Program Partners 49
I am honored to present you the winners of the Fast 50 program this year in Turkey. In a year which economic instability reverberated in the emerging markets and access to finance was costliest of the decade, we once again see an outstanding growth performance in the Turkish technology industry.

Witnessing the striking performance of both new and returning winners strengthens our belief that there will soon be technology firms among the globally renowned Turkish brands. We feel privileged for putting the spotlight on them, as we have been doing for the last fourteen years.

It is a great pleasure to see that a number of inaugural winners can join the list, still achieving more than 100% growth rate. Fintechs are slowly but surely gaining ground on the list. We believe the amendments to the Payments Law will fuel this growth even further.

Fast 50 program is Deloitte’s commitment to a new generation of corporations that will shape the future of business. As such, we take great pride in identifying the fastest growing technology companies in Turkey whom we believe contribute greatly to the digital transformation of the Turkish industries. Our Technology Fast 50 program is a great means to do not only just that, but also celebrate the entire technology ecosystem for its productivity and creativity.

I want to extend my gratitude to Facebook for their cooperation and support in bringing Fast 50 2019 Turkey.

I also would like to thank our long-lasting partners MOBILSIAD, ÖDED, TBD, TBV, TESİD, TTGV, TUBİSAD and YASAD whom exerted great efforts for the realization of the program.

Once again with great pleasure, I present you the 50 fastest growing technology companies of Turkey.

Metin Aslantaş
Technology, Media and Telecommunications (TMT) Industry Leader
Deloitte Turkey
In this mobile era where the world is getting increasingly connected every day through countless technological advancements, supporting the technology ecosystem has become more important than ever. These companies are the ones that are, and will be, making our lives easier thanks to their innovative products and services. That is why they need more support to reach their business objectives.

As a global technology company, we have always believed that one of our most important responsibilities—both globally and in Turkey—is to provide these upcoming technology companies and startups with the resources and knowledge they need to grow their businesses, reach new customers and access bigger markets. That is how we can make real impact on this country’s economy, as well as in people’s lives.

Just a little over 15 years ago, Facebook itself was a small technology startup. With its mission to “bring the world closer together and give people the power to build communities”, it became a platform that connects and inspires billions of people all from over the world. However, this is not a success story beyond the reach of other similar companies. In fact, we want to show people that anyone can do this. With this in mind, and through our efforts and investments, we have worked hard for many years to be the best partner to technology startups in Turkey, and we continue to do so.

It is an honor to support Deloitte’s “Technology Fast 50” program in its mission to celebrate innovation and technology. This program doesn’t just award successful and upcoming technology companies, but also gives inspiration to many others who have just started their own journey. As Facebook, we are very grateful for the opportunity to be Deloitte’s program partner and be a part of two special awards given for the first time this year: the Cross-Border Award and the Women in Tech Award, both of which represent the importance and value Facebook gives to helping businesses of all sizes in Turkey go beyond borders, and empowering, inspiring and training women entrepreneurs across the country. I hope this year’s 50 fastest growing technology companies of Turkey will inspire hundreds of others.

Technology Fast 50 Turkey 2019 Big Stars

This category recognizes the fastest growing companies that have achieved €50,000,000 or more in revenues during fiscal year 2018. These “Big Stars” demonstrate that even large companies can remain nimble, posting impressive year-over-year growth.
ASELSAN, the leading defense company of Turkey, is a high technology, multi-product company that designs, develops and produces genuine products reflecting edge technologies to meet the requirements of Armed Forces and Public Security Entities.

ASELSAN, with the firm belief that “a country’s technological wealth is composed of the various technologies in its possession”, allocates about 6% of its yearly turnover to R&D projects, which it finances through its own resources.

For the last 12 years, ASELSAN sustained its position in the world as being in the list of top 100 defense companies. Our objective is to become one of the top 50 companies in the world through the development of original and national opportunities and talents of the highest level.

Being the main solution provider for the Turkish Armed Forces, ASELSAN also sustains its competitiveness in the international arena, with its export to 63 countries and active participation in NATO and other international joint research/development and production programs. ASELSAN has become one of the significant members of global defense industry in terms of revenue and technological advancements.
Technology Fast 50 Turkey 2019
Big Star Award

Turkey's largest public software company and most valuable information technology brand* Logo, operates in software sector as one of the leading companies since its establishment in 1984. Logo offers application software to enterprises ranging in size from micro companies to largescale corporations, who increased innovation and creativity in its products and services, lays the foundation for sustainable success by accompanying more than 200,000 companies so far on their journey of growth, with about 1,200 its employees and more than 800 business partners in 4 different countries at 7 different locations.

