

Microsoft Business Applications Services

Transforming your organization, one application at a time

Every business faces unique challenges when it comes to transforming into a digital, future-ready organization, with improving human experiences as a top priority. At Deloitte, we imagine, deliver, and run the future by connecting ideas, technology, and talent. We connect customers, patients, citizens, and the workforce in new ways through industry experience and technology to ultimately elevate the human experience. We help organizations turn technology transformations into new employee and customer experiences. When you choose the Microsoft Platform, AI/GenAI or Microsoft's Industry Clouds to accelerate transformation, we can help you convert these capabilities into business value and enable new capabilities never before possible.

Optimize Microsoft applications to improve every part of your operations

Deloitte provides advisory, implementation and operate services across the Microsoft business applications landscape. Our Microsoft Business Applications Services tap into all the capabilities of Microsoft Dynamics 365, Microsoft Power Platform, Microsoft Industry Clouds, AI and Generative AI to customize and streamline large, complex CRM and ERP applications to modernize business applications for a modern workforce. Our broad portfolio of Deloitte capabilities can transform business workflows, including marketing, sales, field service, finance, supply chain, and human resources.

Client successes

Insurance company delivers a modern member experience and gains enhanced customer insights

Connecting digitally with customers has never been more important. At Worldwide Assurance for Employees of Public Agencies (WAEPA), a provider of life insurance to federal employees, the need to invest in transformation has accelerated with growing customer expectations. Rather than simply move data and processes to the cloud, WAEPA decided to build on its existing Microsoft Azure, Dynamics, and Power Platform investments, enlisting Deloitte based upon its demonstrated track record of delivering a spectrum of services, from strategic planning to hands-on technology development and operations to commercial, government, state, and local clients. This resulted in improved website navigation with an integrated and intuitive self-service portal, greater visibility into IT operations and business intelligence insights, and enhanced customer service.

Idaho transforms child welfare services by giving workers the tools they need

Social workers who provide services to children and families face unprecedented challenges. To address them, the State of Idaho Department of Health and Welfare collaborated with Deloitte to launch Ensuring Safety and Permanency in Idaho or ESPI, a low-code, cloud-based implementation of Deloitte's GovConnect platform on Dynamics 365. Focusing on organizational change, business redesign, and improved technology, the modular program was deployed in less than two years. Caseworkers and their managers now have rapid access to critical data that supports confident decision-making. Foster parents communicate through a dedicated portal. IT has moved to a new level, leveraging child welfare-specific assets Deloitte enabled on the platform and saving thousands of hours of development time.

Why Deloitte?

Deloitte’s Microsoft Technology Services Practice connects your business ambitions to all that cloud makes possible, helping you create an innovative new reality and future.

Innovate with confidence

We help your cloud investment drive value quickly by understanding how to translate Azure’s capabilities into your desired business outcomes.

Connect for impact

Deloitte builds on the technology you know and integrates a portfolio of industry- and domain-specific tech capabilities—optimized to deploy on a technology that you choose—to accelerate and amplify cloud’s impact for your business.

Realize your possible

Deloitte’s advise, implement, and operate capabilities—built on decades of large-scale transformations and collaborations with tech organizations and complex ecosystems—are trusted to help you realize your possible and modernize your future.

Recognized leader

About Deloitte

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the “Deloitte” name in the United States and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see www.deloitte.com/about to learn more about our global network of member firms.
