

EMILIE Chatbot

EMILIE is a chatbot built in-house at Deloitte leveraging cognitive APIs combined with custom code, with a web and mobile application interface. It allows a user to speak to the system in natural language as if he or she were talking to another person. EMILIE automatically detects the user's intent and asks any follow-up questions to fulfil any pre-programmed requests. EMILIE can also search through unstructured textual data such as policy or procedural documents to return sections that are the most relevant to a user's question. It continuously learns from user and SME feedback to become more and more customised to the specific use case.

How does it work?

EMILIE Chatbot can support your service desks, compliance functions, and legal advisors

The screenshot shows the Deloitte EMILIE chatbot interface. At the top, there's a header with the Deloitte logo and 'EMILIE' on the left, and 'EMILIE - Lee, Michelle A...' on the right. Below the header, there's a 'New Conversation' button. The main area is a conversation log with three entries:

Conversation	Intent (click to edit)	Confidence
<p>Lee, Michelle A. (UK - London)</p> <p>hi</p> <p>Emilie</p> <p>Hi, my name is Emilie. I can answer your questions regarding General Data Protection Regulation (GDPR) (Regulation (EU) 2016/679).</p>	greeting	100%
<p>Lee, Michelle A. (UK - London)</p> <p>when does gdpr go into effect</p> <p>@Regulation: General Data Protection Regulation</p> <p>Emilie</p> <p>The GDPR was approved and adopted by the EU Parliament in April 2016. The regulation will take effect after a two-year transition period and, unlike a Directive it does not require any enabling legislation to be passed by government, meaning it will be in force May 2016.</p>	FAQ_effective_date	97%
<p>Lee, Michelle A. (UK - London)</p> <p>what happens if GB leaves the EU</p> <p>Emilie</p> <p>If you process data about individuals in the context of selling goods or services to citizens in other EU countries then you will need to comply with the GDPR, irrespective as to</p>	FAQ_Brexit	84%

What are the potential benefits?

Organisations across industries are constantly facing cost pressures and are driven to find efficiencies using modern technology. These new solutions can help support or replace manual processes that are expensive to scale. Service desk, legal advisors face a significant volume of queries involving a small subset of simple issues and requests. Often, the answers are contained in a lengthy policy or Q&A documentation on an overcrowded Intranet or resources page.

EMILIE can be used to automate any conversation-based interactions or the querying of SMEs, which frees up resources to carry out more value add activities. As a platform, it can deal with large scale demand at any point in time with 24/7 availability. It has endless potential for automation across industries in all areas of business, from internal operations to customer service to legal advice.

The ease of use also drives engagement with customers and within the company, as the

As used in this document, Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as "Deloitte Global") does not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms.
