

Digital assets are changing everything. Our experience can help you prepare for almost anything.

The tokenization of money and financial services is disrupting global markets for consumers, corporations, financial services firms, and governments. With digital currencies primed to transform the rules of commerce, those with access to experienced innovators may have a serious advantage over those who are still new to the digital asset ecosystem. ExperiMint, from Deloitte, is designed to help organizations explore and respond to the opportunities that digital assets, blockchain technology, and other innovations create by providing our deep industry experience.

Blockchain & Digital Assets

ExperiMint

New to blockchain? We aren't.

Deloitte has been serving the digital asset ecosystem for over a decade. As a recognized leader in serving corporates, digital asset, blockchain, fintech, and payment companies, Deloitte is well-positioned to help guide clients through the blockchain and digital asset financial innovation landscape.

By harnessing our experience and capabilities, ExperiMint assists clients to test approaches that leverage blockchain and digital asset technologies and engage with financial services firms, fintechs, corporations, academic institutions, law firms, and regulators and policy advisers. In addition, ExperiMint could help organizations realize client-prioritized use cases through proofs-of-concept development and thought leadership development to help advance industry dialogue and policy outcomes.

12+ years of experience

navigating through dynamic digital asset regulatory landscape

Trusted adviser

to the blockchain and digital asset ecosystem

Subject matter specialists

across the various risk domains
