

Digital workforce for Coupa

Realize your procurement potential with Deloitte's Robotic and Intelligent Automation Services

Deloitte's Digital Workforce for Coupa includes a comprehensive library of pre-built bots and use cases designed to capture process efficiencies, which can reallocate staff for strategic work, boost results accuracy, improve quality, enable 24x7 processing, and reduce time spent on exceptions. Deloitte can help you implement leading-edge technologies, including Robotic Process Automation (RPA) and artificial intelligence to maximize the efficiency of your sourcing and procurement initiatives. For continuing impact, Deloitte also offers full-life-cycle Coupa application management services.

- **Robotic Process Automation** can help make your Coupa processes more efficient by reducing or removing manual work and improving results and reporting. Automation can provide consistency, availability, efficiency, flexibility, and scalability to Coupa implementations, helping to improve spend under management, invoice matching, and timely receiving.
- **Intelligent Automation** technologies can drive better results, helping to inform decisions and accomplish objectives that have traditionally required human intelligence—such as planning, reasoning from partial or uncertain information, and learning. Cognitive technologies are not just about cost-cutting automation applications: They're as much—if not, more—about smarter, better predictive insights.

Deloitte's Robotic and Intelligent Automation Services (R&IA) can help you automate manual tasks and enhance decision-making, leading to increased productivity, better knowledge-based interactions with customers and employees, and the ability to solve complex problems.

Our integrated team of process, technical automation, and cognitive specialists brings functional and industry knowledge, plus proven experience in delivering R&IA deployments.

SPECIFICALLY, WE COVER:

Source-to-Pay Robotic and Intelligent Automation Opportunity Assessments

Source-to-Pay Robotic and Intelligent Automation Implementation

Source-to-Pay Robotic and Intelligent Automation Deployment and Monitoring

Reimagine procurement

SOURCING

- Initiate sourcing events
- Invite supplier to RFx
- Supplier communications
- RFx creation
- Creating/Tracking sourcing project tasks

CONTRACT LIFECYCLE MANAGEMENT (CLM)

- Award contract
- Legacy contract migration
- Automatic contract request/record creation
- Pre-qualification questionnaire
- Contract terms enforcement on mass purchase requisition
- Contract compliance
- Coupa contract record and creating tiered workspace
- Cognitive contracts
- Preferred supplier validation
- Negotiated rate and volume verification
- Start date of the contract (live, terminated, not-started)
- Budget validation
- Automating notifications

PROCUREMENT

- Buyer chat bot
- Requisition data entry
- Updating purchase requisition
- Requisition validation of catalog items
- Validation of free-text/non-catalog requisition items
- Updating purchase requisitions with updated commodities
- Auto-receiving requisitions
- Freight cost tolerance reconciliation
- Order monitoring
- PO flip
- PO closure

INVOICING

- Invoice entry automation
- Delete/bypass approval workflow
- Self-invoice creation
- Non-PO invoice coding
- Non-PO invoice creation
- Update and approve non-PO invoice
- Assignment of buyers, requesters and AP to invoices
- Invoice data validation
- Invoice creation based on supplier invoice
- Automatic posting of local company code invoices
- Tax and accounting determination
- Paper invoice data entry
- Offline email approval

INVENTORY

- Physical inventory—entering stock count process
- Order fulfillment optimization
- Payment term invoice reconciliation
- Reporting consolidation

ACCELERATORS

- Pre-configured integration to ServiceNow®
- Creation of configuration documents
- Making changes to an existing Coupa system
- Data migration
- Test automation
- Security testing
- Creation of training document
- Master data upload