In addition to the Enterprise Resource Planning solutions, there are many complementary solutions such as Customer Relationship Management, Human Resources Management, Workflow Management, Warehouse Management Systems, Business Analytics Solutions and Retail Solutions. Having taken the lead in the ERP sector in terms of number of customers for many years, Logo has a large and dynamic ecosystem that extends from partners to Logo users, from academicians to students and industry professionals. Along with the power stemming from this ecosystem, and believing in the dreams of its customers, sharing the same goals and working diligently to fulfill them, Logo carries out its business with the vision of coding Turkey's future together.

Women in Tech Award

This award is for companies operating in the technology sector that advocate for increasing female participation and their promotion in the workplace.*

*The reward is appointed to a company that is run by a female CEO, has more female employees and, has the highest revenue growth for the past 4 consecutive years.
Paycell is an end-to-end payments solutions provider, which leverages multiple payments technologies in order to offer one single platform to cover both consumer and the merchant needs. Paycell creates a holistic platform for various daily payment methods, from traditional plastic cards to digital wallets and QR-codes, and gives consumers the ability to make a payment from wherever they are with one simple, phygital experience, online or offline. In addition, pioneering the QR payments revolution in Turkey via its secure and fast technology, Paycell will launch QR-based mobile payments in more than 10,000 points-of-sale in Q1 2020.

For the consumers, Paycell provides a digital payment solution that allows consumers to use any payment card, their wallet balance or micro-limits to enable shopping experiences that are as simple as a click, tap or touch – online, in-store or anywhere. Operating as an all-in-one solution, which offers bill payments, QR-code based in-store payments, remittances & payments via direct carrier billing under one single platform, the Paycell ecosystem is on a fast growth track. The business also offers a prepaid debit card (Paycell card), which enables minors and the underbanked population of Turkey to be included in the financial system via their Paycell Debit Cards.

For the merchants, Paycell offers end-to-end in-store & online QR payments infrastructure, online PSP services, digital wallet services and DCB (direct carrier billing) services. DCB is especially vital in order to include Turkey’s underbanked population which is in the ballpark of 25 million people. As value added services, Paycells offers loyalty/CRM, real-time and behavioral targeting and segmentation services to enable its merchants to know their customer as much as possible, while saving costs for merchants who don’t have the necessary infrastructure to execute loyalty programs or CRM campaigns.
Cross-Border Award

This award recognizes the Fast 50 winner companies for their successful cross-border operations based on the percentage of their exports and their growth rate over the last 4 years.*

*The selection criteria of the company that has achieved the highest success is based on the equal weighted average of 2018 turnover size, the ratio of foreign sales to total sales and, the turnover growth rates of the last 4 years.
Teknasyon: Teknasyon is an innovative, growing and enhancing company which invests in the work, the research and development and most importantly the employees. In Turkey, Teknasyon is a pioneer in its field and represents its country very well globally. Behind all this success, hard work and perseverance lie.

Our story dates to 2013 when we were founded. At the beginning, we had one office and a team of 12 people. In time, we grew and joined new members to our team. Now we are a big family of more than 205 people working in our offices in three different cities. We enhanced our business not only in our home country but also in the whole world.

Today, we have several cross-border products in various categories like entertainment, lifestyle, games, health & fitness, etc. and they are available in 155 countries, 49 languages. Naturally, 95% of our revenue comes from abroad. Since we always wish to advance, this rate will not stop us, so we do create products for our own use. For instance, we use our own BI and Marketing Performance tools to maximize profitability. After developing such useful intra-company tools, why not making others benefit from them, too? From this point of view, we have launched some B2B projects such as VerifyKit and Desk360. Our considerable experience in the industry has driven us to take up a new perspective which led us to invest in other projects because we know that that a business can only be flourished with collaboration.

**otelz.com:** Established in 2013 in Istanbul, Otelz.com has grown from start-up to one of the largest travel e-commerce companies in Turkey. Otelz.com, a Sanko Group brand, provides online booking service to the users for over twelve thousand properties from Turkey and North Cyprus. In addition to hotel chains and properties, Otelz.com offers many accommodation alternatives like hostels and boutique hotels. With its user friendly design, Otelz.com shows many information that the users need from room prices to the location, from service and facilities to the availability status at one listing.

Each day, more than 12,000 room nights are reserved on our platform. So whether travelling for business or leisure, customers can instantly book their ideal accommodation quickly and easily with Otelz.com, without sharing their credit card information. Via our experienced call center, our customers can reach Otelz.com 24/7 for assistance and support any time of the day or night. Last of 2019 Otelz.com published new platform and add many features.

