

Business transformation with AWS, Deloitte, and Informatica

Migrate to AWS with Deloitte and Informatica

Evolving market forces are driving disruption across industries, challenging the way companies do business. To stay competitive, organizations should have access to accurate and complete data across all business functions. Adopting cloud technology is central to providing better business value through capabilities like predictive analytics and cognitive computing.

Deloitte can help you leverage Informatica's AI-driven Enterprise Data Catalog (EDC), as well as other components of the Informatica Intelligent Platform, to transform your data management capabilities through the adoption of AWS. Your Deloitte team will work closely with you to establish a prototype platform that can turn your company's data into vital insights.

Let us help you:

Build a cloud strategy with AWS:

Leveraging Informatica EDC, we can quickly analyze your current data structures, recommend the subject areas and data elements to migrate to your AWS prototype, and enhance it using cloud technologies

Modernize your infrastructure:

We can design, build, deploy, and administer your entire cloud platform in an accelerated timeline, leveraging our assets and accelerators that are backed by Deloitte's Cloud Engineering and Operations Transformation

Transform your business with adoption of AWS:

We can help you utilize AWS solutions and pre-built accelerators to achieve an advanced data analytics platform that leverages machine learning, AI, and other cloud technologies

Establish your operations:

We can assist you with platform operations, including administration and production support via our managed services practice

Together, Deloitte and Informatica can help your business accelerate its transformation:

Generate impactful insights with minimal time and resource commitment

Leverage a cloud-enabled prototype as a key asset in creating the business case and the cost-benefit analysis to procure implementation funding

Establish an AI-driven business glossary and data cataloging infrastructure, kickstarted by a holistic data governance framework that can be scaled to the enterprise level
