

The image features the Deloitte logo in the top left corner. The background is a light green and white pattern with abstract, flowing brushstrokes in shades of green and blue that curve across the top right. Faint, circular patterns resembling circuit boards or data paths are visible in the background.

Deloitte.

Assets, managed. Performance, unlocked.

Deloitte and IBM Maximo

When it comes to operations, businesses often face pressure to do more with less, extend asset lifecycles, improve uptime, and increase the predictability of performance. Having the right tools and technologies at your disposal, connected in the right ways, can help address these pressures and provide real-time visibility.

Our focus is on developing solutions for operational and maintenance activities—giving you lifecycle asset management of the physical assets at the core of your business. Working with the trained specialists in Deloitte’s Maximo Center of Excellence, we deliver these solutions globally to organizations in a variety of asset intensive industries.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”), its network of member firms, and their related entities. DTTL and each of its member firms are legally separate and independent entities. DTTL (also referred to as “Deloitte Global”) does not provide services to clients. In the United States, Deloitte refers to one or more of the US member firms of DTTL, their related entities that operate using the “Deloitte” name in the United States and their respective affiliates. Certain services may not be available to attest clients under the rules and regulations of public accounting. Please see [HYPERLINK "http://www.deloitte.com/about"](http://www.deloitte.com/about) www.deloitte.com/about to learn more about our global network of member firms.

Our capabilities include:

- Integration and message bus platforms
- IoT platforms
- GIS solutions
- Integration of ERP
- HR and workforce management solutions
- Mobility solutions
- Work scheduling solutions
- Embedding customer experience into work management solutions

We disrupt and deliver solutions, helping organizations like yours unlock possibilities and navigate complexities. Here are a few examples:

Drone Asset Inspections: A drone-based cognitive solution to improve visual inspections and asset maintenance management—speeding up inspection time, automating anomaly detection and maintenance scheduling, and reducing asset downtime.

Maximo Voice Assistant: A bi-directional human speech interface add-on for Maximo that enables users to interact with the system “hands-free” to report back on assets, get step by step directions, and help engineers stay safe by keeping their eyes on the job.

Maximo-Workday Bridge: An adaptor for Maximo that integrates personnel, availability, skills, and time tracking data between the Maximo and Workday systems for quicker, more confident job scheduling and reassignment.

Innovation, scale, and agility at your fingertips

Over 20 years, Deloitte and IBM have created a dynamic ecosystem that blends the best of our two organizations—uniting IBM’s leading technology portfolio with Deloitte’s practical, innovative solutions and deep industry knowledge. We innovate with depth, scale with breadth, deliver agile insights, and inspire confidence with the goal of helping you gain competitive advantage through creative, transformative solutions.

Get started

If you’re ready to unlock your performance potential through digital asset management and determine how to bring it to life in your organization, we should talk.