Multilanguage, online payment and strong pricing model is most important features on this new version. Otelz.com will be open new different countries market in 2020.

**Pixery:** Pixery is a global tech. company building innovative apps for next generation mobile creatives. Our video apps reach more than 40 million people, consistently top-ranked and featured by Apple and Google.

Pixery’s first application, Funimate, is an award-winning mobile video editor for kids & teens, has close to 40 million downloads, featured globally by Apple, selected as Editor’s Choice by Google and ranked in Top-10 in US Photo&Video category.

Impresso, another Pixery app, makes it super easy to make professional looking videos for marketers and business owners to build and boost their brands on social media. From the very first day of its launch, it grabbed high attention and was featured globally by Apple. Our users with no prior expertise in video making and limited resources, enjoy the capability of making professional looking promo videos in few minutes.
EMFA Software Consultancy: EMFA Software and Consultancy has been established to serve public institutions and organizations and the private sector in the field of information technologies with its experienced and innovative staff in the second quarter of 2013. EMFA, which has been serving in Hacettepe Technopark since 2015, has opened an Azerbaijan Office in 2018. Thus, a market gate was created for the States of Turkic and the Caucasus. In 2017, EMFA ERP Software took the 3rd place in the Turkey Based Producer Revenues category. In 2018, EMFA awarded as one of the three companies with the highest R & D Revenue in Hacettepe Technopark. According to the Top 500 IT Companies of Turkey results, EMFA took the 1st place in the Artificial Intelligence category. EMFA has been honored with the First Prize among the 50 technology companies that have achieved the highest growth in the last five years in the ‘Deloitte Technology Fast 50 Turkey’ valuation at the end of the 2018. After this award, EMFA had an opportunity to represent Turkey in the ‘Deloitte Technology Fast 500 EMEA and it ranked first place in local currency. At last, in the Turkey 100 competition which is arranged by TOBB, EMFA has became the 13th and 1st in its sector. As a result of the assessments made by TIM and the Ministry of Commerce, EMFA has awarded the certificate of achievement by taking the 9th position in 1400 companies in the Turkey’s first innovation development program which is InovaLIG, in the ‘innovation results’ category. In this sense, EMFA continuously develops its respected and successful position with its experienced engineering and consultant staff.

iyzico: Founded in 2013, iyzico is the brainchild of German-born Turks, Barbaros Özbüğutu and Tahsin Isın, who moved from Germany to Turkey to set up the business. Started out with 3 people, iyzico is now Turkey’s fastest growing fintech company composed of more than 150 people providing secure payment solutions to online sellers of different sizes as well as online shoppers. iyzico offers premium product in terms of its quality service. More than 35,000 global and local merchants and more than 800,000 buyers who use iyzico are supported by real people, in real places, who can provide real support. iyzico’s proprietary technology offers simple, seamless and secure payment solutions to businesses and consumers. It enables merchants of different sizes to receive online payments via their website or link as well as individuals who want to shop online securely with iyzico’s Buyer Protection service free of charge. iyzico is your ultimate solution partner whether you are selling or buying online.
Enqura: Enqura provides enhanced technologies with qualified human resources as rational solutions. Mission of Enqura is being companion with customers in innovation journey. Based on more than 15 years of information technology experience and high skilled human capital, Enqura focus on enterprise solutions delivery and information technology consultancy.

Enqura Digital Banking & Insurance Solutions: Having an experienced team of a financial sector background, Enqura understands the requirements and needs of financial institutions well. This helps Enqura to develop solutions answering the real market requirements.

Enqura Data & AI Solutions: Enqura acquired a BI company in 2017 and gained a deep know how on data modeling, datawarehouse (DWH), big data and business intelligence reporting. Enqura started R&D on AI solution in 2016 and since then developing solutions for customer specific needs.

Enqura Blockchain Solutions: Having developed its own enterprise blockchain framework, Enqura provides blockchain and distributed ledger solutions based on the specific customer requirements. Enqura accomplished the first financial blockchain Project in Turkey for Istanbul Stock Exchange. Enqura leads a visionary blockchain Project for global trade together with its partner: “Trade in Chain”

ISSD: ISSD is working on digital signal processing, software development and electronic design since 2009. ISSD provides solutions for Intelligent Transportation Systems (ITS) such as active traffic management, dynamic junction management, automated number plate recognition.

