud, litigation and restructuring which help you become stronger and more resilient. Our financial advisory professionals provide critical advice and support to assist you in navigating through the lifecycle of your business from merger or acquisition, property transactions and private equity investments through to divestment.

Our strength lies in our ability to offer independent, objective advice to clients around the region. Our independence from debt and equity providers allows us to avoid the conflicts of interest inherent in some financial institutions.

Tax & Legal

We know that private clients do business in an increasingly globalised environment and understand the importance of having a trusted tax advisor who can help turn the complex and technical into actionable business insights.

Our multidisciplinary specialists aim to develop a deep understanding of your business and your family objectives, and apply their industry experience and skills to help you minimise income and capital tax liabilities.

Deloitte helps private companies, their owners and individuals with substantial assets apart from businesses they operate to understand, plan and execute effective business and tax strategies. We have a specialised family enterprise consulting team to deliver succession planning, family governance and family office services to family businesses. Our broad range of fully integrated tax services include tax compliance, tax management consulting, mergers and acquisitions – tax due diligence and structuring, wealth management, international tax planning, asset structuring, and tax audit and investigation; all on a local and global scale.

Consulting

Across the world, private companies are operating in an increasingly complex environment. Technology disruption, globalisation and evolving customer demands are disrupting traditional businesses and operations.

Our Consulting team provides a broad range of services from strategy to implementation. Our professionals bring with them deep industry, business and technology expertise to help you harness the opportunities in the midst of disruption, stay ahead of your competition and exceed your business goals. We help our clients in the areas of business strategy development, merger and acquisition, customer experience, digital services, analytics, business operations, human capital and technology solutions.

Risk Advisory

Whether launching a new product, integrating new technology, or facing industry disruption, private companies are faced with risks that can undermine growth and place them at a competitive disadvantage. However risk, if managed well, can also present companies with an opportunity to protect and generate new value.

Our Risk Advisory professionals assist organisations to understand and mitigate risk across the enterprise, be it from a strategic, operational or regulatory perspective, and pursue intelligent risk-taking as a means to value creation.
