Deloitte.
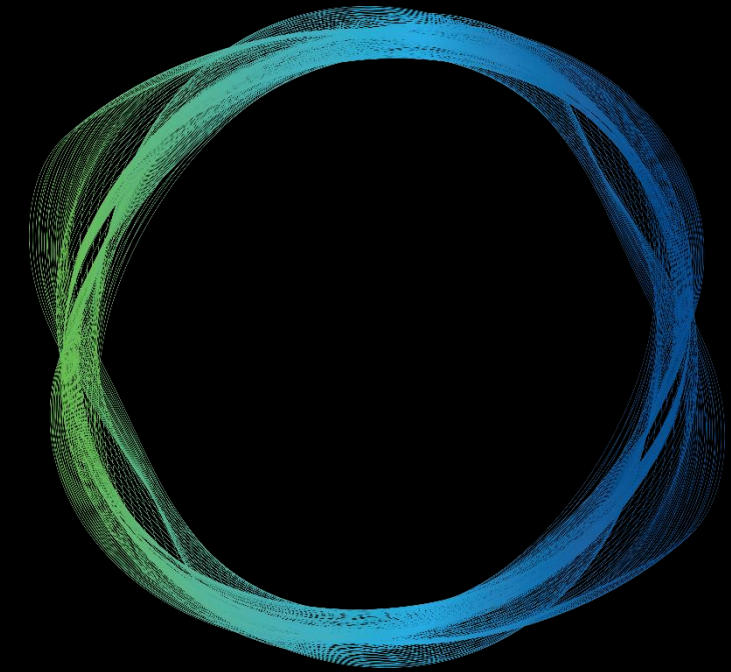

Reimagine what's possible for your enterprise and realize the full potential of Deloitte's Azure cloud services

Deloitte can help you determine the most effective way to innovate, unlock value streams and reduce cost.

App modernization and migration involves more than transitioning legacy technology and processes to cloud. It involves a strategic redirection—thinking about the evolution of your company and what cloud can ultimately enable for your business. How it can unlock new potential and deliver newfound competitive advantage.

Drawing from our deep domain knowledge and extensive experience helping organizations navigate digital transformation, Deloitte looks at the big picture first. We start by focusing on your desired business outcomes and how to leverage cloud native capabilities to form an innovation core at the center of your strategy. Then, Deloitte's Microsoft Technology Services team prioritizes and sequences an approach to accelerate the realization of those value streams.

An end-to-end, value-focused approach—on an accelerated path.

Discovery and assessment
Identify modernization scenarios based on business priorities and business cases.

Readiness planning
Build a road map around modernization and migration types and complexity estimates based on current-state criteria.

Modernization and migration
Leverage intelligent automation and tooling to modernize and migrate applications in waves according to priority and organizational value.

Test, cutover, and operate
Offer day-to-day support and operation of the application(s) to cost-effectively meet service-level objectives.

Decommissioning services
Reduce technical debt and costs, and reinforce cybersecurity posture.

Transform manual processes to cloud-first principles and drive insights and value across your organization

Advance innovation while preserving "the core of the business"

Establish automation and AI foundations

Reduce operating costs, technical debt, potential vulnerabilities, and risk

Accelerate M&A agility and increase overall ROI

Achieve scalability, interoperability, and greater responsiveness

Industry insights to help achieve what cloud makes possible—faster

We apply industry and business domain depth across six key sectors where Deloitte practitioners can drive particular advantage when a client uses Azure:

Consumer	Energy, Resources & Industrials	Financial Services	Government & Public Services	Life Sciences & Health Care	Technology, Media & Telecommunications
Combining Azure's capabilities with Deloitte's tested solutions across tech, human capital and strategy, manufacturing organizations enhance real-time supply chain and/or customer experience value.	Deloitte's specialists provide comprehensive, integrated solutions to all segments of sectors: oil, gas, and chemicals; power, utilities and renewables; and industrial products and construction.	Deloitte is recognized as a leader in cloud professional services,[7] and organizational and technology transformation to financial and insurance organizations.	Deloitte's team brings decades of experience, fresh perspectives and extensive technology resources to help government agencies and educational institutions fulfill their missions.	Deloitte provides strategies and comprehensive solutions to help organizations respond to the opportunities and challenges in today's ever-evolving life sciences and health care industries.	Deloitte's TMT practice has a wealth of experience in helping technology, media and entertainment, and telecom companies evaluate complex issues, develop fresh approaches to problems and implement practical solutions.

Our integrated Azure consulting services

Deloitte's Azure team brings the breadth of services and depth of resources that enable us to help you keep pace with change, regardless of your challenges and opportunities.

Analytics + AI
Template-driven analytics to drive rapid business insights

Intelligent Edge + IoT
Industry-aligned use cases and best practices for leveraging turnkey IoT

Azure Hybrid Cloud
Predefined architectures, best practices and use cases for Azure Stack Hub, Azure VMWare services, and Azure Edge scenarios

SAP S/4HANA on Azure
Next-generation SAP platform leveraging the power of cloud

Application modernization
Cloud native development and app modernization approaches to address app transformation

Deloitte Cloud Accelerator (DCA) for Azure
Predefined core services, automation and reference architecture components critical to operating in Azure at scale
