## State rulings — be proactive

Over 900 multistate tax professionals.

Recognized direct and indirect tax technical knowledge; extensive experience defending tax positions and proactively resolving tax disputes in most state and local tax jurisdictions.

### When to be proactive

- Your company is entering new markets or expanding into new business lines
- “One-size-fits-all” state rules don’t fit your company
  - Statutory rules do not reflect your distinct or complex revenue streams
  - You have unique, industry-specific issues that state statutes do not directly address
- Uncertainty surrounding your state tax footprint and filing methods
- Recently passed or pending state law changes exist that may impact your company

### Why be proactive?

- Establish positions and potentially mitigate risk
- Frame your company’s message and story
  - Present your facts and position in advance of auditor’s initial research and possible preconceptions
- Approach the taxing jurisdiction anonymously, if desired
  - Gives you time to investigate and establish facts
  - Allows for planning opportunities to help mitigate risk going forward
  - Creates, where appropriate, the ability to bring the case forward through a voluntary disclosure agreement (VDA)
- Being proactive can potentially:
  - Yield better results than being reactive (e.g., an advance ruling is often more cost effective than audit defense)
  - Improve accuracy of financial statement estimates