Dynamic Juction Control System, CHAOS is working effectively at more than 750 junctions in Turkey and in 6 countries. Alternative traffic data collection systems (Bluetooth, FCD), traffic simulation software, electronic enforcement systems and traffic engineering consultancy are other products / services of ISSD.

ISSD continuously works on R&D projects to seek solutions for transportation problems with a young and talented team.
Technology Fast 50 Turkey 2019
Winners Profiles*

*Winner companies excluding top 10, listed alphabetically.
Having been established in 2007 to produce solutions in the field of the Internet of Things (IoT), Ankaref has taken important steps toward being an ‘IoT Service Provider’ with its successful projects completed in a short period of time, and has become one of the most prominent actors in the sector.

In addition to its headquarters in Ankara, Ankaref renders services in its Istanbul branch as well. With its powerful team, it pioneers innovation-based developments in Technology Development Zone of Middle East Technical University.

Ankaref produces solutions to minimise human errors, ensure proper management of processes and reduce operating costs in various fields, particularly in the production and service sectors. By developing R&D-based technological products and presenting a wide range of approaches to problems, it always manages to be one step ahead of its rivals. While Ankaref’s identification and auto ID projects that started in the fields of librarianship and museology have caught attention predominantly in the public sector, it also engages in successful projects in the spheres of retail business, textile, health and industry.

Heading toward being a world brand with its projects and solution partnerships in the international arena, Ankaref is proud of being one of the local companies with global competitive power that it has gained in a short period of time thanks to its sustainable productivity. Having started out with the objective of “constructing the future as of today”, Ankaref aims to be a leading exporter organisation with high value-added solutions.

The ANOVA Group comprises four companies:

- Anova Engineering and Computer Com. which is a design and simulation software and high performance hardware product and service provider (2003),
- Anova Project and Consultancy Com. which is a design, simulation and R&D company whose office is in ODTÜ Teknokent (2008),
- Anova Defense and Automotive Inc. which is a manufacturing company that produces products designed for the defense sector (2013), and
- Numesys Yazılım Sistemleri A.Ş. which has Elite Channel Partner status, and is the representative of ANSYS, founded in partnership with Figes Inc. (2018)

These are the legal entities that operate within the framework of R&D Today for Tomorrow. ANOVA’s goal is to produce technologies that decrease our external dependence through localization and technological advances, thus ensuring our companies maintain the ability to create unique designs through Computer-Aided Engineering, to reduce the duration and cost of design processes, to increase the efficiency of their products and give our companies a say in the global market. Anova’s experience comes from the fields of mechanical design, electronic design, software development and simulation technologies, which it uses to contribute in an integrated way to such areas that are vital for our defense sector as: Weapon Systems and Military Platform Integration Projects, Environmental Air-conditioning Systems, Turbomachines & Cabin - Console Systems As an important strategic business partner of ASELSAN, ANOVA has designed, manufactured and produced many products that were previously procured from abroad, and has played an important role in decreasing our external dependence through its unique products.

ARD GRUP

Arda Ödemiş
+90 312 299 25 95
Hacettepe Üniversitesi Teknokent 1. Arge Binası No:97/20 Beytepe Çankaya/Ankara
www.ardbilisim.com.tr

ARD is considered as one of the market leaders in Turkey when it comes to System Integration and Software Development Companies. This title and reputation have been gained by being responsible for more than hundreds of projects that have been delivered successfully to the Private and Public Sectors of Turkey since its establishment in 2006. Under the umbrella of the Holding, ARD holds Subdivisions and Companies that have activities in Informatics, Healthcare, Defense, Energy and Consultancy. ARD is considered with its young and ambitious Management as one of the fastest growing Companies in Turkey.

ARD actively operates in Smart Solutions; it provides end to end solutions within worldwide projects, also have important accomplishments in public law sector in Turkey. ARD fulfilled the biggest judicial network project integrated in the national judiciary informatics system of Ministry of Justice and also the developments - cloud services of OCAS project where the entire information is processed, which is used continuously and actively by all security, prosecutor offices and bar associations in throughout Turkey. Furthermore, it has developed UHAP the second largest legal platform in Turkey. ARD is the proud developer of the Logistical Warehouses Automation, Information Infrastructure project for AFAD enabling management - tracking of the inventory throughout Turkey with RFID technology. We are serving customers in a global scale with solutions such as IoT, Cloud, Big Data Analytics, Industry 4.0. ARD is one of the key project partners of EU Projects in EUREKA cluster.
ASELSAN, the leading defense company of Turkey, is a high technology, multi-product company that designs, develops and produces genuine products reflecting edge technologies to meet the requirements of Armed Forces and Public Security Entities.

