://Session_Outline/

'Workers and Visitors: Managing an Agile and International Workforce'

Our immigration specialists will explore the following questions and issues that relate to managing an agile and international workforce within the UK tech sector:

- ↳ The practicalities of managing an agile tech workforce whilst remaining compliant with strict Home Office rules and illegal working legislation.
- ↳ Examining what a business visitor can and cannot do with specific examples relating to tech sector roles.
- ↳ Sponsoring tech workers under Tier 2 (General) by way of Resident Labour Market Tests, and looking at permitted allowances and role types as we do.
- ↳ Sponsoring tech workers under Tier 2 (Intra-Company Transfer) and looking at the rules on salary adjustments and housing allowances.
- ↳ Discussing what we know now about Brexit and looking at how different scenarios will affect the tech sector.

Tech City Introduce the Tier 1 (Exceptional Talent) Visa route

Tech City are the endorsing body for the Tier 1 (Exceptional Talent) visa, which is a visa for leaders and innovators in the Digitech sector offering an alternative to the Tier 2 and Tier 1 (Entrepreneur) routes.

This route can serve as a useful alternative to sponsorship for many employers and a useful alternative for those looking to start-up Digitech companies in the UK.

A representative from Tech City is kindly joining us to tell us more and answer any questions that anyone may have.
