Connected Supply Chain: The Backbone of Central Europe's Automotive Resilience

Explore how Central Europe's automotive industry is tackling unprecedented challenges such as **labor shortages, regulatory demands, and supply chain disruptions** with the help of the newly launched **Central Europe Supply Chain Center of Excellence**, in partnership with Deloitte Germany. This revolutionary center is focused on enhancing Connected Supply Chains, offering holistic, **cost-effective solutions**, and **round-the-clock support** to **streamline operations, mitigate risks, and drive innovation**. Discover how businesses can optimize supply chain management to maintain competitiveness amidst the shift to electromobility.

Navigating the EUDR: A pathway to sustainable supply chains in the automotive industry

The European Union Deforestation Regulation (EUDR) is reshaping the automotive industry's approach to supply chain management. As companies face increasing pressure to ensure **environmentally responsible sourcing**, the EUDR presents significant compliance challenges but also offers a strategic opportunity to lead in sustainability. Automotive manufacturers must prioritize transparency, traceability, and sustainability to **meet new regulatory standards** and **enhance their competitive edge**. Discover how the EUDR can transform your supply chain practices and position your company as a leader in environmental responsibility.

Deloitte latest analysis and studies

Sustainable Supply Chain Survey 2024
