Deloitte.

Insurance Growth Suite

Technology solutions accelerating the future of insurance

Insurance Growth Suite is a cloud-native product platform with solutions across the insurance value chain. Our pre-integrated and pre-configured components combine modern, microservice-based cloud integrations with enhanced digital experiences, enabling carriers to capitalize on a fast, cost-effective solution that accelerates business outcomes

Why now?

Insurance carriers are constantly faced with new challenges and no time to react. It's an environment full of moving targets that are hard to prioritize, whether managing challenges around data quality's impact on decision-making, improving customer retention, or ensuring you have the tools, talent, and time to innovate. In turn, carriers are fractured and disconnected, and leadership is dependent on cost, talent, and time-intensive projects. Insurance Growth Suite provides solutions that operate seamlessly within a carrier's in-house systems, creating a positive experience for both customers and distributors.

1. Harness the power of technology

An integrated, adaptable ecosystem of technology solutions is an essential part of your modernized, future-focused insurance company. Our curated and pre-integrated ecosystem meets your tech where it's at, dramatically reducing the cost and complexity of moving to the cloud

2. Drive Business Outcomes

Through Insurance Growth Suite's curated ecosystem of pre-integrated solutions, Deloitte delivers the tech and talent you need to meet evolving customer expectations, stay on the competitive edge of your market, and grow quickly

3. Operate to Innovate

We help reduce costs and risk by curating and maintaining Insurance Growth Suite for you. This helps increase your operational efficiency and enables you to make better decisions with your resource. Our deep experience in insurance, tech implementation, ecosystem relationships, and operational capabilities— and our commitment to product development—uniquely position us to do so.

Insurance Growth Suite

Technology solutions accelerating the future of insurance

Solution Capabilities

Digital Experience. Delivered via Offerings that provide a modern digital experience. Customers, UW's, UWA's, claim handlers, and brokers can leverage enhanced digital capabilities for shopping, purchasing, managing, servicing, and handling claims.

Insurance Fabric. Delivered via "Offerings" that provide a modern digital experience. Customers, UW's, UWA's, claim handlers, and brokers can leverage enhanced digital capabilities for shopping, purchasing, managing, servicing, and handling claims.

Common Core + Data. Pre-configurations and pre-integrations accelerate the implementation of leading insurance core systems from common and emerging vendors, enabling carriers to consolidate platforms and establish a modernized data model.

Cloud Platform. A native cloud insurance platform positions carriers to leverage a more reliable framework that reduces cost and simplifies managing their tech stack while offering scalability, flexibility, reliability, and security for our customers.

Offerings

Policy
Enable customers, agents, and underwriters to shop, rate, quote, and issue policies seamlessly across any underlying policy admin systems.

Communication
Proactively keep carriers and customers aligned with real-time updates about their policies, bills, payments, and claims via preferred communication channels.

Claims
Establish a transparent claims process, enabling customers and carriers to initiate, manage, and resolve claims quickly.

Billing
Enable carriers and customers to digitally manage, issue, and receive bills across multiple underlying billing systems.

Payments
Enable customers to digitally pay policy bills on their terms via their preferred channel across multiple underlying billing systems.