ASELSAN, with the firm belief that “a country’s technological wealth is composed of the various technologies in its possession”, allocates about 7% of its yearly turnover to R&D projects, which it finances through its own resources.

For the last 12 years, ASELSAN sustained its position in the world as being in the list of top 100 defense companies. Our objective is to become one of the top 50 companies in the world through the development of original and national opportunities and talents of the highest level.

Being the main solution provider for the Turkish Armed Forces, ASELSAN also sustains its competitiveness in the international arena, with its export to 63 countries and active participation in NATO and other international joint research/development and production programs. ASELSAN has become one of the significant members of global defense industry in terms of revenue and technological advancements.

Barikat: Barikat was established in 2008 and started to provide services in the field of cyber security with over 203 specialists. Barikat provides cyber security services to public institutions and organizations, especially to the defense industry, banking and energy sectors. In Barikat, 10% of the annual budget is allocated to R & D expenses.

LoDDoS: LoDDoS is an automated DDoS testing platform which is managed through a web interface. The platform simulates real DDoS attacks against the organizations via real attack parameters. This enables organizations to test the limits and efficiency of DDoS mitigation systems before a real DDoS attack. The tests can be performed with a few clicks and stopped, restarted, reported anytime and the reports can be stored to evaluate later on. Thus, the benefits of the DDoS mitigation investments can be easily monitored.

ASMA: Systems, which have no owners on networks and therefore which have not been updated and have vulnerabilities, are more susceptible to attackers. These systems contain software and hardware vulnerabilities and therefore, attackers are able to access to sensitive systems of enterprise through such systems. Therefore, all systems on the network need to be automatically detected and systems so detected need to be aligned with security baseline of the enterprise. ASMA enables the detection of assets in the most accurate and fast fashion through use of active and passive scanning methods. These systems may contain software and hardware vulnerabilities and therefore, attackers are able to access to sensitive systems of enterprise through such systems.
Biletall Domestic and Foreign Trade Inc. was founded with the aim of operating in the fields of supplying online excursion tickets and electronic guidance systems in 2006. Working on supplying online excursion tickets, which also constitutes our main area of focus, has started with the Tübitak supported project of National Ticket Supplying System and continued unceasingly to date. Biletall Organization which is the founder of the most common and modern ticket selling and supplying system in Turkey is able to sell and supply tickets of many companies operating at home and abroad in the field of transportation services.

Hype

Hype is a data-driven marketing agency that uses the latest available products and its own technology to meet the clients' sales and marketing goals. Hype provides services on data analysis, conversion rate optimization, performance marketing, and search engine optimization. Our technologies consist of Incognito, Predi, and Alerty.

Incognito is a business intelligence tool we built to assess a particular brand’s search engine performance - both organic and paid. It calculates a search engine visibility score based on the number of keywords a domain ranks for, search volumes and rankings of those keywords. This makes it possible to compare different domains or see how they performed in the past. There are also pre-defined industries where you can evaluate how a domain performed in that particular industry.

Predi is a forecasting tool for Google Analytics and AdWords. Predi analyzes main trends such as mobile device distribution, organic traffic volume or category seasonality and uncover the direction of the client’s business with the power of data on Predi with just a couple clicks.

Alerty is our latest in-house developed tool that detects data anomalies in real-time. For the given set of metrics, Alerty constantly tracks the data. After comparing it to the previous periods, it lets us know instantly if there is anything out of the ordinary so that we can act on it.

Inomera Research

Inomera Research was founded in 2008 and has been working in Telco, Retail, Mobile & Banking industries since then.

Inomera is focused on Telecom since it’s foundation in 2008. Inomera has delivered successful projects and products to telecom giants such as Vodafone, Turkcell, Avea, Turk Telekom, Ericsson and we have continuous relations with every customer we work with.

Inomera’s headquarter and research & development center is in premises of one of the most prestigious universities of Turkey, Boğaziçi University. Taking advantage of research and innovation culture of the university, and our experienced engineering team, Inomera keeps up with the latest changes in the technology. Recently Inomera opened its first international sales office in London, at the heart of Tech City UK. Through London office Inomera is marketing Netmera and other products to European and western markets.

Inomera’s mobile engagement platform, Netmera which is the result of several successful R&D projects, is now used by Vodafone, Starbucks, N11, Turkcell, ING Bank and many other top companies. Netmera analysis more than 150 million mobile users in real time and enable brands to run their campaigns based on contextual consumer behavioral data.

