**NVIDIA** | **Deloitte.**

AI Factory as a Service

Accelerate your AI journey with fully managed and optimized infrastructure.

Investing in, configuring, and managing scalable, robust infrastructure is major barrier to AI success. Deloitte and NVIDIA worked with the best-of-the-best partner solutions to bring you a purpose-built platform with pre-integrated data management, LLM training, and inference services that will get your AI projects off the ground.

Deloitte and NVIDIA are changing what's possible by lowering the infrastructure barrier to developing and launching AI projects at scale. Through an optimized ecosystem of premier tech and cloud providers, we've cultivated and integrated cutting-edge solutions for a robust, scalable infrastructure plus AI software stack that's ready to be tailored for your AI requirements.

Scale GPU capacity in weeks, not months	Achieve an average of 50% TCO savings	Accelerate AI with prebuilt technology stack	Increase workload throughput	Improve data security and governance

AI Factory as a Service is your comprehensive AI solution, providing access to GPU infrastructure, AI software, and third-party data, delivered with hard-to-source skills and deep industry experience.

Faster time to value with fully configured and managed infrastructure.	✓ Delivered in a fraction of the time ✓ Rapid migration of data and workloads ✓ Regional requirements built in ✓ Frictionless scaling
Lower total cost of ownership (TCO) with NVIDIA Cloud Providers that deliver superior economics and sustainability.	✓ Achieve 50% TCO savings when deployed at scale ✓ Superior sustainable energy technologies ✓ Trusted infrastructure management ✓ Industry-leading SLAs and benchmarks
Extreme technical performance from a purpose-built infrastructure designed for speed.	✓ 30% improved performance overall ✓ 35% faster data processing ✓ Accelerated 8x faster query response time *Compared to traditional cloud service providers with equivalent data pipeline*
Deep AI expertise and industry insight with a global reach and a local touch.	✓ Expertise spanning data science and human-centered design ✓ Global network across 150 countries ✓ Universally scalable solutions tailored to local needs ✓ Accelerator templates and libraries
