

*Asia Pacific Compliance Center*  
Multi jurisdiction tax compliance,  
accounting and technology services

# The Asia Pacific Compliance Center

The Asia Pacific Compliance Center (APCC), provides tax and accounting compliance and technology services across AP. Its foundation is in the Deloitte network. However, it is staffed by people who create compliance deliverables spanning the AP region. Our approach is based on four cornerstones: People, Knowledge, Process and Technology.

## People

APCC is composed of an appropriate mix of people with skills ranging from tax advisers and accountants, multiple GAAP accountants, IT developers, engagement management specialists to professionals seconded from/to Deloitte Network. All Deloitte employees follow a mandatory training program suitable to their position in the company and their level and with a view to their continuous development.

## Knowledge

Knowledge management is key to our success. The changing regulatory compliance requirements are our permanent focus. These changes include not only the legislative evolution but also the practical compliance aspects such as due dates, extensions, new forms, e-filings, e-audit requirements, etc. A specialists team takes care of a regular update of the APCC knowledge databases in collaboration with the Deloitte network.

## Processes

Our processes are not only aimed at efficient and timely delivery, but are customised in cooperation with our clients. Potential improvements to the process are discussed and where appropriated, implemented. Our processes are aligned with those applied in other regional compliance centers.

## Technology

Through our technology platform, Deloitte provides one clear view into the accounting and tax compliance process through a globally harmonised and scalable approach. We integrate market leading software to provide easy access to shared documentation and to automate as much of our compliance process as possible.

---

“Asia Pacific through a single point of contact. Assisting you with your tax and accounting compliance processes centrally”

APCC was founded in 2009 and is today the compliance partner for large organisations, moving towards centralized accounting functions through shared service centers and seeking leading practices in compliance. It is thus ideally placed to facilitate the standardisation and harmonisation of processes and deliverables of our clients.

With tax technical, technology, and related advisory experience, APCC aims to help organisations transform tax and accounting processes and technologies to enhance efficiencies, align data, and improve transparency.

For our clients this means less costly, less risky, and less fragmented services. They are confident that their tax and accounting compliance processes are being dealt with consistently and efficiently.

APCC deals with more than 50 tax compliance assignments in Asia Pacific and beyond. Our team has specific knowledge of how to set up and transition global services. Our teams are structured to provide to our clients:

- a single point of co-ordination for headquarters / regional client shared service centers;
- a central team that monitors global compliance services, collects relevant information from each jurisdiction, and makes that information readily available for your compliance teams; and
- a central delivery model for tax and accounting compliance.

**Our typical clients are**

**Our process**

**Our compliance processes**

- are globally scalable and fully documented
- produce standardised deliverables
- are customisable to client needs