Rather than working on many projects on different industries, we focus on Telecom, Mobile, Retail & Banking industries. The dedication gives us strength in our core competencies. The company consist of Sales&Marketing, Engineering, Customer Success/Support and R&D departments.

As of September 2019, Mobven continues operations as a subsidiary of Payten, the payment solutions arm of Asseco, the 6th largest software house in Europe.
obilet.com is the pioneering online platform that enables users to purchase intercity bus and international flight tickets. The company was established by two industrial engineering students in 2012. obilet.com provides users with the opportunity to compare and find the most suitable tickets to quickly purchase or cancel without demanding any extra charges.

Started as a domestic bus ticket provider, obilet.com gradually expanded into a platform for both domestic and international tickets, including the flight tickets. obilet.com is advantageous for travelers who prefer to easily book tickets via the internet. obilet.com has always been innovative in terms of providing infrastructure and support for the users who can easily and safely buy their tickets by choosing among the leading bus companies and airlines.

obilet.com’s fast and handy interface ensures users experience a secure, easy and quick purchasing process. High tech SSL protocols are used in order to secure the payment process. Moreover, the company assures to reduce the problems that users may encounter before and during purchasing as well as throughout their journeys. One of the most impressive features of obilet.com’s services is the sunlight calculator through which can even see the direction of the sun during the journey and purchase their tickets accordingly.

Award-winning exclusive platforms of obilet.com, namely, desktop website, mobile website, iOS and Android apps have reached 400 million visitors since the day it was founded and ranks among the most visited travel sites in Turkey.

Paycell is an end-to-end payments solutions provider, which leverages multiple payments technologies in order to offer one single platform to cover both consumer and the merchant needs. Paycell creates a holistic platform for various daily payment methods, from traditional plastic cards to digital wallets and QR-codes; and gives consumers the ability to make a payment from wherever they are with one simple, phygital experience, online or offline. In addition, pioneering the QR payments revolution in Turkey via its secure and fast technology, Paycell will launch QR-based mobile payments in more than 10.000 points-of-sale in Q1 2020.

For the consumers; Paycell provides a digital payment solution that allows consumers to use any payment card, their wallet balance or micro-limits to enable shopping experiences that are as simple as a click, tap or touch – online, in-store or anywhere. Operating as an all-in-one solution, which offers bill payments, QR-code based in-store payments, remittances & payments via direct carrier billing under one single platform, the Paycell ecosystem is on a fast growth track. The business also offers a prepaid debit card (Paycell card), which enables minors and the underbanked population of Turkey to be included in the financial system via their Paycell Debit Cards.

For the merchants, Paycell offers end-to-end in-store & online QR payments infrastructure, online PSP services, digital wallet services and DCB (direct carrier billing) services. DCB is especially vital in order to include Turkey’s underbanked population which is in the ballpark of 25 million people. As value added services, Paycells offers loyalty/CRM, real-time and behavioral targeting and segmentation services to enable its merchants to know their customer as much as possible, while saving costs for merchants who don’t have the necessary infrastructure to executive loyalty programs or CRM campaigns.
PayCore

Established in 2001, PayCore offers innovative, end-to-end payment technology solutions to banking, telecom, payment service provider, personalization office, government, transportation and retail sectors in the field of financial payment technologies, especially card payment, digital payment, smart city and EMV solutions and secure hardware services. PayCore, which has more than 30 awards locally and internationally in the areas of card software packages, digital payment solutions, smart city applications, EMV solutions and secure hardware services, has been a technology solution partner to more than 150 clients in over 35 countries. PayCore has more than 20 global firsts in Europe, America, the Middle East and India, including the first contactless credit card, first payment via wristwatch, first screened credit card, first application of contactless credit cards in transportation, mobile wallet, new generation EMV/POS integration, shopping via TV, digital payment in taxis, SMS payment systems in petrol stations, the first NFC enabled smart ID and national mobile wallet. PayCore's R&D center is located in ITU ARI-3 Teknokent in Istanbul, Turkey.

PayCore Processing Services, providing payment services for financial institutions and money transfer solutions for GSM operators and banks, is also a global partner with the solutions it has developed for the transportation, government and retail sectors. The critical role ECR/POS transactions play in real-time communication between banks and the Ministry of Finance, and the solutions it provides for electronic commerce infrastructure, which has changed with the e-Money legislation, are each a global reference for PayCore Processing Services. As well as PCI DSS certificate, PayCore Processing Services has ISO certificates, Visa (Agent), MasterCard (Member Service Provider) and BKM Processing Service approvals in the fields of data security, business sustainability, service management and disaster management.

