

Financial Reporting for Taxes Training

Expand your knowledge

Program Description

Comprehensive offerings

These in-depth, two-day courses are designed to be deep dives into the accounting for income taxes guidance for professionals at different experience levels:

Essentials

"Back to basics" course for tax and accounting/finance professionals with limited experience or who need a refresher in financial reporting for taxes

Complexities

Advanced course for more experienced professionals looking to learn about current developments and more complex areas of financial reporting for taxes

Specialty offerings

These half- or one-day courses provide insights into specialty tax accounting topics, including:

Transformation Enablers

Leading practices to transform the tax provision process and related data flow

International Essentials

Discussions of basic financial reporting for taxes considerations related to international operations

International Complexities

Discussions of advanced financial reporting for taxes considerations related to international operations

Rate-regulated Utilities

Specific issues related to financial reporting for taxes for rate-regulated utilities

Program Learning Objectives

Comprehensive offerings

Essentials

In this two-day session, selected topics relating to the application of FASB Accounting Standards Codification Topic 740, *Income Taxes*, (ASC 740) are discussed. The participant will learn the basic concepts and how to apply the accounting for income taxes guidance through a step-by-step approach together with hypothetical examples and a facilitated case study.

Complexities

In this two-day session, selected advanced topics relating to the application of FASB Accounting Standards Codification Topic 740, *Income Taxes*, (ASC 740) are discussed. The participant will build on a basic understanding of accounting for income taxes to gain a more in-depth, advanced knowledge of complex issues surrounding the topics covered.

We will include discussions and examples illustrating complexities relating to:

- Business combinations
- Change in estimate vs. error determinations
- Current developments
- Interim reporting
- Intraperiod tax allocation
- Noncontrolling interests
- Outside basis differences
- Separate financial statements
- State taxes
- Uncertain tax positions
- Valuation allowance

Specialty offerings

Transformation Enablers

During this session, we will discuss ways to transform the tax provision process into one which achieves a higher level of efficiency and accuracy. First, we will address the importance of obtaining and using data in ways that reduce manual manipulation, enable automation and provide analytics that can result in a shorter review cycle. Next, we will discuss leading practices and real world examples used to redesign the tax provision process and tax accounting sub-processes that have generated shorter close cycles with enhanced reporting and transparency. We will also discuss the “people” side of the tax provision process, focusing on leading practices for analysis and deployment of talent. Third, we will discuss several of the most commonly used tax provision software products and the configuration decisions companies have made to enable transformation. Finally, we will address advanced automation topics, such as managing spreadsheets, technology-enabled tax basis balance sheets, tax portals, and Robotics Process Automation.

International Essentials

In this one-day session, selected topics relating to the application of FASB Accounting Standards Codification Topic 740, *Income Taxes*, (ASC 740) and FASB Accounting Standards Codification Topic 830, *Foreign Currency Matters*, (ASC 830) are discussed. We will begin the session with an overview of the provision process in the context of a multinational enterprise. We will discuss how the global tax provision is prepared on a consolidated basis, with an emphasis on the tax provision of foreign operations in foreign jurisdictions, the tax provision of the US parent on foreign activities in branches, and outside basis differences of the US parent in foreign subsidiaries. We will also discuss intra-entity transactions, foreign currency matters under ASC 830, intraperiod tax allocation rules under ASC 740-20, and how to account for income taxes on the cumulative translation adjustment. We will incorporate a case study throughout the day that covers the steps of computing a global tax provision.

International Complexities

In this one-day session, selected advanced topics relating to the application of FASB Accounting Standards Codification Topic 740, *Income Taxes*, (ASC 740) and FASB Accounting Standards Codification Topic 830, *Foreign Currency Matters*, (ASC 830) to international structures and transactions are discussed and then demonstrated using examples.

Topics include:

- Current developments
- Foreign currency
- Outside basis differences, including computing the deferred tax liability, interim and intraperiod considerations, special topics, and repatriation considerations
- Non-comprehensive tax systems

Rate-regulated Utilities

Participants will better understand the interaction between accounting for income taxes and setting a utility's revenue requirement, the impact of ASC 980-740 on the effective tax rate, accounting for income tax issues that frequently arise in rate cases, and the effect of the normalization requirements of the Internal Revenue Code, Treasury regulations and IRS private letter rulings on accounting for income taxes in the regulated books of account of a utility and in setting rates.
