

Deloitte. Cyber Incident Response

Deloitte has been independently recognised as a market leader in managed security services by IDC MarketScape.

“

Deloitte offers a range of managed cyber services, from basic MSS to some advanced detection capabilities, and tailors its offerings from a risk perspective. The company continues to strengthen its offerings with investments in research and development and growth.

”

An ever changing threat

The cyber landscape is always changing. Advancements in robotics, IoT, and artificial intelligence, although positive, can mean greater cyber threats for organisations. Cyber threats can not always be detected by conventional cyber protection methods, and whilst these conventional methods do offer some protection, organisations must develop their cyber response capability to be able to respond quickly and effectively when incidents occur.

What risks are you taking?

If your organisation works online, you are at risk. Cyber threats can strike at any time and can impact organisations of any size, based anywhere in the world. The impacts of a cyber-attack can be very serious, not only are you at risk of financial damage through loss of business services and remediation action, you also risk reputational damage. There is also the risk of fines that can be levied as a result of a data breach under GDPR.

What can you do to protect your organisation?

Deloitte believe that preparation and continuous monitoring are the best ways to maintain cyber security. We know that developing and maintaining an in-house capability to undertake this task can be time and resource intensive. That is where Deloitte can help. Our Cyber Incident Response team work with you to develop processes and strategies to enable you to respond effectively during an incident and exercise these processes using realistic cyber simulations. These preparation activities, alongside our retained global technical response service enables you to be confident that when the worst happens, you have the capability and support to effectively deal with the problem in an efficient manner.

What's different about Deloitte?

At Deloitte, we understand that no matter how prepared you are, an attack can still happen. Deloitte's Cyber Incident Response specialists are here to help you before, during, and after a cyber incident.

As soon as an attack happens, our responders and specialist teams, supported by Forensics, Communications Support, Crisis Management, Customer Breach Support and Technology Recovery can rapidly deploy into your environment using an accredited methodology and state of the art technology to identify what has happened, how it occurred, and what is at risk. Once we have established key facts about the attack, our teams work with you to restore your services, protect you from further attack, and get you back to business as usual as quickly as possible.

Our Cyber Incident Response doesn't end there. Our teams continue to work with you after an attack, to assist you in implementing robust security measures and procedures to enhance your posture against any future attacks.

Cyber Incident Response services

In addition to our other managed services, our Cyber Incident Response service enables you to access multiple specialist services to support your organisation when you need it most. These services include, but are not limited to:

- Incident Management
- Malware Analysis
- Network & Endpoint analysis
- Forensic Services
- Threat Intelligence
- Crisis Management
- Communications Support
- Technology Recovery
- Customer Breach Support

What's the next step for you?

Contacting our Cyber Incident Response team is just the first step in your cyber journey. You can combine this service with our Cyber Threat Hunting service and any of our other managed services to further protect your most valuable assets. Our Threat Monitoring and Cyber Threat Intelligence services detect threats to your business whether they are on or off of your network, whilst our Vulnerability Management, Privileged Access Management, and Managed Information Protection services serve to assist you in increasing your security posture by taking over the management of core platforms.

Our highly-skilled teams combine market-leading technology with Deloitte's experience and knowledge of cyber security and broader risk to provide context-rich information to our customers.
