

Amazon Web Services (AWS) features and benefits leveraged by the InsurCloud

Amazon EC2 services These allow right-sizing of the configuration of virtual machines for maximum cost efficiencies. There is also the ability to react to customer load, ultimately leading to an improved customer experience.

PaaS offerings such as AWS Relational Database This reduces operational overhead and provides ease through simple UI configuration and data provisioning, in addition to reducing overall database cost.

Amazon Simple Storage Service (S3) This provides an affordable, multi-purpose means of storing data in the cloud, in addition to the simplicity of setup and maintenance.

Pipeline features such as code commit, code build, code deploy These critical features accelerate our software development process ahead of the target state pipeline being ready.

Virtual Private Clusters (VPCs) and account management setup There is improved security through the use of security groups, network access control lists, and flow logs.

Cloud formation and infrastructure as code This allows for quick and predictable service recovery as well as standardization of infrastructure components used, enabling configuration compliance and faster troubleshooting.

Amazon API Gateway This helps manage traffic through throttling, and improves the performance of the APIs through caching.

Deloitte provides audit & assurance, consulting, financial advisory, risk advisory, tax and related services to public and private clients spanning multiple industries.