PayTR

PayTR offers online merchants secure Virtual POS solutions and payment services. PayTR was founded hundred percent on domestic capital and has not needed additional funds to grow. Despite entering the market with a limited budget and work force, the company has grown exponentially and continues to grow as a result of its success at offering innovative and needs-based solutions.

PayTR is comprised of six departments which involve customer relations, operations, risk management, internal audit, finance, marketing and sales, and IT department. The company is governed by a management board which consists of three members and CEO. The company offers services 24/7 with 40+ employees working at the aforementioned departments.

The company went through reorganization in 2015 and completed all the necessary steps in compliance with the updated governmental regulations. PayTR is one of the few companies that holds local payment services license in Turkey.

The number of customers pleased with the secure and trouble-free transactions offered by PayTR is over 12,000 and increasing day by day. Receiving positive feedback from the customers encourages PayTR to do even better.

The goal of PayTR is to keep up its reputation as a trustworthy payment service provider and always achieve better thorough customer-focused service and innovative solutions.

RND is the leading company in Turkey which provides not only software, design and operational services. We pride ourselves on working with some of the best global companies (Adidas, Reebok, Benetton) located in Turkey. We act as a partner and value the relationships we hold with all our customers. Since 2003, when our company has born, RND has built a trustable reputation for delivering first class solutions to business.

RND e-commerce system is an integrated solution, which is developed to use right marketing methods for your products. It is not only a software, design or hardware service. The purchased service is mainly our know-how. Most suitable targets will be defined for your brand by a team that undertakes the Internet marketing of many brands. Services provided under "e-Commerce Outsourcing" are: infrastructure and hardware, software and design, security, Bank Pos integration, Logistics Infrastructure and Call Center.

We are now working with 80 team members; whom are selected to respond every need to our customers. The staff involves Software Engineers, Art Directors, Graphic Designers, Sales and Marketing Directors, Customer Services (Call Center), Logistic and Operation Team, Website Directors and IT Support Specialists.

Today, we create e-commerce designs for the most well-known brands in Turkey such as Adidas, Reebok, Levis, Benetton, Vans, TheNorthface, VF Group, Atasun...
Simsoft was established in 2006 as a research and development company at METU Technopolis and showed remarkable progress in 10 years. It is awarded as one of the fastest-growing 100 companies in Turkey and also one of the 15 so-called “star” companies operate in METU’s Technopolis. It currently has ISO-9001:2008 and CMMI Level 3 certificates, meaning that its software development processes are in compliance with global standards.

The core expertise of the company is modeling and simulation systems, as well as platform management software, test simulators, computer-based training and serious games. In terms of platform management software, Simsoft is involved in areas such as mission planning, combat management, command control, data link, embedded software, and test simulators.

Recently, inline with its steady growth, Simsoft has restructured the operation under four main groups as Simulators, Defence and Aerospace Systems, Visual Systems Group and Gaming and Simulation.

Robotistan was founded in 2011 by several engineering students in Istanbul. The company has focused on supplying robotics and electronics materials, and providing research & development and engineering services. Robotistan.com, which is the market leader in Turkey, supplies more than 4500 SKUs to developers and makers from stock in a very short time.

Robotistan’s products are being delivered by www.robotistan.com e-commerce website, favorite marketplaces and offline marketing channels to the customers. Robotistan works on hardware solutions with a leading expert engineer crew. The company, especially, deals with the areas about STEM Education, IoT, robotics and 3D printing technologies. In addition to this, development tools (boards) are produced for makers. The first and foremost, the company aims to carry its local success in e-commerce and hardware designing to the global market. For this reason, the company has started to export self-developed products in 2016 and e-commerce services are also covers all over the world with own it’s website and known marketplaces.
Tekna, founded in 2005, is one of the leading IT services provider of Turkey. Tekna offers Software Solutions and Salesforce Consulting services throughout Europe, the Middle East, and Central Asia.

With its deep technology knowledge, strong engineering background, and client-oriented approach, Tekna works with clients across different business sectors such as financial services, telecommunications, hospitality, FMCG, retail, e-commerce and media.

Tekna collaborates with clients to help them achieve better business results through its application development and IT consulting services.

To offer its clients the best quality services, Tekna follows the latest trends in its sector and differentiates its services by responding to the ever-changing conditions and customer expectations.

Founded in 2005, Sistem 9 was the first company to bring closed circuit television broadcasting to Turkey. Sistem 9 entered the sector by creating indoor digital channels for advertisers at hair styling salons, and in 2007 it started to provide several places, from banks to cinemas, fast food chains to airlines, and gas stations to communication companies, with Digital Signage Systems services.

