Back-to-College Survey 2016
Two sides of the shopping story

Deloitte's 2016 Back-to-College Survey

Key Insights & Findings

Spend is likely to remain robust this year with parents and students differing slightly in their spending and expectations

- Parents forecast average spend of \$1,345, whereas students forecast \$1,082
- While college supplies and clothing still dominate the lists for both college parents and students, students are more likely to predict spending on technology products—the most expensive category
- While 57% of students say they will contribute over half of the Back-to-College funds, only 16% of parents agree

Shoppers expect to spend most in physical stores, but the influence of digital is pervasive

- In-store prevails over online for most shopping categories, but students expect to purchase the majority of their college supplies and tech products online
- 82% of students and 74% of parents will do research online before purchasing products in-store
- 65% of parents and 50% of students are buying fewer traditional college supplies in light of digital technologies
- 45% of students will look to social media, mostly to find the best deals

Students are budget conscious, and expected spending varies over the course of the college experience

- 83% of students will buy used books and seek free shipping options to stretch their back-to-college funds
- Spending trends downward over the college lifecycle, peaking with freshman and reaching a low point with seniors

Parent vs. student shoppers

College supplies and clothes/shoes top the list of products that parents and students plan to buy

"Please select the products you plan to purchase for your student"

"Please select the products you plan to purchase for yourself"

A deeper dive on students

Seniors are likely to spend the least compared to shoppers from other grades

"How will your spending this year on back-to-college items compare with what you spent last year?"

Why do you plan to spend "more"?

1. Need more items
2. Need more expensive items
3. Prices are generally higher

Why do you plan to spend "less"?

1. Need fewer items
2. Need less expensive items
3. My household has less money

About the survey

The surveys were commissioned by Deloitte and conducted online by an independent research company from June 22 – 27, 2016. The study involved two surveys, which polled a sample of 750 parents with college-going children and 1,200 college-going students, and has a margin of error for the entire sample of plus or minus three percentage points.
