

Accelerating data impact with Deloitte and Databricks

Unlock insights across the data lifecycle with Deloitte's Data Value Accelerator (DVA)

To securely and cost-effectively integrate enterprise data into the AI lifecycle and leverage Generative AI (GenAI), business leaders should apply a holistic approach across a range of disciplines to operationalize their models and accelerate innovation. Organizations that use data to shape their business strategy, achieve operational efficiency, and unlock revenue through the development of new products and services can lead the way in data and artificial intelligence (AI) and gain industry advantages.

Deloitte's Data Value Accelerator (DVA) is a diagnostic tool that provides insights and signals on the current state of data, analytics, and AI (DAAI) across an organization. DVA enables business and technology leaders to determine where they are in their data and AI journey and can generate recommendations to strengthen organizational DAAI readiness to unlock more value from data faster.

The potential benefits of implementing Deloitte's DVA include the ability to:

- ✓ Diagnose the current state of data, analytics, and AI across the organization
- ✓ Identify key business priorities for data, analytics, and AI
- ✓ Align important cross-functional stakeholders
- ✓ Accelerate alignment around an informed path forward

Diagnosing the current state of data, analytics, and AI

Deloitte's DVA gathers key information to unlock insights on the current state of your data, analytics, and AI, and helps identify opportunity areas where you can build and strengthen your data readiness. By aggregating data collected from a variety of functions, levels, and tenures within an organization, Deloitte's DVA collates responses into rich, actionable insights.

Diagnose and analyze

Survey focused on six key DAAI pillars

36 DAAI drivers to get to data realization

Cross-functional engagement

Alignment and consensus

Diagnostic framework

Deep industry and technical experience

Cloud-powered insights

Action and implementation

Tailored recommendations

Tangible insights and proof points

Opportunity areas for exploration

Accelerate data-driven decisions with Deloitte and Databricks

Deloitte's market-leading experience combined with the power of the Databricks Data Intelligence Platform helps organizations solve their toughest data and AI challenges. DVA makes this possible by identifying and prioritizing recommendations so that leaders can align and take action to enable business transformation.