Today, Sistem 9 offers special services to over 200 medium and large-scale institutions and has become one of the best of its sector in Turkey and Europe thanks to its managements of over 40,000 screens in 23 different countries. Sistem 9 Medya is the leader in Turkey when it comes to Digital Signage Systems technology and it also has Turkey's broadest, most common, securest, and most functional network. Sistem 9 is the sole producer of the S9Vision Digital Signage software, which we use in our services. Sistem 9 is the sector's only company providing turn-key services and incorporating every stage, from software to installation, content management to content production, and remote access screen control to on-site technical services.
Teknasyon

Teknasyon is an innovative, growing and enhancing company which invests in the work, the research and development and most importantly the employees. In Turkey, Teknasyon is a pioneer in its field and represents its country very well globally. Behind all this success, hard work and perseverance lie. Our story dates to 2013 when we were founded. At the beginning, we had one office and a team of 12 people. In time, we grew and joined new members to our team. Now we are a big family of more than 205 people working in our offices in three different cities. We enhanced our business not only in our home country but also in the whole world.

Today, we have several cross-border products in various categories like entertainment, lifestyle, games, health & fitness, etc. and they are available in 155 countries, 49 languages. Naturally, 95% of our revenue comes from abroad. Since we always wish to advance, this rate will not stop us, so we do create products for our own use. For instance, we use our own BI and Marketing Performance tools to maximize profitability. After developing such useful intra-company tools, why not making others benefit from them, too? From this point of view, we have launched some B2B projects such as VerifyKit and Desk360. Our considerable experience in the industry has driven us to take up a new perspective which led us to invest in other projects because we know that that a business can only be flourished with collaboration.

Tekrom Teknoloji

Tekrom Teknoloji A.S. was founded in 2003. We are young engineers who do not know boundaries. Our company has not been established by a capital group and has not received any investment so far. Our power comes from over 2,000 customers who believe in us. We are doing just one job for over 17 years and we give all our energy to our business. We are developing our technology with our gain.

We are the leader in the Turkish e-commerce market and we provide software services to the best companies. We believe in the power of Anatolia. We opened up to Anatolia to discover our young people who produce value when given the opportunity. We do not expect global competitors to enter the Turkish market with the strength we have from these lands and we challenge the world by settingtling in Silicon Valley. We want to be a light for our young entrepreneurs who have dreams. As of 2019, we are employing over 120 payroll employees. We choose our colleagues from candidates who do not have the limits of their dreams. In our ecosystem, dozens of freelancers provide job opportunities and we are spreading e-exports for USD 500 billion export target in line with the targets of 2023.

Technology Fast 50
Turkey 2019 Partners
Technology Fast 50 Turkey Program

The program celebrates Turkey's fastest-growing high-technology companies. The awards identify the trends that are shaping the technology, media and telecommunications sectors today. Based on revenue growth percentage over a four year period, the program includes companies from all related industry sub-sectors:

- Communications
- Environmental Technology
- Fintech
- Hardware
- Healthcare and Life sciences
- Media and Entertainment
- Software

To be eligible for Deloitte Technology Fast 50 Program, companies must meet the following criteria:

- to be a technology company which:
  - has its own proprietary technology that contributes to a significant portion of the company's operating revenues
  - manufactures a technology-related product devotes a significant effort to research and development about technology
  - be technology incentive, or use unique technology to solve problems

- to be in business for a minimum of four years
- whose parent company must be Turkish owned and headquartered in Turkey
- whose operating revenues must be at least €50,000 for 2015 and €1,000,000 in 2018.

Deloitte Technology Fast 50 Program is part of Deloitte's global Fast 500 program which runs simultaneously in countries such as USA, Canada, United Kingdom, France, Norway, Sweden, The Netherlands, Germany, Central Europe, Israel, South Africa, China, Australia, Hong Kong, India, Japan, Korea, Malaysia, New Zealand, Singapore, Taiwan, Thailand, South Korea and Finland.

Benefits of Participating at Technology Fast 50 Program:
Technology Fast 50 winners receive exposure and recognition upon release of the rankings from both the media and business communities. The benefits are significant:

- Networking opportunity with other fast-growth Turkish technology companies and business organizations at our awards ceremony
- Networking opportunity with other fast-growth technology companies and business organizations from around the world through Deloitte Technology Fast 500 EMEA Program
- Access to leading edge industry research and commentary
- Recognition from the business and financial communities
- Benchmarking opportunity with similar companies
- Increased attention from the business and investment communities
- Media coverage
