

Data Migration with Google Cloud Platform, Deloitte, and Informatica

Integrate every part of your connected business with GCP, Deloitte, and Informatica Intelligent Cloud Services (IICS)

Evolving market forces are driving disruption across industries, challenging the way companies do business. To stay competitive, organizations should have access to accurate and complete data across all business functions. Leveraging cloud technology can drive innovation, uncover efficiencies, and help redefine business processes.

Deloitte can help you leverage Informatica Intelligent Cloud Services (IICS), including Informatica's AI-driven Enterprise Data Catalog, Intelligent Data Quality, and other components of the Informatica Intelligent Platform, to transform your data management capabilities through data migration with GCP. Your Deloitte team will work closely with you to establish an architecture that can keep your organization connected. One that gives you the ability to move, manage, govern, and orchestrate data across applications.

Let us help you:

Expedite data migration to Google BigQuery:

Leveraging prebuilt connectors like IICS, Big Data Management, and Power Center, you can accelerate the process of migrating a wide variety of data workloads to Google BigQuery from on-premises applications, relational databases, and data warehouses

Modernize your data architecture with GCP:

We can help you address the growing complexity of data management with a high-performance, cost-effective, and scalable cloud infrastructure

Achieve an advanced data analytics platform with ML/AI:

We can help you leverage the full suite of GCP solutions and pre-built accelerators to deploy AI solutions across your organization

Maximize the value of Google Analytics:

Transform your business with a next-gen, data-driven solution that enables a more holistic view of your customers and the entire marketing landscape

Together, Deloitte and Informatica can help your business accelerate data migration:

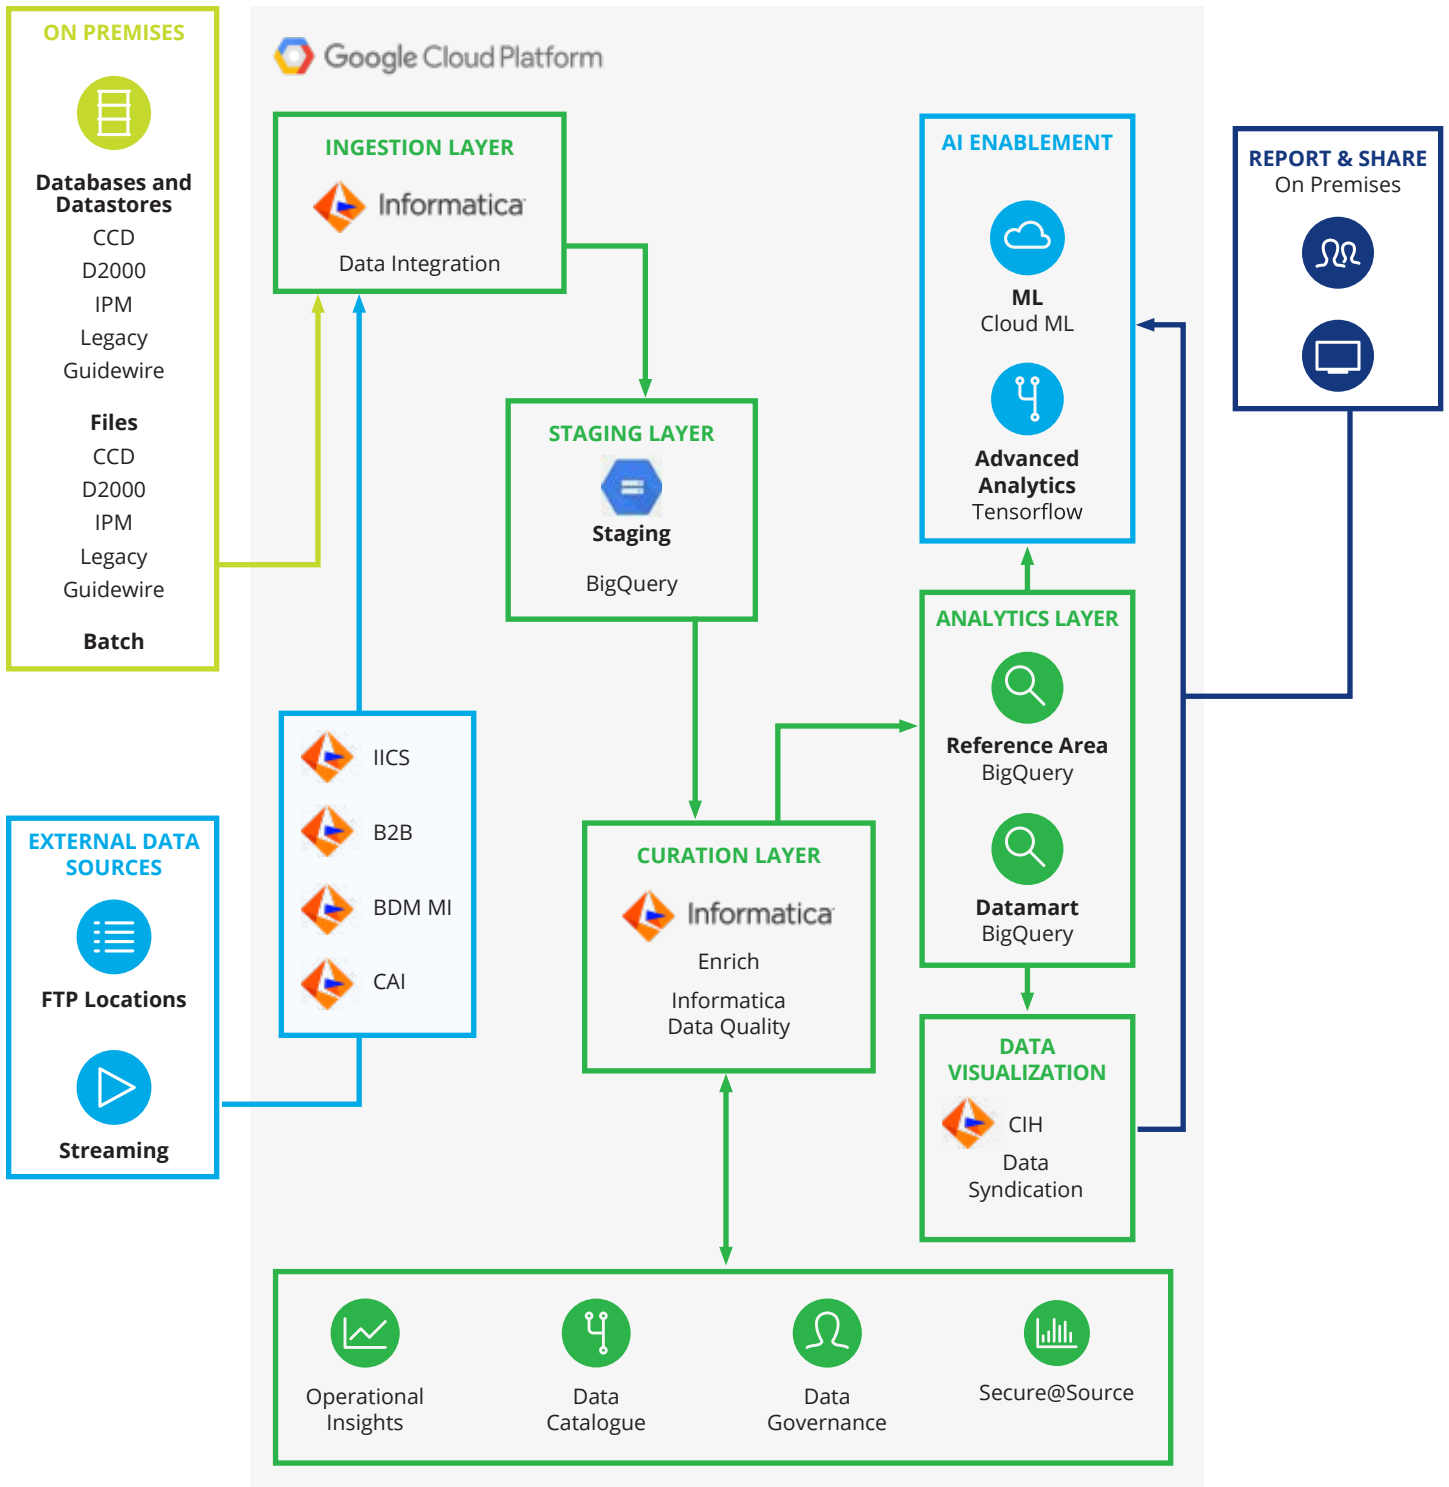

Develop, execute, and govern data integration flows

Deliver accessible, trusted, and secure data to build an empowered workforce

Integrate on-premises sources and applications with cloud applications
