Cloud management implementation capabilities

Automated approvals & workflows

Utilizing automation within ServiceNow to the greatest extent possible provides for a more efficient process and reduces the number of bottlenecks that may be encountered

Centralization

Centralization of all cloud operations lowers administrative burden, improves productivity and efficiency, and provides for the ability to put in place a more effective enterprise governance model

Standardized taxonomy & configurations

Standardized naming conventions and configurations across Cloud Service Providers (CSPs) reduce confusion and uncertainty for cloud engineers fulfilling requests

Process adherence & compliance

Automated checks and approvals within ServiceNow ensures everyone within the digital marketplace is following established governance processes and policies

Enterprise view of deployed cloud resources

Connecting ServiceNow to all the organization's cloud accounts provides a single location for all cloud operations and allows leadership to quickly pull real-time data around the health and status of cloud resources across the enterprise

Configuration Management Database (CMDB) sync & IT Service Management enablement

Syncing all newly provisioned and existing cloud resources with an authoritative CMDB provides a holistic view of the environment and allows system administrators to understand the impacts of any cloud resource changes

Why Deloitte and ServiceNow?
