

India Services Group Strengthening ties

The UK and India have over 200 years of shared history, close cultural connections and a strong economic relationship. As the UK looks to forge a future outside of the European Union, there is political will on both sides to further strengthen ties.

With over 1.2 billion people, India is the second largest country in the world by population. A hub for innovation and with an exceptional pool of talent, 65% are under the age of 35 and there is a large and rapidly growing middle class. It is the largest English speaking nation in the world and in recent years the Indian government has introduced a number of initiatives such as "Make in India" and "Smart Cities" with the aim of creating a business-friendly environment. For UK businesses looking to access or expand further in to overseas markets, India represents considerable opportunity.

For India-based organisations, the UK also presents an exciting prospect, with significant opportunities in sectors such as finance and banking, infrastructure, real estate, technology and consumer business.

The UK is already home to more India investment than any other European country and with a diaspora of 1.5 million people based in the UK, there is already close connectivity between the two countries.
